Cast Device Boxes and Covers

Boxes feature accurately tapped and tapered threads for tight, rigid joints and ground continuity. A smooth, rounded integral bushing in each hub protects conductor insulation. Openings provide room to make splices and for general maintenance. Accommodate wiring devices like switches and receptacles. Corrosion resistant. Covers for Dry and Wet Locations mount directly on box. Covers for Wet Locations feature a gasket that seals around the plug to keep dirt and moisture out.

Stainless Steel Outlet Boxes and Covers

Calbrite
Stainless Steel Conduit Systems

These boxes and covers are designed to be used in wiring devices, such as switches and receptacles. 316 stainless steel, and polished with standard "brite" finish to increase corrosion resistance. Feature machined standard NPT threads. Internal grounding screw included and manufactured with mounting feet.

Multiple-Service Floor Boxes

Open-office planning options abound with boxes that deliver power, communications, and data service from standard conduit with no exposed service fittings. Quick leveling to desired concrete depth. All are UL Listed (E2969). Nos. 2TEC3 and 2TEC7 are CSA Certified.

Traditional Flush Floor Boxes

Satisfy a variety of office, retail, and commercial applications. Feature Scrubshield™ gasketing technology to exceed UL scrubwater exclusion requirements. Floor boxes are fully adjustable for height and leveling. Cast-iron and nonmetallic floor boxes provide corrosion resistance for slab-on-grade applications.

Multiservice Flush Floor Boxes and Fire-Rated Poke-Throughs

- Floor box is for min. 3" to 5" concrete pours, depending on application subplate
- Poke-throughs are for use in concrete floors from 2¼" to 7" thick
- 4" core hole

SystemOne floor box and fire-rated poke-throughs use a universal cover and various application subplates for consistent aesthetics.

Round, flush, nonmetallic floor box has a 1½" data conduit hub for higher capacity and bend radius suitable for Cat 6/6a, coax, and fiber cables. PVC construction can be saw-cut for easy after-pour adjustment.

Poke-throughs expand during a fire to create a fire seal and prevent heat transfer. Step-down clips allow removal from above. UL Listed for use in 1- to 4-hr. rated floors.

Universal cover with Scrubshield™ gasketing technology exceeds UL 514A scrubwater exclusion requirements.

Metal Conduit, Elbows, and Nipples

UL Listed.

Electrical Metallic Tubing (Thin Wall)—Unthreaded metallic tubing provides easy bending, cutting, and joining. Resists flattening, kinking, and splitting to help create smooth continuous raceways for faster wire pulling.

Intermediate Metal Conduit (IMC)—Threaded conduit (unless noted) is as strong as rigid conduit, and weighs up to 30% less. Suitable for use in hazardous locations. Larger interior diameter enables faster wire pulling.

Rigid Steel Conduit (GRC) (Heavy Wall)—Threaded conduit resists impact and provides radiation protection and magnetic shielding.

Rigid Aluminum Conduit—Approximately ⅓ the weight of rigid steel conduit. Resists most corrosive atmospheres; won't leave discoloring stains or streaks. Cuts, bends, and threads easily without special tools.

RACO ALUMINUM

Durable die-cast aluminum construction with premium powder-coated finish. Combination head screw and stamped aluminum cover (sold separately).

APPLETON ELECTRIC ALUMINUM

Provide greater cubic content for easier wire pulling, and additional room for splicing. Fit flush and snug against flat surfaces for stable installation.

POWER FIRST® IRON

Features chrome powdered finish with zinc-plating for corrosion resistance. Works with Raco gaskets.

KILLARK® 5 ALUMINUM

Tapered threaded hubs. Raintight when used with gasketed covers. Use with the same gasket as Duraloy 5.

KILLARK® DURALOY®5 IRON

Excellent for high-abuse areas. Suitable for concrete burial. Duraloy® tricoat finish provides superior corrosion protection.

KILLARK DURALOY®7 GRAY IRON

Spring-clip cover ensures easy installation. Duraloy® tricoat finish provides superior corrosion protection. Smooth, integral wire bushings to protect against damage while wire-pulling.

KILLARK DURALOY®8 GRAY IRON

Flat back design provides greater cubic capacity for easier wire pulling and more room for splicing and maintenance. Feature interchangeable competitive bodies, gaskets, and covers with smooth integral wire bushings.

CALBRITE™ STAINLESS STEEL

Designed to connect and change direction of conduit runs; can also be used as pulling fittings. Feature 316 stainless steel construction polished with standard "brite" finish to increase corrosion resistance and aesthetic appearance.

No. 4JWJ1

Convertible Conduit Bodies

- Type LB, T, LL, LR, or C

Ship in LB configuration but convert to T, LL, LR, or C with a quick switch of the covers or flanges. Aluminum bodies feature set screw and threaded flanges; Nos. 4JWH6 to 4JWH8 feature threaded flanges (rigid only). Plastic bodies feature glue-in flanges. UL Listed, CSA Certified.

2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Cable Clip	BX4M	4RJD8	MAC2	2KWW1
2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Cable Clip for T-Bar Ceilings	BX4M-A6	4RJD9	MAC2ATA	2KWW3
2-Run Clip for MC/AC (14/2 to 10/3) or ⅜" FMC, Hammer On Cable Clip for Flanges ⅛" to ¼"	—	—	MAC224	2KWW2
Multiple Conduit Mounting Plate, Holds up to 3 Conduit Clips	—	—	SBT18	6PFP7
Flared Edges Prevent Damage to the Cable Jacket	—	—	CER4	6PFP3
Nonmetallic Cable Support Bracket, Secures Cable to Wood Studs	BRC1	4RJC1	CG4	2KXC2
Conduit and MC/AC Cable Support Bracket, For 1½" Deep Boxes, Attach Cable or ½ to ¾" EMT	BB38	4RHJ8	CS812	2KXB9
Conduit and MC/AC Cable Support Bracket, For 2⅛" Deep Boxes, Attach Cable or ½ to 1" EMT	BB38D	4RHJ9	CS812D	2KXC1
Nonmetallic Cable and FMC Support Bracket, Secures Up To ¾" FMC to Metal or Wood Studs	—	—	CJ6	2KXC3
Combination Outlet Box and Conduit Mounting Bracket; Mounts 4" Square Box and ½" to ¾" Conduit (Except No. 4RHT6 is 1")				
Combination Support Bar with Center Hole	BG812-S18	4RHW2	812MB18A	2KWW9
Combination Support Bar with ¼" Threaded Stud	BG812-S18S	4RHW3	812MB18S	2KWW6
Combination Support Bar with Bat Wing	BG812-S18-W6	4RHW6	812MB186	2KWW5
Combination Support Bar with Hammer On Beam Clamp for ⅛" to ¼" Flange	BG812-S18-U24	4RHW4	812MB1824	2KWW7
Combination Support Bar with Bat Wing	BG812-S18-W2	4RHW5	—	—
Combination Support Bar For 1" Conduit Using Plain Center Hole for Screw or Threaded Rod	BG16-S18	4RHT6	—	—
Outlet Box Mounting Brackets				
Telescoping Box Mounting Bracket, 11 to 18" Stud Spacing	BB2-16T	4RHJ5	TSGB16	2KXA9
Telescoping Box Mounting Bracket, 15½ to 26" Stud Spacing	BB2-24T	4RHJ6	—	—
Telescoping Box Mounting Bracket, 17 to 26" Stud Spacing	—	—	TSGB24	2KXB1
Single Side Box Mounting Bracket, 2½" and 3½" Stud Depth	BB4-23	4RHK2	—	—
Single Side Box Mounting Bracket, 2½", 3½", and 4" Stud Depth	BB4-4	4RHK3	—	—
Single Side Box Mounting Bracket, 2½", 3½", 5½", and 6" Stud Depth	BB4-6	4RHK4	—	—
Electrical Box, Supports 35 to 50 Pounds with a Single Brace	—	—	512HDFM35	6PFN9
Electrical Box, Supports 70 to 90 Pounds with a Double Brace	—	—	512HDFM70	6PFP0
Box Support, Prevents Box from Pushing Away From Drywall	—	—	766PM	6PFP1
Multiple Box Mounting Bracket, 16" Stud Spacing, Mounts up to 3 Outlet Boxes	BB8-16	4RHK6	RBS16	2KXA7
Multiple Box Mounting Bracket, 24" Stud Spacing, Mounts up to 4 Outlet Boxes	BB8-24	4RHK7	RBS24	2KXA8
Adjustable Far-Side Support Clip for Outlet Boxes, Suitable For 2½", 3½", and 4" Stud Depth	BB12	4RHJ2	—	—
Wiring Device Retainer, Adds Rigidity in Oversize Wall Openings	BB32	4RHJ7	RLC	2KXD1
T-Bar Ceiling Box Mounting Bracket for 4" or 4 11⁄16" Boxes, 1½" or 2⅛" Deep, 50-lb. Rating	BA50	4RHH5	512HD	2KXK7
T-Bar Ceiling Box Mounting Bracket, Adj. from 1½" to 8¾" Height, 25 lb. Rating	BA50A	4RHH6	512A	2KXK6
T-Bar Ceiling Preassembled Fan Mounting Kit, 70-lb. Rating	BA50F	4RHH7	—	—
Nail Protection Plate, Press On, Protects Electrical and Plumbing, For Metal or Wood Studs	—	—	304B2	2KXA3
Self Tapping Screw, Mounts Boxes or Brackets to Metal Studs, Low Profile Head, Pkg. of 100	—	—	SMS8	2KXA4
1 Gang, Mounting Plate for Class 2 Low Voltage Devices in ¼ to 1¼" Drywall	—	—	MPLS	2KXD5
Fixture Hanger, Side Mount, Supported from S-Hooks and Jack Chain, 50 lb. Limit	—	—	LFC	2KXK1
Fixture Hanger, Top Mount, Supported from S-Hooks and Jack Chain, 50 lb. Limit	—	—	LFC90	2KXK2
Electrical Box Hanger, Dual Height, Snaps Onto Ceiling T-Bar, Load Limit 20 Lbs., Pkg. of 10	—	—	512	2KXK5
Box Support, Ideal For Supporting and Positioning 4" Square or 4 11⁄16" Electrical Boxes	—	—	TSRBS1625	6PFR2
Bracket for 1 or 2 Gang Mud Rings, Mounts Plaster Rings for Low Volt App., 3.51" D	—	—	C23	52JH49
Bracket for 1 or 2 Gang Mud Rings, Mounts Plaster Rings for Low Volt App., 3.89" D	—	—	C4	52JH51

Description	B-LINE BY EATON Mfr. Model	B-LINE BY EATON Item No.	NVENT CADDY Mfr. Model	NVENT CADDY Item No.
KwikWire™—Adjustable Wire Rope System; Replaces Jack Chain or ATR for Support				
KwikWire™ Clamps For ⅛" or 3⁄16" Wire Rope	BKC200	**4RHY3**	—	—
KwikWire™ 1⁄16" Wire Rope, 500-ft. Spool, 75-lb. Rating When Used with BKC100 Clamps	BKW063	**4RHY8**	—	—
KwikWire™ 3⁄32" Wire Rope, 500-ft. Spool, 150-lb. Rating When Used with BKC100 or BKC150 Clamps	BKW094	**4RHY9**	—	—
KwikWire™ ⅛" Wire Rope, 500-ft. Spool, 250-lb. Rating When Used with BKC150 or BKC200 Clamps	BKW125	**4RHZ1**	—	—
KwikWire™ 3⁄16" Wire Rope, 250-ft. Spool, 640-lb. Rating When Used with BKC200 Clamps	BKW188	**4RHZ2**	—	—
KwikPak™ Dispenser Box - Includes 100 Clamps (No. 4RHY1) and 500-ft. Spool (No. 4RHY8), 75-lb. Rating	BKP10063	**4RHY5**	—	—
KwikPak™ Dispenser Box - Includes 100 Clamps (No. 4RHY2) and 500-ft. Spool (No. 4RHY9), 150-lb. Rating	BKP10094	**4RHY6**	—	—
KwikPak™ Dispenser Box - Includes 50 Clamps (No. 4RHY3) and 250-ft. Spool (No. 4RHZ1), 250-lb. Rating	BKP20125	**4RHY7**	—	—
KwikWire™ Wire Rope Cable Cutter	BKCC	**4RHY4**	—	—
Acoustical T-Bar Ceiling Fasteners				
T-Bar Support Clip, Allows for Independent Support of Fixtures, 65-lb. Rating, Fits 15⁄16" T-Bar, Stud Size ¼" x 5⁄8"	BA1	**4RHG7**	IDS	**2KXJ6**
T-Bar Support Clip, Allows for Independent Support of Fixtures, 65-lb. Rating, Fits 9⁄16" T-Bar, Stud Size ¼" x 5⁄8"	BA1-95	**4RHH1**	—	—
T-Bar Twist Fastener, Supports Electrical Boxes from 15⁄16" T-Bar with ¼" x 5⁄8" Stud, 50-lb. Rating, Black Finish	BA-4-16	**4RHH4**	4G16	**2KXJ9**
T-Bar Twist Fastener, Supports Electrical Boxes from 15⁄16" T-Bar with #8 x 5⁄8" Stud, 25-lb. Rating, White Finish	BA-2-16-W	**4RHH2**	4G8WH	**2KXJ8**
Drop Wire Clip for #12 to #8 Wire Prevents Sway of Dedicated Electrical Drop Wire	BA311	**4RHH3**	—	—
Conduit T-Bar Clip Attaches ½ and ¾" Conduit to T-Bar	BG-8-12-A6	**4RHV4**	—	—
Hurricane Clip Troffer Fastener Provides Positive Support for Troffers and Lay-In Light Fixtures	BA15	**4RHG9**	515	**2KXJ4**
Beam Clamps				
Hammer-On Beam Clamp, Provides ¼"-20 Thread to Hang Electrical Boxes, 75-lb. Rating, ⅛" to ¼" Flange	BU-2-4	**4RJC6**	M24	**2KWY7**
Hammer-On Beam Clamp, Provides ¼"-20 Thread to Hang Electrical Boxes, 5⁄16" to ½" Flange	BU-5-8	**4RJC8**	M58	**2KWY9**
Hammer-On Beam Clamp, Provides ¼" Stud to Hang Electrical Boxes, 100-lb. Rating, ⅛" to ¼" Flange	BU-2-4-S	**4RJC7**	M24S	**2KWY8**
Hammer-On Beam Clamp, Provides ¼" Stud to Hang Electrical Boxes, 5⁄16" to ½" Flange	BU-5-8-S	**4RJC9**	M58S	**2KWZ1**
Standard Beam Clamp, 100-lb. Rating, Up to ½" Flange	BC1	**4RHK8**	BC	**2KWY1**
Standard Beam Clamp, 100-lb. Rating, Up to ½" Flange with ½" and ¾" Conduit Clip	BG-8-12-C2	**4RHV7**	BC812M	**2KWY2**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., ⅛" to ⅛" Flange	BE-1-2	**4RHR6**	2H4	**2KWY3**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., ⅛" to ¼" Flange	BE-2-4	**4RHR7**	4H24	**2KWY4**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., 200-lb. Rating, 5⁄16" to ½" Flange	BE-5-8	**4RHR8**	4H58	**2KWY5**
Hammer-On Flange Beam Fastener, Provides ¼" Hole to Hang Chain, Drop Wire, S-Hooks, Etc., 200-lb. Rating, 5⁄16" to ¾" Flange	BE-9-12	**4RHR9**	4H912	**2KWY6**
Cast Iron, ⅛" to 5⁄16" Jaw Opening, For Use With ⅜" Threaded Rod, 250 lb. Load Rating	—	—	CRLB37EG	**6PFR4**
Wall Mount Cable Hooks, 30-lb. Rating				
¾" Cable Hook	BCH12	**4RHK9**	CAT12	**2KXD7**
1 5⁄16" Cable Hook	BCH21	**4RHN1**	—	—
2" Cable Hook	BCH32	**4RHN6**	—	—
4" Cable Hook	BCH64	**4RHR1**	—	—
Cable Hook/Beam Clamp Assemblies, 30-lb. Rating				
¾" Hook, Up to ½" Flange Thickness	BCH12-C2	**4RHL2**	CAT12BCB	**2KXE4**
1 5⁄16" Hook, Up to ½" Flange Thickness	BCH21-C2	**4RHN2**	—	—
2" Hook, Up to ½" Flange Thickness	BCH32-C2	**4RHN9**	—	—
4" Hook, Up to ½" Flange Thickness	BCH64-C2	**4RHR2**	—	—
Cable Hook To Wire/Rod Assemblies, 30-lb. Rating				
¾" Hook, #12 Wire to ¼" Rod	BCH12-W2	**4RHL8**	CAT124Z34	**2KXE9**
1 5⁄16" Hook, #12 Wire to ¼" Rod	BCH21-W2	**4RHN5**	—	—
2" Hook, #12 Wire to ¼" Rod	BCH32-W2	**4RHP8**	—	—
Cable Hook/Hammer-On Beam Clamp Assemblies, 30-lb. Rating				
¾" Hook, ⅛" to ¼" Flange Thickness	BCH12-U-2-4	**4RHL7**	CAT1224	**2KXE8**
1 5⁄16" Hook, ⅛" to ¼" Flange Thickness	BCH21-U-2-4	**4RHN4**	—	—
2" Hook, ⅛" to ¼" Flange Thickness	BCH32-U-2-4	**4RHP6**	—	—
4" Hook, ⅛" to ¼" Flange Thickness	BCH64-U-2-4	**4RHR4**	—	—
Cable Hook/Angle Bracket Assemblies, 30-lb. Rating				
¾" Hook to ¼" Threaded Rod	BCH12-RB	**4RHL6**	CAT12AB	**2KXF2**
1 5⁄16" Hook to ¼" Threaded Rod	BCH21-RB	**4RHN3**	—	—
2" Hook to ¼" Threaded Rod	BCH32-RB	**4RHP5**	—	—
4" Hook to ¼" Threaded Rod	BCH64-RB	**4RHR3**	—	—
Angle Bracket Hanger, 180-lb. Rating, Supports up to 3 Cable Hooks per Side	BCH-HBA	**4RHR5**	CATHBA	**2KXE2**
Cable and Conduit Brackets				
Cable Bracket, Fits 0.430 to 0.560" MC/AC Cable up to 4 Runs, 50-lb. Rating	BRC5-1	**4RJC4**	MCS50	**2KWX8**
Cable Bracket, Fits 0.430 to 0.560" MC/AC Cable up to 9 Runs, 50-lb. Rating	—	—	MCS100	**2KWX9**
Staple-Lok Cable Support, Fits up to ½" OD Cable	—	—	CJ6S	**2KXC4**
Cable Bracket, Fits 14/2 to 10/3 AWG Cable, Supports Horizontal Runs Of MC/AC/FMC Cable Through Metal Studs	—	—	459	**2KXC7**
Low Voltage Cover Plate Mounting Brackets—Replace Electrical Box In Class 2, Low Voltage Outlets				
Single-Gang Old Work Support Bracket	BB10	**4RHH8**	MP1	**2KXD4**
Single-Gang Old Work Support Bracket, Plastic Design	BB10P	**4RHJ1**	MP1P	**2KXD2**
Single-Gang New Work Support Bracket	BB15	**4RHJ3**	MP1S	**2KXB2**
2-Gang Old Work Support Bracket with Screws	BB20L	**4RHJ4**	MPLS2	**2KXD6**
Bridle Rings				
¾" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-12-T	**4RJA2**	2BRT12	**2KXH4**
1¼" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-20-T	**4RJA4**	2BRT20	**2KXH5**
1¼" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-20-4T	**4RJA3**	4BRT20	**2KXH6**
2" Bridle Ring, #10-24 Thread, 50-lb. Rating	BR-32-T	**4RJA8**	2BRT32	**2KXH8**
2" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-32-4T	**4RJA6**	4BRT32	**2KXH9**
4" Bridle Ring, ¼" Thread, 50-lb. Rating	BR-64-4T	**4RJA9**	4BRT64	**2KXJ2**
1½" Bridle Ring, ¼" Lag Screw for Wood Beams, 50-lb. Rating	BR-24-4W	**4RJA5**	—	—
2" Bridle Ring, ¼" Lag Screw for Wood Beams, 50-lb. Rating	BR-32-4W	**4RJA7**	4BRT32WS	**2KXJ1**
Miscellaneous				
Flange Clip to Support Wire, Rod, S-Hooks, or Bolting Straps, 1⁄16" to ¼" Vertical Flange, 160-lb. Rating	BF3	**4RHT2**	VF14	**2KWZ2**
Flange Clip to Support Wire, Rod, S-Hooks, or Bolting Straps, 1⁄16" to ¼" Z-Purlin Flange, 160-lb. Rating	BF4	**4RHT3**	AF14	**2KWZ3**
Angle Bracket Attachment, Attaches #8 Wire or ¼" Plain Rod to Ceiling, 160-lb. Rating	BH1-H7	**4RHX4**	708AB	**2KWZ5**
Angle Bracket Attachment, Attaches ¼" ATR or Stud to Ceiling, 160-lb. Rating	BH4-H7	**4RHX6**	4TIB	**2KWZ4**
Rod Attachment with Hammer-On Beam Clamp, ⅛" to ¼" Flange, 160-lb. Rating, Attaches ¼" ATR or Stud	BH4-E-2-4	**4RHX5**	4TI24	**2KWX1**
Rod Attachment with Hammer-On Beam Clamp, ⅛" to ¼" Flange, 160-lb. Rating, Attaches ⅜" ATR or Stud	BH6-E-2-4	**4RHX7**	—	—
Metal Stud Grommet, Provides 360° Protection, Universal Design Fits All Factory Punched Metal Stud Holes	BM2	**4RHZ7**	ESG1	**2KXC6**
Conduit and Cable Antirattle Support for FMC, EMT or ENT Conduit Size up to 1" Dia.	—	—	781	**2KXC9**
Angle Bracket, 0.281 Dia. Holes, 25-lb. Rating	BH7	**4RHX8**	AB	**2KXL2**
Signal Reference Grid Wire Clamp, Attaches #8 to #4 AWG Stranded Wire to ¾ to 1" Round or Square Computer Floor Posts	BM5	**4RHZ9**	RGC	**2KXL3**
Cable to Drop Wire Hanger, Fits 0.375 to 0.706" MC/AC Cable, ⅜" FMC, or ½" EMT, 20-lb. Rating	—	—	PCS1	**2KWU3**
Conduit Angle Bracket, Supports Horizontal Runs of ½ or ¾" EMT/Rigid/ENT Conduit Through Metal Studs	BG-8-12-H7	**4RHW1**	—	—
S Hook, #11 Gauge, 29-lb. Rating; For Support of Lighting, Speakers and Other Fixtures	BH10	**4RHX1**	771	**2KXK4**
Jack Chain, #12 Single, 100-ft., 29-lb. Rating; For Support of Lighting, Speakers and Other Fixtures	BH9	**5GAR0**	—	—
Fixture Hanger, Side Mount, For Use With: Jack Chain, S-Hooks, and Fluorescent Fixtures; 29-lb. Rating	BH15	**4RHX2**	—	—
Fixture Hanger, Top Mount, For Use With: Jack Chain, S-Hooks, and Fluorescent Fixtures; 29-lb. Rating	BH16	**4RHX3**	—	—

Low-Voltage Mounting Brackets

Arlington

For mounting low voltage Class 2 communication outlets to the front of drywall. PVC construction. Mounting wings hold bracket securely against wall as the mounting screws are tightened. Bracket is its own mounting template, except for No. 6XXC5. Nos. 6XXC6 and 6XXC7 adjust to fit ¼"- to ⅝"-thick drywall, paneling, or wallboard. All models are UL Listed and CSA Certified.

PVC Loop Hangers and Bushing

Arlington

For hanging Cat 5, Cat 6, Cat 7, or fiber-optic communication cables. PVC construction. Hangers are easy to use, hold cable bundles without damage, and rotate at any angle for various mounting applications. White color. Bushing fits existing irregular-shaped holes in metal studs, reducing the need to punch additional holes. All items are UL Listed and CSA Certified.

CANTEX

PVC Conduit and Fittings

Rust- and corrosion-resistant and easy to install. Belled end eliminates the need for special coupling. May be used in underground applications. Schedule 40 can be used in walls, floors, and ceilings under NEC Article 352. Schedule 80 is for above-ground and entrance applications. Schedule 40 and Schedule 80 conform to UL 651; Fed. and Mil. Spec. compliant.

GA GRAINGER APPROVED

Liquid-Tight Flexible Conduit

Series 160
No. 53CJ95

Series 6000
No. 4JC63

Built for a variety of applications ranging from computer room floors to high-temperature areas.

SERIES 160
Built with a circular cross section with a smooth, corrugated flame-resistant polyvinyl chloride (PVC) inner surface and integral reinforcing member within the conduit wall. Used to help protect insulated wire in assemblies or consoles of electrical apparatus.

SERIES 6000
Designed for use in wet, dry, or oily locations as a flame-resistant, nonmetallic raceway for power, control, and communications cables.

SERIES 6100
Designed for use in specific applications where Underwriters Laboratories (UL) or other agency approvals are not required, but flexibility is.

SERIES 6200
Designed for use in wet, dry, or oily locations as a flame-resistant, galvanized steel core raceway for power, control, and communications cables.

SERIES 6400
Offered in Data Comm blue and designed for use as a raceway for power, control, and communication cables.

SERIES 6500
Designed for use in wet, dry, or oily locations as a flame-resistant, nonmetallic raceway for power, control, and communications cables where repetitive motion and constant flexing is required. Ideal for applications where abrasion and physical abuse may occur.

SERIES 6750
Designed for use where limiting smoke and toxic materials of combustion are important considerations. They can also be used outdoors at -40°F and is sunlight-resistant.

SERIES 6800
Designed for use where operation at a high temperature is required. Feature Extreme Temperature jacket that is halogen-free.

SERIES 6900
UL Listed product is designed for use in raceway areas exposed to extreme temperatures.

SERIES SZ
Designed for use as a raceway for NSF® 169 Component Special Purpose Food Equipment and Devices, meat packing, restaurants, food processing, poultry packing, and pharmaceutical facilities.

Flexible PVC Conduit and Fittings

HUBBELL® Wiring Device-Kellems

Fused PVC materials form a rugged and tough, but flexible, conduit with no metal core. Nonconductive, lightweight, nonmetallic materials provide corrosion resistance. Conduit cuts easily and cleanly and resists crushing and crimping. Suitable for all standard-duty applications. Liquid-tight for inside or outside use. UL Listed (PolyTuff® II is UL Recognized), CSA Certified, NEC Article 351-B.

AFC CABLE SYSTEMS®
A PART OF Atkore INTERNATIONAL
Southwire®

Armored Type MC Cable

Cables are rated for 600V and rated 194°F dry. UL Listed, NEC compliant.

MC-LITE®

Designed with lightweight aluminum armor. UL Classified 1-, 2-, and 3-hr. through penetration

MC^{AP}®

Constructed for superior grounding performance compared to regular MC and AC cables. Features integral grounding/bonding conductor.

MC

Fire Alarm®—For fire alarm systems from panels to devices. Features aluminum-bond ground, red armor, and dual-rated MC/FPLP. UL Listed for plenum use. NFPA compliant. UL Classified 1-, 2-, and 3-hr. through penetration

HCF—Designed for hospital and healthcare use. Armor and aluminum bond provides ground NEC 250.118 (8)

Armored Type MC Cable Whips

Armored Cable Connectors

Redi-Loc and Snap-In—Low-profile connectors have lances designed to securely grip armored cable. Body and internal clamp offer increased resistance to pullout, greatly improving ground continuity. 221°F-rated insulator. UL Listed, CSA Certified.

Tite-Bite®—Steel connectors with tough insulated lining withstand vibration and strain. Narrow profile installs easily, even in adjacent knockouts. Double-grip saddle for salvageability. UL Listed for armored cable only. RoHS Compliant.

Snap2It® and Snap-Tite® Connectors

UL Listed, CSA Certified, RoHS Compliant.

SNAP2IT® WITH INSULATED THROAT

- For steel and aluminum jacketed cables
- Tinted to differentiate sizes

Toolless installation: Snap on for a tight, secure hold.

SNAP-TITE® SADDLEGRIP

- For steel and aluminum flex, AC, HCF, and MCI cable
- Also for MCI-A cable where noted

Connectors snap into box, then are screwed tight for super-sturdy hold.

HUBBELL® Wiring Device-Kellems

Liquid-Tight Cord Connectors

- Nylon: for washdown areas
- Aluminum: where lighter weight or better corrosion resistance is desired
- Zinc-plated steel: where higher impact resistance and tensile strength are desired

Proprietary split-hinge Gotcha® ring, color-coded by cord size, grips conductor through cord jacket. Factory-lubricated bushing provides even compression, ensures liquid-tight seal around cord, and minimizes tension on terminals. UL Listed, CSA Certified.

NYLON

Tough, durable, and highly resistant to corrosion.

MACHINED METAL

More durable and reliable than cast metal parts.

Note: Order locknuts on page 315.

HUBBELL® Wiring Device-Kellems

Liquid-Tight Cord Mesh Grips

Deluxe stainless steel cord/cable grips completely eliminate pull tension on terminals, indoors or outdoors, sealing out moisture and cutting oils. Grips control cable arc-of-bend and prevent cord pullout. Corrosion resistant with aluminum fitting that connects to box or hub, effectively sealing out contaminants. Useful in wiring enclosures, pendant stations, construction sites, processing and material handling equipment, pumps, motors, and machine tools.

Machined Aluminum Tray Cable and Cord Fittings

No. 2FPF6

Silver Grip TCF Series nonmagnetic, corrosion-resistant straight aluminum fittings are designed for installation in Class 1 Gas and Vapor environments, without the use of tools. They provide efficient strain relief for cable entering enclosures and raceways in hazardous locations. Tapered neoprene bushing and O-ring seal out moisture and dirt. The chuck grip exceeds the pullout value required by NEC. CSA Certified.

Note: Tray cable and portable cord applications comply with IEC requirements for Class 1, Zone 2, and Zone 1 locations, respectively, when used with enclosures containing no arcing or sparking devices. For enclosures with arcing or sparking devices, TCF fittings must be used in combination with a certified Class 1 hazardous location sealing fitting.

Strain-Relief Devices and Cable Support Grips

HUBBELL Wiring Device-Kellems

UL Listed (except No. 6C095) and CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 10.

I-GRIPS FOR HUBBELL INSULGRIP® PLUGS AND CONNECTORS

Strain relief devices control cable arc-of-bend and reduce high pull tensions on cordsets from wiring terminals. Fit all 2-, 3-, 4-, and 5-wire Hubbell Insulgrip plugs and connector bodies. Eye tabs fit under nylon cord clamp and screws slide through eyelet holes, securing grip in place. Made of high-strength, plastic-coated galvanized steel strand. Indoor use only.

Note: Grip only; plug and connectors are not included. See page 334 for plugs.

BUS-DROP CABLE SUPPORT GRIPS

Safe, easy, and economical method to support flexible-cord or bus-drop cable. Galvanized wire mesh ensures holding power. Single eye easily attaches to any hanger. For indoor use only. Suitable for assembly equipment in manufacturing, processing, or material handling applications.

Single-Eye Cable Support Grips

HUBBELL Wiring Device-Kellems

Hold the weight of electrical cables as they hang in a vertical, sloping, or horizontal position. The single eye simplifies attachment. Easy to install, reuse, and reposition. Split styles wrap around cable when cable end is not accessible. Tin-coated bronze. UL Listed and CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 10.

Wall Plates

HUBBELL® AND BRYANT®

Virtually unbreakable nylon plates resist cracking. Stainless steel plates are Type 302/304 with high nickel and chromium content for improved corrosion resistance. Anodized aluminum plates offer the corrosion resistance of stainless steel. UL Listed and CSA Certified.

CORTECH®

Built to withstand demanding institutional and industrial environments. Injection molded in high-strength nylon/polycarbonate resin blend that eliminates the need for painting. Oversized to mount directly into any wall type. Each includes Torx® Tapcon mounting hardware. Smudge-resistant. White color. ETL Listed.

Self-Testing GFCI Receptacles

HUBBELL® Wiring Device-Kellems **BRYANT®**

- 125VAC
- LED indicator

Devices protect personnel from shock hazards that can occur in electrical appliances and tools, especially in wet and damp locations. They meet new UL requirements by automatically monitoring ground fault circuit interrupting functionality every 3 hours or less. UL Listed (943 Class A for GFCIs, 498 for Receptacles) and CSA Certified.

Surge Suppression Receptacles

- 125V
- Power On indicator light

Provide point-of-use protection that can cause premature electronic equipment failure. Audible alarm alerts occupants when device needs replacement. Features a high-impact, nylon face that resists damage. Isolated ground-grade models protect equipment from effects of noise on the ground circuit. For use in accordance with NEC/NFPA Article 250-74, Exception 2. UL Listed and CSA Certified.

USB Charger Tamper-Resistant Receptacles

- 125VAC
- USB charging 5.0A @ 5VDC

Devices combine USB DC power and tamper-resistant AC electrical power in a standard single-gang opening, so you can charge personal electronics and power appliances from the same receptacle. A green LED light indicates USB power is available. Decorator flush-fit design fits most single-gang plastic or metal junction boxes. Receptacles are impact- and chemical-resistant. Back and side wire for solid or stranded wire. UL and C-UL Listed.

Hospital Grade Receptacles

BRYANT® HUBBELL® Wiring Device-Kellems

These hospital grade receptacles are designed to withstand the severe conditions unique to hospital environments. Nickel-plated bypass contacts help increase contact pressure and lower operating temperature. Four-point grounding system provides redundant grounding for low resistance ground continuity, and thermoplastic polyester (RTP) back is tough and heat-resistant.

Note: To quality for the hospital grade designation and use of the green dot symbol, UL requires product performance to specific levels. These levels form an established baseline below which no manufacturer can fall and still carry a green dot.

HUBBELL® Wiring Device-Kellems

SNAPConnect® II Wiring Devices

Suitable for use in commercial construction and in healthcare applications. Great for installations with potential for frequent device change-outs. Additional hospital grade versions are available; see Grainger.com®. UL Listed and CSA Certified.

Note: SNAPConnect® II is not compatible with SNAPConnect®. Please check Mfr. Model number before ordering.

SWITCHES

Feature an abuse-resistant thermoplastic rocker for heavy-duty applications. Design eliminates exposed energized parts. Stainless steel autoground clip. Illuminated Switches have light On with load Off. Pilot Light Switches have light On with load On. 120 to 277VAC.

RECEPTACLES

Abuse-resistant nylon for heavy-duty applications. SNAPConnect® feature eliminates exposed energized parts. Stainless steel autoground clip. 120VAC.

PIGTAILED CONNECTORS

1-phase, 2-pole, 3-wire clear polycarbonate pigtails are made for use with the devices listed, and are required for all switches and receptacles.

Straight Blade NEMA Configurations

1-15P

The National Electrical Manufacturers Association (NEMA) standardized configurations for single-rated devices were created to minimize the possibility of unsafe mating of unmatched voltages and amperages. The standard also defines dimensional requirements to assist users in selection of the proper product for a particular need. Use the figures below to help identify the correct device for your specific application.

High-Ampere Plugs

UL Listed and CSA Certified.

Note: See page 334 for NEMA configurations.

HUBBELL® PLUGS

Heavy-duty cord clamps handle a wide range of cable sizes and hold conductors securely in place. Nylon bodies withstand severe abuse.

BRYANT® PLUGS

4-position angle plugs allow cord to enter from top, bottom, or either side and stay close to wall.

Durable wall construction protects critical wiring from abusive environments. Reinforced thermoplastic polyester provides high impact and heat resistance.

Plug Adapters

Warning: Where adapters have different ratings on blade and slot ends, the following precautions must be exercised in their use:

1. Overcurrent protection is determined by blade end.
2. Adapter use should be limited to lowest rated end of adapter to prevent overheating.

Locking Devices

Note: For NEMA configurations, see page 335.

HUBBELL® Wiring Device-Kellems
BRYANT®

MIDGET DEVICES

Nylon plugs and connector bodies resist impact and abuse. 2-wire valise devices have bundling clamp screw terminals; 3-wire valise devices have insulation displacement (IDC) terminals. This allows easy and fast installation. Angle devices are low profile for use in limited spaces. Valise devices have offset jaw cord grips to prevent strain on terminals. UL Listed and CSA Certified.

HUBBELL NEMA DEVICES

Impact- and crush-resistant nylon construction withstands industrial chemicals and solvents. Plugs and connectors have 2-part offset jaw cord grips and totally insulated dead-front construction. Receptacles have a thermoplastic base, all-brass grounding system, and 1-pc. contact. UL Listed and CSA Certified.

HUBBELL ISOLATED GROUND RECEPTACLES

Insulation barrier construction isolates ground contacts from mounting strap for a noise-free ground. IG triangle on face of receptacle indicates isolated ground device. Green grounding screw is connected directly to grounding contacts. For use in accordance with NEC/NFPA Article 250-74, Exception 4. ANSI C73, NEMA WD-6. UL Listed to Standard 498 and CSA Certified, CSA C22.2 42.

Weatherproof Boots for Plugs and Connectors

Thermoplastic elastomer boots protect cord-connected devices from harmful UV rays and many chemicals. Graduated-step cord entry design accommodates a wide range of cord sizes. Closure plug, sold separately, slips over the connector boot to seal the front of the device when not plugged in.

Note: When selecting a boot for a connector that will be used with a flanged inlet, use a boot for a plug.

Dual-LED indicators provide immediate visual identification of potential upstream mis-wire conditions. Nylon housing provides superior chemical and impact resistance, with an integral dust seal. Single-plane wiring for easy installation. Black and white color. UL and C-UL Listed. Meet FSUL Standards.

Watertight Safety-Shroud Twist-Locks®

HUBBELL®
Wiring Device-Kellems

UL Type 4X-rated devices can prevent the ingress of water under hose-down conditions. Feature stainless steel hardware, closure caps, 1-pc. thermoplastic housing, and lockout-tagout hole.

Note: For Watertight Safety Shrouds, see page 342.

50A Twist-Lock® Devices

HUBBELL®
Wiring Device-Kellems

Box terminal with Allen-head threaded lug permits high clamping pressure on conductors without damaging the threads. Receptacles have zinc-plated steel nosepieces that cannot be distorted to mate with the wrong device. Connectors and plugs have a super-tough, ribbed-nylon housing for superior impact/crush resistance and secure gripping. Stainless steel shroud on plugs protects plug blades from damage.

ERICSON® Since 1918 | HUBBELL® Wiring Device-Kellems

Watertight Devices

Corrosion-resistant devices are suitable for dust-laden, damp, or wet (IP66) environments, including temporary submersion (IP67). Rated NEMA 4, 4X, 6, and 6P. UL Listed and CSA Certified.

HUBBELL®

Plugs and connectors feature keyed interior for easy installation and high conductivity brass termination. Also designed with Gotcha® ring and collapsible bushing strain relief. The strain relief nut seals on the body, eliminating areas of debris collection, and provides impact resistance. Unique cone seal prevents dirt and debris from collecting at cable entrance and adjusts to various cable ranges. All stainless steel hardware and corrosion-resistant connection points.

ERICSON®

Designed with antimicrobial additives, these watertight devices provide continual, long-lasting protection against the growth of bacteria, mold, mildew, and fungi. These NSF/UL/CSA rated wiring devices can be used for new and existing installations, and are suitable for a wide range of applications.

HUBBELL® Wiring Device-Kellems

Hubbellock® Devices

Spring-loaded safety shutter ejects plug if not properly locked into connector/receptacle; shutter snuffs out arcs when devices are connected or disconnected under load. Key/detent ensures positive lock. UL Listed.

Hubbell Single-Pole Connectors

Nonmetallic retaining screw locks contacts in place so they don't move within the housing. Special screw thread prevents installation 180° out of rotation and requires fewer turns, reducing the chance of a conductive screw being substituted. Multiple guides ease cutting to correct cable size. Large raised alignment arrow eases mating of devices. 600VAC/250VDC. Rated NEMA 3R, 4X and 12K. UL and C-UL Listed.

HUBBELL® Wiring Device-Kellems

IEC Nonmetallic Watertight Pin and Sleeve Devices

Non-metallic housings are non-conductive, color coded by voltage and impact- and corrosion-resistant. Patented mechanical cord grips secure both the cable jacket and internal conductors to help ensure stress free terminations. One piece all brass pins and multi-contact springs provide superior conductivity for long-term reliable connections. Individual neoprene glands provide IP67 watertight performance withstanding wet and harsh environments. Receptacle back boxes are also available; see page 342.

HUBBELL® Wiring Device-Kellems

IEC Switch Rated Pin and Sleeve Devices

The Advantage Series Switch-Rated Devices are IEC 60309-2 compatible devices that are approved as a disconnecting means for motor and branch circuits. These devices feature an oversized spring-loaded disconnect button, superior horsepower ratings and UL witnessed IP69k and UL Type 4X water ingress protection.

Type 4X Pin and Sleeve Devices

Interchangeable with traditional all-metallic pin and sleeve devices built to UL 1686-C1. Insulgrip® pin and sleeve plugs and connectors have a metallic shroud to provide ground and protect pins, and a watertight, nonmetallic housing for corrosion resistance and electrical safety. Style I plugs and connectors ground through their metallic shroud, and receptacles are grounded via ground lug in the aluminum back box. Style II devices have a dual-ground safety feature using dedicated ground pin. Receptacle back boxes available; see this page. Gray color.

Boxes for Pin and Sleeve Receptacles and Inlets

Nonmetallic models are high-grade thermoplastic; they resist chemicals, abuse, and UV rays, and meet NEMA Type 4X when installed with watertight conduit hub. Metallic models are cast-aluminum with gray enamel paint for corrosion resistance.

Circuit-Lock Watertight Mechanical Interlock Devices

- Lockable in Off position
- UL Type 4X, 12K watertight enclosures
- Use appropriate Class J time-delay fuse (see page 180)

Space-saving, nonmetallic units incorporate disconnect and receptacle. Meets NEC requirement for a separate disconnect means within sight of motor loads. Arc protection: The devices cannot be turned on without the proper plug fully inserted, and with power On, the plug cannot be removed.

Southwire®

Building Wire

- PVC insulation with nylon jacket
- Rated for 600V

This wire carries electrical current from a power source to a device in a building, such as an outlet or light fixture. Building wire is typically used to run new circuits or extend old circuits inside walls and ceilings in commercial, industrial, and residential properties. **Solid** conductors are tougher and more rigid than stranded. **Stranded** conductors are more flexible than solid and can withstand vibrations and flexing. **THHN** (thermoplastic high-heat-resistant nylon) building wire is a coated wire typically run through conduit or cable trays. **XHHW** (cross-linked polyethylene high-heat-resistant water-resistant) building wire is a coated wire typically run through raceways.

Bus Drop and Tray Cable

These are service cords that connect a power supply to a machine or device. They have two or more insulated conductors and a protective jacket that resists abrasion, water, sunlight, and lubricants. **Bus drop cable** is typically used as a branch connection from a ceiling cable. **Tray cable** is primarily used for wiring installations in open-air raceways and trays.

Armored Building Cable

- Rated for 600V

Also known as BX cable or metal-clad (MC) cable, armored cable prevents accidental penetration better than NM-B building cable, but it is heavier and harder to handle, rip back, and cut. Protective corrugated metal jacket (called a sheath or cord) serves as a conduit and provides grounding.

No. 446P36

KH INDUSTRIES

Pendant Drop Portable Cord

- Thermoplastic jacket
- Rated for 600V
- Temp. range: -10° to 90°C

This temporary service cord contains multiple conductors. It is installed as a branch off of ceiling cable and hangs down to provide power to a machine.

CAROL BRAND

Super Vu-Tron® SOOW Types and W Portable Cord

- Rated for 600V

Heavy-duty service cord with oil-resistant insulation and a flexible thermoset rubber jacket is oil-, water-, and weather-resistant. This cable is typically used to power industrial applications.

Portable Cord

GRAINGER APPROVED CAROL BRAND

- Stranded conductor design

Flexible, moveable electrical cable. **SJOOW and SOOW cord** is heavy-duty service cord with a jacket that hardens under a direct application of heat, allowing the cord to be unaffected by aging, abrasion, water, sunlight, and ozone. **SJTOW and STOW cord** is less flexible than SEOW and SOOW portable cord and will degrade under extreme temperatures and exposure to oil and chemicals. **SEOW cord** is more resistant to water than SOOW portable cord and can be used at lower temperatures, but it is less durable.

Southwire

Bare Copper Grounding Wire

- Rated for 600V
- Temp. rating: 167°F
- 6 AWG stranded: Class B stranding
- 4 AWG stranded: Class A and B stranding

This wire does not have insulation or a jacket and is used to connect a circuit to a grounding rod in the earth.

No. 4WZV1

CAROL BRAND

Lamp Cord

- Temp. range: -4° to 140°F

Flexible electrical cable used to connect small, portable appliances, like lamps, clocks, and radios, to a power source, usually via a wall socket. It does not include plugs on the ends of the cord.

Southwire

Flat Submersible Pump Wire

- PVC insulation

Multiconductor cable connects a submersible pump controller to the motor of the pump. Also known as sub pump wire, it resists oil, lubricants, acids, ozone, and abrasion, making it ideal for wet or hostile environments.

No. 6UTA2

SC Portable Cord

No. 1YPX4

- Super Vu-Tron® rubber jacket over copper conductors
- Temp. range: -58° to 221°F (-50° to 105°C)
- TRU-Mark® sequential footage marking

Heavy-duty cable is commonly used to provide temporary power for entertainment industry activities. This cord can be coiled and stored when not in use, making it easy to move from location to location. It can withstand heat and flames, and it's resistant to liquids, solvents, ozone, crushing, and abrasion. UL Type SC, CSA Type PPC, RoHS compliant.

CAROL BRAND

Welding Cable

- EPDM rubber insulation
- Black, abrasion-resistant Carolprene® jacket
- Rated for 600V
- Temp. rating: 221°F

Flexible, durable electrical cable supplies power to the secondary circuit of electric welders, which controls the electrode that releases the charge needed for the welding process. It has a single, finely stranded conductor, which gives welding cable more flexibility than other types of electrical wire.

Note: Do not use for in-line voltages, which could be hazardous. Designed for use with secondary voltages.

Continuous Flexing Cable

igus®

- Cut to length; sold in spools or by the foot

This is electrical cable that can withstand repetitive motion and constant bending without damage. It has one or more insulated conductors and a flexible jacket that is oil-, flame-, and coolant-resistant.

GeneralCable CAROL BRAND

Security and Alarm Cable

SOUND, ALARM, AND SECURITY CABLE, TYPES CMR AND CMP

For burglar alarms, intercoms, PA systems, and sound systems. Stranded or solid bare copper conductor. Jacket has sequential footage markings to facilitate installation. UL Listed and California State Fire Marshall Approved.

Shielded cable has an aluminum/polyester Flexfoil® shield with stranded, tinned-copper drain wire.

Riser

- Temp. range: -4° to 167°F, except 500-ft. 22-ga. unshielded are -4° to 140°F
- Rated for 300V

Ripcord included.

Plenum

- Temp. range: 32° to 167°F
- Rated for 300V

FIRE ALARM/LIFE SAFETY CABLE, TYPES FPLR AND FPLP

- Compliance: NEC Article 760-61
- Type FPLR meets UL 1666 Vertical Tray Flame Test
- 500-ft. Type FPLP meets UL 910 Test for Flame Propagation and Smoke Density
- 1000-ft. Type FPLP meets NFPA 262 Vertical Tray Flame Test
- Temp. range: -4° to 167°F, except 1000-ft. Type FPLP 32° to 167°F
- Rated for 300V

Ripcord included. California State Fire Marshall Approved. Shielded cable has foil shield with stranded tinned copper drain wire. For wiring fire alarms, smoke detectors, fire protective circuits, burglar alarms, and voice communications. Sequential footage markings to facilitate installation.

Communication Cable

CAROL BRAND GeneralCable

- Fully annealed, stranded tinned copper conductors
- Color coded
- 1000-ft. rolls

Cables facilitate cable pull-ins and single-site installations. These cables are typically used for industrial equipment control, electric valve actuation, and remote signaling. Also used for communications and broadcast applications. Multi-paired cable designs find frequent application in circuits requiring circuit-to-circuit isolation from noise, minimization of capacitance imbalances, and a reduction of EMI interference currents.

Note: 100- and 500-ft. rolls are available on Grainger.com®.

5e Plenum Cable

GenSPEED BRAND CAROL BRAND MONOPRICE

Category Cable

Designed with a solid conductor. PVC jackets have sequential foot markings. Outside Plant Cable No. 1MWZ2 features internal cross-web that maximizes pair separation for enhanced electrical performance. No. 1MWX7 has helical aluminum armor over inner jacket for increased cable protection and tensile support strength. Meet ANSI/TIA/EIA 568A, ANSI/ICEA S-90-661, and NEMA WC63.1. UL and C-UL Listed.

CAT 5E
- 24-ga. conductors
- 100 Mbps, 155 Mbps, and Gigabit Ethernet
- 100 Base-T
- 52/155 Mbps ATM

All pair counts meet Cat 5e Power Sum backbone transmission requirements; suitable for high-speed data transmission.

CAT 6
- 23-ga. conductors
- 1000 Base-T Gigabit Ethernet, 100 Base-X, 10 Base-T (IEEE 802.3)
- 1000 Base-TX
- 4/16 Mbps Token Ring
- 155 Mbps/1.2 Gbps ATM

Excellent for digital video and broadband and baseband analog video. Filler design makes cable very round and easy to handle.

Pulling Grip Kit
No. 6D189

Light-Duty
No. 6D212

HUBBELL® Wiring Device-Kellems

Pulling Grips

Strong galvanized steel mesh grips provide positive holding power while pulling electrical, data, and communication wires at low tension through conduit. Rubber boot contains and protects cable ends. Flexible single eye provides easy attachment to pulling lines and fish tapes. Reusable and easily installed. CSA Certified.

Note: Always use a Safety Factor in application. Never use grips at tensions up to listed breaking strength. Recommended Safety Factor of 5.

Power Distribution Units

No. 14A325

No. 6ECK2

No. 6RHW4

Offer reliable rack-mount multioutlet power distribution from any supplied power source. High-quality design includes rugged all-metal housing and secure rack-mount installation with included mounting accessories. Metered units offer real-time local reporting of load levels via built-in digital meter.

Xcelerator® Jacks—Universal Wired 110 Connection

HUBBELL®
Hubbell Premise Wiring

- Universal wiring for T568A or T568B
- For use with Hubbell wall plates
- Third-party component verified

Fast and easy to install and terminate. Compact, full-encasement housing protects connection elements and snaps into standard Hubbell® keystone opening. Termination towers are angled for easy lacing of wires into IDC contacts. Paired punchdowns have color-coded wiring labels.

Note: See page 355 for Wall Plates.

PROclick® Fiber Pre-Polished Connectors

Hubbell Premise Wiring

- 900/250 um

Provide a low-cost field termination solution. Eliminate adhesives and polishing and utilizes a fiber clamping method. Perform well under extreme temperatures.

Fiber Optic Cable Testing Instruments

Description	Mfr. Model	Item No.
IDEAL		
Fiber Optic Test Kit, Power Measurement In dBm and W, Loss Display In dB, Four Wavelength MM/SM Light Source	33-931	**6KJU4**
Fiber Fault Finder, Finds Breaks, Faulty Splices and Crimps Poor Components or Connections for Fiber Cable, Visually Identifies and Locates Faults in Fiber Optic Cabling, 2.5mm Universal Adaptor for All ST, SC and FC Connectors, Useful Over a Distance of 5km (3 miles), Up to 80 hours of Operation, Ruggedised Aluminium Body	VFF5	**6LFY3**
Hubbell Premise Wiring		
Fiber Visual Fault Locator Kit, Fiber Terminations and Breaks, 1.25MM and 2.5MM Ferrule Adapters	OFVFLKT1	**22LV15**
Fluke Networks		
Fiber Optic Cleaning Supplies, Fiber Optic Cleaning, Solvent, Swabs and Cube	NFC-KIT-BOX	**12N847**
Fiber Optic Cleaning Supplies, Fiber Optic Cleaning, Solvent, Swabs, Cube and Case	NFC-KIT-CASE	**12N848**
Visual Fiber Optic Fault Locator, Visible Light Source That Helps Trace Optical Fibers, Check Fiber Continuity, And Find Faults Such as Breaks, Bad Splices, and Tight Bends In Fiber Optic Cable	VisiFault	**2EHV6**
Basic Fiber Verification Kit (MM), Verify Optical Loss and Power Levels	FTK1000	**4AZZ3**
Fiber Optic Tester, Fiber Optic Video Inspection, Detects (850/1300nm) Multimode and (1310/1550nm) Single Mode Wavelengths, Locate Connections and Faults, Measure Loss and Reflectance, Allow Tier 2 Certification	OFP-Q-ADD	**54DV48**
Fiber Optic Tester, Fiber Optic Video Inspection, Extended Single Mode Distance Range to 130km, Versiv™ Modular Design Supports Copper Certification, Fiber Optic Loss, OTDR Testing and Fiber End Face Inspection	CFP-Q-ADD	**54DV49**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-100-M	**54DV52**
Fiber Optic Fault Locator, Fiber Troubleshooting, Works On Multimode Fiber, 9/125µm and 62.5/125 µm, Locate Severe Bends, High-Loss Splices, Breaks and Dirty Connectors In Single Mode Fiber, Change The Index of Refraction (IOR) to Improve Fiber Length Accuracy	FQM-100-M-VFL	**54DV53**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-M	**54DV54**
Fiber Optic Fault Locator, Fiber Troubleshooting, Fills The Gap Between a VFL and An OTDR, VFL Simplicity, Identify Live Fiber, Provide Distance and Power Information On High Losses, Breaks At The End of The Fiber	FQM-SFP-M	**54DV55**

BMP®21-Plus Handheld Labeler and Labels

- Autoformat for label size
- Dual cutters
- Serialization and barcoding
- Multiple-line printing
- Non-smearing thermal transfer
- Fit ID Pal labels

Printer with memory feature does terminal block marking, patch panel ID, and wire marking. Prints symbols, uppercase and lowercase characters in 6 font sizes. Backlit display is easy to read in wiring closets and other dark areas. Uses 6 AA batteries (not included). Includes 1 tape cartridge.

Easy-to-peel labels adhere to smooth and irregular surfaces. Nylon cloth B499 also adheres to highly textured surfaces.

BRADY

BMP® 61 Handheld Labeler and Labels

- Simple user interface and easy material loading
- Creates crisp, clear labels
- Large color touchscreen display

Designed for quick and efficient identification of wires, cables, and components. Rugged and reliable, this label printer features multiple user interfaces, touch screen capabilities, and a variety of ways to connect, manage, and save your data.

No. 52HJ90

No. 4VR42

RHINO™ 4200

RHINO™ 5200

DYMO XTL 300

DYMO XTL 500 Kit

Electronic Printers

- 1-touch hot keys save setup time
- Large backlit display
- Nonsmearing thermal transfer

Printers feature impact-resistant rubber bumpers for protection.

RHINO™ 4200

Features computer-style QWERTY keyboard. Hot keys option provides shortcuts for creating and formatting wire/cable wraps, flags, code 39 and 128 bar codes, fixed length, general, and breaker labels. Prints ¼", ⅜", ½", and ¾" wide labels in a variety of materials and colors. Favorites key gives you access to most frequently used labels, symbols, and terms. Kit adds AC adapter, lithium-ion battery, and case.

RHINO™ 5200

Handheld printer includes one ¾" black-on-white flexible nylon label cartridge. Runs on 6 AA batteries or lithium-ion battery (not included). Kit adds lithium ion rechargeable battery, one ⅜" black-on-white vinyl label cartridge, AC adapter, and carrying case.

DYMO Rhino Industrial Labeling Tools

DYMO XTL

Prints durable labels including continuous length tape, laminated wire/cable wraps, heat-shrink tubes, and presized labels. Preloaded templates ensure perfect formatting to save time. Lifelike onscreen print preview and color display shows exactly how labels will look when applied to cables, pipes, panels, and more. Built-in label applications make getting started from home screen easy, and touchscreen helps make label creation easier and faster. Designed with high-impact plastic. Thermal transfer. 300 dpi. Nos. 21HN24 (13 fonts) and 21HN26 (15 fonts) include quick reference guide and tape cartridge. Kits (13 fonts) include a carrying case.

3M POWER 1 FIRST

Vinyl Electrical Tape

Scotch Super 33+™—Premium-grade tape resists weather, abrasion, alkalis, acids, and corrosion. Passes UL's flame retardant test.

Power First® Premium—Conformable tape with high dielectric strength is ideal for electrical insulation on joints, cables, and splices in wires. Resists abrasions, corrosion, alkalis, and is flame retardant. UL Listed and CSA Certified.

Scotch Super 88—Resists cold temperatures, weather, moisture, alkalis, acids, and corrosion. Thicker tapes (greater than 7 mil thick) provide faster build up and better mechanical protection.

Scotch 35—9 fade-resistant colors for phase identification and general color coding.

Scotch 22—Thick design provides increased mechanical strength and abrasion resistance. Suitable for electrical and bus bar insulation and cable-jacket repair.

Power First® Value—Economical and flexible general-purpose tape offers protective jacketing, bundling, and harnessing. Suitable for use no more than 600V and 80°C (176°F).

Tartan 1710—General-purpose tape resists abrasion, moisture, alkalies, acid, and varying weather conditions including sunlight. Suitable for indoor and outdoor applications.

Highland™—Offers a flexible, stretchy, conformable, and commercial-grade vinyl tape. Suitable for protective jacketing, harnessing, and bundling.

Rubber Insulating and Splicing Tape

Scotch™ 130C—EPR-based splicing tape is for use as a primary electrical insulation for splicing all solid dielectric cables and for building stress cones on cables.

Scotch 23—Highly conformable splicing tape with high- and low-voltage insulating qualities. Innovative snakeskin liner is easily removed as tape is applied.

Temflex™ 2155—This conformable, self-fusing rubber electrical insulating tape is designed for low-voltage electrical insulating and moisture-sealing applications.

3M™ 2242—General purpose rubber insulating tape designed for splicing, jacketing, and general insulating.

Scotch 70—Designed as a protective overwrap for terminating high-voltage cables, and as primary cable insulation where Class H temperatures are encountered.

Scotch 2510/2520—A natural, rubber-based adhesive and effective insulating layer insulates bus bars, motor leads, and service drop connections when reentry is needed.

Scotch 77—Self-extinguishing tape safeguards cables by acting as a heat shield and flame barrier. Resist water, saltwater, acids, sewage, and ultraviolet light.

Sealing and Insulating Mastic Tape

3M

Scotch 2200—Self-fusing, rubber-based insulating compounds laminated to a flexible, all-weather grade vinyl (PVC) backing. Insulate, moisture seal, and pad connectors.

Scotch Vinyl Mastic—Seals out moisture and protects against corrosion without the need for heating tools.

Scotch 2228/2229—Conforms to irregular surfaces to insulate and seal in indoor and outdoor bus bar and splicing applications. High quality mastic laminated to rubber tape insulates, pads and seals cables and accessories. Features self-healing characteristics. Comes with an easy-release liner.

Scotch 6149—Protects against moisture. Designed with tough vinyl backing. Insulates moisture-seal and pad connections up to 600V.

Scotch Insulation Putty—Self-fusing putty in tape form. Smooths over irregular shapes and pads sharp edges.

Scotch 2234—Designed with a tough, abrasion- and chemical-resistant backing laminated to a moisture sealing mastic for jacket repair on inividual cable.

Heat-Shrink Tubing Kits

- 600V

3M™

Versatile assortments provide complete selection of popular sizes and colors of flexible polyolefin tubing. Kits include 7"W x 11"L x 2½"D translucent plastic box. UL Recognized (E-39100).

INSULTAB

Popular sizes of all-purpose, flexible, thin-wall PVC tubing in a sturdy, portable, transparent container. Kit No. 33VG96 is designed to meet the most stringent biocompatible and safety criteria. 100% factory double-tested for superior insulation integrity, reliability and safety. Features 3 types of USP Class VI high performance polymers with unique features for different applications, environments and sterilization options. Meets UL, CSA, and Military specs.

POWER FIRST®

Flexible polyolefin. UL 224.

Thin-Wall Heat Shrink Tubing

- Flexible, crossed-linked polyolefin tubing
- 600V
- UL 224

Tough tubing provides insulation and protection for electrical wiring. Bendable tubing conforms to irregular shapes. Used to help identify and color-code electrical connections and wire bundles. Offers superior abrasion and solvent resistance. Also, reliable as a lightweight wire harness, jacketing wire bundles, and component packaging. Delivers high-quality electrical, chemical, and physical properties for military and industrial applications.

Black Polyolefin

POWER 1 FIRST Raychem 3M Thomas&Betts

Adhesive-Lined Heat Shrink Tubing

- Black
- Flexible, crossed-linked polyolefin tubing
- 600V
- UL 224

Strong tubing has meltable inner wall of adhesive that helps protect against moisture and water. Flame-retardant jacket helps insulate and protect wires, splices, breakouts, components, and equipment in moisture environments. Pliable tubing can conform to irregular shapes. Offers superior abrasion, fluids, and solvent resistance. Delivers high-quality electrical, chemical, and physical properties. Also, reliable as a lightweight wire harness, jacketing wire bundles, and component packaging.

Heavy-Wall Heat Shrink

- 3:1 shrink ratio
- 600V
- -67° to 230°F

Flame-retardant, cross-linked, heavy-duty polyolefin tubing is highly chemical-, abrasion-, and split-resistant.

Specialty and Large-Diameter Heat-Shrink Tubing

- Flexible, crossed-linked tubing
- 2:1 shrink ratio

FOOD-GRADE

Meets the requirements of USFDA Reg. C.F.R. 177.1330 for contact with food and beverages. Acrylated olefin resists a variety of chemicals, oils, UV, moisture, and fungus.

MEDICAL-GRADE USP CLASS VI—ISO 10993-5

Acrylated olefin tubing has high dielectric strength and is supplied alcohol wiped and double-plastic bagged. Use for biocompatible insulation and jacketing of surgical instruments, components, and temporary implantation devices.

VITON®

Modified elastomer material can withstand high temperatures. Highly resistant to corrosive chemicals, fuels, lubricants, acids, and solvents. Superior cut-through, abrasion, and impact properties. Meets Military Specifications.

EXTRA-LARGE DIAMETER PVC

PVC is for indoor and outdoor applications to help insulate, protect, bundle, repair, and identify. 30% stronger than polyolefin and has a high dielectric and tensile strength. Highly flame retardant and offers superior abrasion and UV resistance. Resists many chemicals, oils, chlorine, moisture, salt water, and fungus. Meets UL, CSA, and Military Specifications.

MODIFIED POLYVINYLIDENE FLUORIDE

Flame retardant, thin-walled tubing offers high dielectric and mechanical strength. Resists temperature, industrial fuels, chemicals, and solvents. Semirigid and has outstanding abrasion resistance and cut-through properties.

Insulating Kits for Motor Connections and Mechanical Connectors

Kits insulate from moisture and provide physical protection for electrical connections.

Motor Lead—Make a uniform seal without torches or special tools. Pigtail kits make lugged motor lead connections to incoming feeder cables. Preformed, slip-on rubber boots and mastic sealing strips fit a wide range of cable sizes. Use copper 1-hole lugs only (not included). 90°C continuous use temperature rating.

Power Cable—Resin-encapsulated splice creates an extremely reliable seal. 90°C continuous use temperature rating.

Scotchcast™ MultiMold—Electrically insulates odd-sized and odd-shaped cable splices. Ready for service within 30 min. Allows use with split-bolt, H or C tap connectors. 90°C continuous use temperature rating.

BURNDY®

1- and 2-Hole Compression Lugs

- Rated for 600V to 35kV, 90°C applications

Lugs withstand a wide range of electrical and environmental conditions, including current surges, extreme temperatures, corrosion, and vibration. Designed to operate cooler than the wire on which they are insulated. Electro-tin plated for corrosion resistance. Aluminum terminals come prefilled with PENTROX™ oxide inhibitor compound.

Thomas&Betts

1- and 2-Hole Lugs

- Tin-plated
- For 600V to 35KV, 90°C applications

Designed and approved for aluminum and copper conductors. Order installation tools and dies on page 382. UL Listed and CSA Certified.

Aluminum—Constructed of high-conductivity wrought aluminum filled with a high-temperature oxide inhibitor compound.

Copper—Constructed of high-conductivity wrought copper.

IDEAL

Noalox® Antioxidant

Improves efficiency and service life of aluminum electrical applications. Provides additional inner-strand and inner-conductor current paths for improved conductivity. Suspended zinc particles penetrate and cut aluminum oxide. Reduces galling and seizing on aluminum conduit joints, promoting good ground continuity. Suitable for all pressure-type wire connectors.

Size	Mfr. Model	Item No.
8 oz.	30-030	6YH33

No. 3LP03

Thomas&Betts

Conductive Anticorrosion Surface Compounds

Kopr-Shield®—This antiseize and conductive compound is a blend of colloidal copper and inhibitors. It prevents oxidation corrosion by flowing between and around cable strands, greatly reducing intra-strand resistance. Rated for NEC applications up to 8KV and 90°C.

Aluma-Shield®—Contains fine zinc particles that break through oxide film on cable strands when connection is compressed; assures a low-resistance contact and seals out air and moisture. UL Listed only for use on electrical cables in cable connector assemblies, or on bus bars rated for NEC applications up to 8KV and 90°C.

Aluminum Compression Adapters

- Rated for 600V to 35kV, 90°C applications

Accommodate aluminum and copper wire conductor and electro-tin plated for bi-metallic corrosion resistance. These connectors come prefilled with PENTROX™ oxide inhibitor compound. EPDM or Santoprene rubber covers are packaged with each connector. Applications include mechanical connectors in molded case circuit breakers, panel board equipment, and meter sockets. UL Listed and CSA Certified.

POWER FIRST

Order installation tools and dies on page 382.

COPPER

- Tin-plated wrought copper
- For 600V applications

Easy-to-insulate connectors provide low-resistance, high-quality connection, and high pullout values.

ALUMINUM

- Tin-plated wrought aluminum
- For 600V, 90°C applications

Permit aluminum-to-copper and aluminum-to-aluminum splices. Feature aluminum and copper concentric conductors and compact code aluminum strandings.

Hydraulic Crimping Tools

No. 22P210—Features a specialized latch-style head with a generous working stroke for a wide variety of crimping applications. Provides 180° head rotation. Audible pressure valve indicates properly completed crimp. High-speed ram advance for faster crimps.

No. 22P221—Features die-less flip-top head that facilitates tool removal from continuous conductor runs and eliminates the need to purchase and maintain dies. Designed with audible pressure valve. Die embossment provides 360° inspectability. Handle trigger release with convenient ram. Advanced high-speed pump provides fast crimps, longer life, efficiency, and reliability.

BURNDY

Nos. 22P209, 22P161, 22P162—Dieless system requires only 1 crimp for each wire termination for both long and standard length barrels on HYLUG terminals and HYLINK splices. Rapid-advance pump for faster crimps. Pressure relief valve provides audible indication that crimp is complete. Handle trigger drain for convenient ram retraction. Comfort-grip handle.

No. 22P163—Makes connector installation and tool removal from line conductors of overhead lines easy. Lifting eye allows head to be lifted into working position. Easy die changing. Secure die alignments are provided with heavy-duty reinforced back. Mates with all universal hot-stick tooling.

Nos. 3LT12 and 3LT13

No. 3LT16

Thomas&Betts

Compression Connector Tools

Shure-Shake® mechanism ensures a properly completed crimp each time. Color-coded die wheel rotates into position for proper die nest. Works with Color-Keyed® and Blackburn®, featuring the color-keyed system connectors.

No. 3LT09

Description	Cap.	Mfr. Model	Item No.
Ratchet Crimpers			
Installs Copper and Aluminum Lugs	8 to 2 AWG Copper, 10 to 6 AWG Aluminum	TBM45S	**4XMR7**
Includes Dies 21 through 66	250 MCM to 8 AWG Copper, 10 to 4/0 AWG Aluminum	TBM5-S	**3LT12**
For Dies 21 through 76	8 AWG to 500 MCM Copper, 10 AWG to 350 MCM Aluminum	TBM6S	**3LT13**
Includes Dies 21 through 87	8 AWG to 500 KCMIL Copper, 10 AWG to 350 KCMIL Aluminum	TBM8S	**3LT16**
Hydraulic Crimping Tool			
14-Ton Manual Hydraulic Crimping Tool for Dies 21 through 94	Up to 900 MCM Copper, Up to 750 MCM Aluminum	TBM14M	**3LT09**
12-Ton Hydraulic Crimping Head, Dieless	—	TBM8-750	**3LT14**

C Taps

- **High-conductivity wrought copper**
- **For 600V applications**

Thomas&Betts

Heavy reinforcing ribs locate the compression dies and strengthen the compression joint. They assure positive, all-around compression with low resistance and high pullout values. Order installation tools and dies on this page. UL Listed.

Panduit		
For Use With UL Listed and CSA Certified Supra-Grip™ Disconnects	CT-1015	**1LEL4**
For Use With Panduit Nylon and Vinyl Insulated Terminals, Splices and Disconnects	CT-1550	**38YU61**
For Use With Panduit Insulated Terminals and Splices, Fully Insulated Disconnects, Insulated Parallel Splices and Crimps Panduit Barrel Insulated Disconnects	CT-1525	**38YU62**
For Use With Panduit Non-Insulated Terminals and Disconnects, Panduit Non-Insulated Splices and Compression Lugs	CT-1570	**38YU63**
For Use With Panduit Non-Insulated Tubular Terminals (S series), Copper Code Conductor Lugs and Splices, Copper Flex Conductor Lugs, Dual Rated Aluminum Lugs and Splices and CTAPF10-16 to CTAPF3-12 Copper Taps, Includes 5 - Position, Color Coded Rotating Die	CT-1700	**38YU64**
Sta-Kon		
For Use With A, B, C, Pt Non-Insulated Terminals and Splices, Includes Wire Cutter, Wire Stripper, Screw Cutter and Insulated Grips	WT111M	**3KH45**
For Use With A, B, C: AB, PT, RA,RB, RC Insulated and Non-Insulated Terminal and Splices, Includes Wire Cutter, Wire Stripper, Screw Cutter and Insulated Grips	WT2000	**3KH52**
For Use With Nylon and Vinyl, Type RA, RB, RC Insulated Terminals, Disconnects, and Splices, Includes Color-Coded Die Nests, Die Embossment, Terminal Locator	ERG4001	**4XMR5**

Type FTD

Pan-Term® Ferrules

PANDUIT®

Designed with seamless barrel to contain loose wire strands for superior terminations. These ferrules ease insertion of wire into terminal block, and are suitable for limited-space panel applications. Type FSD and FTD ferrules feature polypropylene insulation housing and funnel entry for faster insertion and lower installed cost. Meet DIN standards for wire containment. UL Listed.

Wing-Nut® Grounding

Grounding Wire Connectors

Easily holds in fingertips to form a secure grip when connecting wires for grounding or bonding. No pretwisting required. Fixed, square-wire spring threads itself creating secure connections. Contoured wing offers maximum torque. Deep skirt helps protect against flash-over. UL Listed and CSA Certified. No. 6HY42 meets UL 94V-2.

General Application Wire Connectors

Twist-on connectors provide fast installation, no pre-twisting required. Quick and easy way to match the right connector to the size of solid or stranded wire. Sturdy grip gives leverage for easy application by hand or with tool. Fixed, wire spring creates its own threads as it draws the conductors all the way into the connector preventing any disconnection. Shells are designed to withstand temperatures up to 221° F. UL Listed and CSA Certified.

Power Plug® Luminaire/Ballast Disconnects

- Max. operating temp.: 105°C (221°F)
- Max. voltage: 600V
- Meet Canadian Electrical Code 30-308(4) standards
- Meet National Electrical Code 410.73(G) standards for nonresidential fluorescent luminaries with ballasts

Push-in technology enables quick connections without the need for tools. Designed for new, retrofit, or OEM lighting installations. Provide safe disconnect of hot and neutral ballast wiring. 2-pc. design allows ballast replacement while minimizing the risk of shock; passes UL 2459 and CSA finger probe requirements. Nylon and copper alloy construction.

SpliceLine™ Inline Wire Connectors

Feature crimp-free, push-in design that installs in half the time of traditional butt splices. Perfect for lengthening a short wire in a box or for surface raceway wiring. Easily pass through ½" knockouts. Transparent polycarbonate window allows visual inspection of connection. Check port allows continuity testing.

In-Sure™ Push-In Wire Connectors

- Meet UL 467 for grounding and bonding applications
- Meet UL 94V-2 flame-retardant shell rated at 105°C (221°F)
- Max. voltage: 600V

Feature compact size making installations easy. No-twist connection reduces repetitive motion fatigue. Low insertion force allows fast and easy connections. Clear shell gives visual verification of connection. Accepts solid or stranded wire. UL Listed and CSA Certified.

No. 1A075

T-Taps
No. 22EW65

Butt Splice
No. 4FE28

Insulation Displacement Connectors

INLINE TAPS

Connectors electrically join a tap wire to a through-run wire. Self-stripping.

T-TAPS

Fully insulated connectors eliminate wire stripping. Connector mates with 0.250" male tabs, making a quick-connect wiring connection.

BUTT SPLICES

Squeeze-shut connectors eliminate stripping and twisting. Insulated connection is sealant-filled with a mineral oil-based grease and flame retardant, to provide a moisture-resistant seal.

DIRECT BURIAL SPLICE CONNECTOR KIT

Designed for splicing underground wire connectors and moisture-sealing 2 or more conductors for remote control circuits in irrigation and landscaping. Insulator tube is prefilled. Splice is reenterable. No crimping tools are required. Kit includes 2 tubes of sealant and 2 connectors. UL Listed for direct burial.

B-Connectors

DOLPHIN

"Funnel Entry Design" ensures high contact integrity for multiple metallic connections; locks in-place with permanent spring compression. High mechanical strength. Flame-retardant PVC insulation provides long, constant service in telecommunications and electrical power applications. UL Listed.

No. 4KEC8

Thomas&Betts

Motor Pigtail Connectors

- Tin-plated copper
- For 600V, 90°C applications

Quick-connectors provide fast, reliable electric motor changeout without bolting or taping. Snap-together assembly meets or exceeds the electrical and mechanical performance of bolted connections. Constructed with louvered contact bands. Equal body sizes can be mixed and matched. Reusable thermoplastic elastomer insulation boots keep assembly small for tight motor housings. UL Listed and CSA Certified.

POLARIS™ A BRAND OF nsi INDUSTRIES BURNDY® *Blackburn*®

Multitap Connectors

These connectors are suitable for connecting two or more wires, and feature removable access plugs, and are abrasion- and chemical-resistant. Insulated with specifically formulated high-strength dielectric and molded for precise fit. Suitable for use with aluminum and/or copper conductors.

**** Not CSA Certified. † Bronze alloy.***

★ GA GRAINGER APPROVED

High-Strength, Split-Bolt Connector

- High-strength corrosion-resistant bronze alloy
- Cooper pressure bar

Ideal for copper-to-copper connections. UL Listed and CSA Certified.

FERRAZ SHAWMUT IS NOW MERSEN

SQUARE D by Schneider Electric

Power Distribution Blocks

- Aluminum block, except where noted
- Accept aluminum or copper wire
- 600V appliance and industrial rating

These efficient blocks splice cables or split primary power into a wide range of secondary circuits and provide a fixed tap-off point. Save splicing and taping time for contractor rework. UL Recognized and CSA Certified.

Copper block, accepts copper conductors only.

No. 2DD09

No. 2DC71

No. 2DC60

No. 5B375

NEMA Terminal Blocks, Circuit Protectors, and Fuse Block

- Terminal block temp. range: -40° to 257°F (-40° to 125°C)
- Terminal and fuse block max. 600VAC

Box lug terminal blocks are suitable for use with stranded or solid copper wire. Hardware is recessed into the molding. Built-in wire strip gauge and marking area. Terminal and fuse blocks are rated UL 94 V-2 for flammability.

Mounting: All except Nos. 5B364 and 2DC71 have a snap-off arm on the terminal block.

No. 2DD09 includes banana test plug adapter.

LumaPro Cord Reels

These cord reels are used in general purpose applications and provide access and storage of extension cords while protecting the cord from wear, tangling, and kinking. The desired length of cord is pulled from the reel to reach equipment, and when power is no longer needed, the cord is wound back around the reel. Self-retracting cord reels automatically wind extended cord back on the reel, while hand-winding cord reels have a handle or knob for winding the cord manually. Lighted cord reels hold power cords with attached lamps to provide illumination in dark environments.

Coxreels Cord Reels

These cord reels are used in industrial and heavy industrial applications and hold extension cords that supply temporary power to devices located some distance away from an electrical outlet. Self-retracting cord reels have a spring mechanism that automatically winds the cord back on the reel. A stop, or ratchet, holds the cord at the desired length after it's pulled out for use. A quick tug on the cord disengages the stop, causing the spring to fully retract the cord. Hand-winding cord reels have a handle or knob that is turned by hand to wind the extension cord around the spool when not in use.

RETRACTABLE CORD REELS

Feature enclosed, factory-tuned cartridge style spring motor. 1-pc. ¼" steel base and mount for heavy-duty applications. Multiposition guide arm adjusts to wall, floor and ceiling mounts and lock ratchet secures cord at desired length.

CORD STORAGE REEL

Adjustable tension brake prevents free-wheeling during operation, transport, or storage. Steel construction with chip-resistant CPC™ powder-coated finish. No. 11K513 is welded steel "A" frame construction to strengthen the reel structure. Permanently lubricated self-aligning pillow block bearings. All internal electrical components under an access cover panel. No. 11K515 is designed with 1-pc. steel 10-ga. u-shaped frame.

HUBBELL®
Wiring Device-Kellems

Hubbell Cord Reel

This reel is used in heavy industrial applications and holds extension cords that supply temporary power to devices located at a distance from an electrical outlet. A stop holds the cord at the desired length after it's pulled out. A tug on the cord disengages the stop, causing the cord to fully retract.

INDOOR

Extra-sturdy, with positive latch mechanism and corrosion-resistant, powder-coated finish.

KH Industrial Cord Reels

These cord reels are typically used in heavy industrial applications. They have a spring mechanism that automatically winds the cord back on the reel. A stop, or ratchet, holds the cord at the desired length after it's pulled out for use. A quick tug on the cord disengages the stop, causing the spring to fully retract the cord. These reels provide access and storage of extension cords while protecting the cord from wear, tangling, and kinking.

RTB SERIES NEMA 2 FOR INDOOR USE, OR NEMA 4 FOR INDOOR/OUTDOOR USE

Plug-n-Play models include NEMA rated plug-on feeder end, and PowerTuff Electrical Outlet Box on payout. 3 or 4 conductors and cord lengths up to 50 ft. Slip ring is rated up to 600V/30A. Designed for single or 3-phase applications. UL Listed and CSA Certified. PowerTuff boxes comply with OSHA and NEC regulations.

RTF SERIES NEMA 4X CORROSION-RESISTANT FOR INDOOR/OUTDOOR USE

High-tension spring RTF reels are for single or 3-phase applications and have a larger hub and additional conductors. Constant tension models are often used for moving equipment such as cranes and transfer cars. 70 ft. cord length. 3 to 12 conductors available. Slip ring is rated up to 600V/35A. UL Listed and CSA Certified.

Outdoor Extension Cords

These cords have a durable jacket that resists abrasion and harsh weather conditions, making them more robust for outdoor applications than indoor extension cords. They provide power when the power source is located some distance away from the device, such as with landscaping equipment. They consist of flexible electrical cable with a plug at one end and one or more receptacles at the other end.

Indoor Extension Cords

These cords are often used in shorter lengths (less than 25 ft.) than outdoor extension cords to accommodate indoor applications. They have a lightweight jacket that is not suitable for wide temperature ranges and therefore should not be used outdoors. They consist of flexible electrical cable with a plug at one end and one or more receptacles at the other end.

Extension Cord Adapters

These adapters create compatibility between a device's power cord plug and a power outlet receptacle when they are of different types. They have a plug at one end that connects to the power source and a receptacle at the other end that the device plugs into. They are typically used to supply power to devices in industrial applications, such as power tools and machinery, where a variety of plug types and outlets are common. The current should be limited to the adapter's lowest rating to help prevent overheating.

Flexiduct Extension Cords

These extension cords consist of flexible electrical cable with an integrated lay-flat cord. They are typically used in high-traffic areas to help minimize tripping hazards and reduce wear to the cord. They have a plug at one end that connects to the power source and a metal outlet box with two receptacles at the other end that devices plug into. They are ideal for use in office and commercial settings where there is heavy foot traffic, such as lobbies, hotels and conventions, and trade shows.

Indoor Power Supply Cords

These cords are portable lengths of electrical cable used to connect devices and appliances to a power source in indoor applications. They are typically used on equipment that doesn't come with a power cord, such as dryers, ranges, and computer monitors. They have a molded plug at one end that connects to an electrical outlet and a socket or bare wire at the other end that is attached or wired to the device. The power cord should match the amperage rating of the device and plug configuration of the outlet.

Southwire FRIGIDAIRE

Power Supply Cords With Right Angle Plugs

These cords have a right angle plug at one end and a bare wire at the other, so they can be used in tight spaces to connect devices that don't come with a power cord to a power source.

Sensing-Saf-Starts®

These cords are fitted with a safety device that prevents machines or equipment from accidentally restarting in the event of a power interruption. They are ideal for supplying power to tools with single-phase motors, such as table saws, drill presses, or other heavy equipment. They have a molded plug at one end that connects to an electrical outlet and a socket or bare wire at the other end that is attached or wired to the device.

Cord Length	Wire Size	Connec. Type	Max. Amps	Trade Designation	Jacket Material	Brand	Item No.

Plug-In and Line Cord GFCIs

These GFCIs are used with power cords to help protect users from ground faults. They have an integrated circuit breaker that turns off the power when a current overload is detected, helping protect users from electrical burns, shock, or electrocution. They are commonly used in temporary power applications to provide protection where electrical circuits may come in contact with water, such as in garages or outdoors, and a standard GFCI receptacle is not available. Plug-in GFCIs plug directly into a wall outlet and have one or more receptacles that devices plug into. Inline GFCIs are lengths of cord with an outlet plug at one end and one or more receptacles at the other end that devices plug into.

Manual Reset Type—These GFCIs require the user to reset it after a power outage by pushing the reset button to restore power to the connected equipment. They are typically used in industrial or construction applications where a sudden resumption in power could be dangerous if equipment starts back up unexpectedly, such as power drills, saws, and grinders.

Automatic Reset Type—These GFCIs automatically reset after a power interruption to immediately restart the connected device as soon as the power supply is restored. They're typically used with equipment intended for continuous use where a temporary power failure is likely and undesirable, such as pumps, pressure washers, portable signs or lighting, and engine heaters.

Hardwired 30A GFCIs

These GFCIs are hardwired to machinery or distribution boards. When a current overload is detected, it will trip a circuit breaker to stop the power and protect users from burns, shock, or electrocution. They're typically used in permanent power applications where electrical circuits may come in contact with moisture. UL Listed and CSA Certified.

Outlet Strips

These are lengths of flexible cable with a block of electrical sockets that supply power to multiple devices at the same time from one power outlet. They're typically used to provide additional outlets in areas that don't have enough wall receptacles for the number of devices. They are portable and can be unplugged and moved to another location as needed. Outlet strips are ideal for homes, offices, medical facilities, and industrial environments where power distribution to several electrical devices is a priority. The outlet strip should match the total amperage draw of the connected devices to help prevent circuit overload.

Outlet Strips With Surge Protection

These outlet strips protect connected devices from damage due to unexpected voltage increases. They have a surge protector that absorbs the excess voltage and diverts it to the ground wire, preventing it from reaching the connected equipment. A surge protector's joule rating determines how much energy it can absorb before it fails. A higher number indicates greater protection. These outlet strips are typically used to provide additional outlets in areas that don't have enough wall receptacles for the number of devices. They are portable and can be unplugged and moved to another location as needed. They are suitable for homes, offices, medical facilities, and industrial environments where protection from power spikes is needed.

Note: For product Standards and Specifications, search for the individual sku number on Grainger.com® and see Technical Specs.

Sidewinder Cable Protectors

Designed to help protect cords and cables and avoid tripping hazards. Articulates left and right to turn corners and adapt to the layout of rooms while maintaining full protection for the cables. Flexible and maintains a flat profile. Modular design and segmented construction; just slide and click to connect additional segments with no tools needed. ABS plastic construction is lightweight yet allows vehicles to safely drive over cords, hoses, and cables.

LINEBACKER CABLE MANAGEMENT · FASTLANE CABLE PROTECTORS · GUARDDOG Watches for People Who Work

Drop-Over and Split-Top Cable Protectors

- Modular design

T shaped protectors offer a quick solution to shield minimal runs of cable and hose lines. Protect cables and hoses up to 2.25" in outside diameter. Feature patented T-connectors to extend to any length. Provide solutions for heavy-duty, high-load bearing operations as well as other general purpose applications.

L shaped protectors shield cables and hoses up to 1" O.D. Designed with durable polyurethane and feature heavy-duty, patented L-Connectors to extend to any length. Also designed with patented 5-bar plate surface that provides maximum traction for carts and pedestrian traffic. Low-profile design is compact, easy to setup, disassemble and store, and fit multiple cable sizes.

Dog Bone Protectors are lightweight and easy to transport, set-up, disassemble, and store. Feature all-weather polyurethane construction and a hinged lid for easy cable placement.

Gripper Style Cable Protectors

Connectors lock multiple cable protectors tightly together to provide a safe crossing for vehicle and pedestrian traffic, and protect valuable electrical cables and hose lines. They feature a modular, interlocking design that is ideal for use in most public entertainment venues, light commercial, and utility applications. Constructed of maintenance free polyurethane, and ergonomically designed to fit your hand for easy handling and transport. When compared to other rubber manufactured cable protectors, 3-Channel No. 32RX19 is up to 50% lighter without compromising the required strength and durability, and protects cables and hoses 2.25" in dia. 5-Channel No. 32RX20 is up to 75% lighter without compromising the required strength and durability, and protects hoses and cables 1.25" in dia.

T Shape Style Cable Protectors

Designed with hinged lid that provides a safe crossing for vehicles and pedestrian traffic. Protects cables and hose lines from damage. Modular, interlocking design is ideal for use in oil and gas applications, mining, military, and other industrial environments with heavy trucks and forklifts. No. 32RX24 protects cables and hoses up to 3.25" in dia; No. 32RX25 protects cables and hoses up to 2.25" in dia; and No. 32RX29 protects hoses and cables up to 1.3" in dia.

CableTrak™ Hose and Cable Carrier System

- Easy assembly with flat-blade screwdriver
- Install vertically or horizontally
- Fiberglass-reinforced, nonabrasive black nylon

Flexible, self-lubricating carriers guide and protect hoses and cables installed between fixed and moving sections of a machine. Cable is installed through the carrier's flip-top for minimal abrasion. Excellent high-speed performance.

Braided Sleeving for Wire and Cable Management

TECHFLEX Braided Sleeving Products

- UL Recognized

For bundling, managing, and protecting wires, cables, and hoses. Most are black (Flexo Flame-Retardant has white tracer). ThermaShield are silver and FireFlex are red. Most types cut cleanly with a hot knife. Flexo F6 Self-Wrap, DuraFlex, ThermaShield tubes and wrap, and Flexo Clean-Cut cut easily with scissors or knife. Insultherm cuts with scissors only.

DURAFLEX HARSH ENVIRONMENT

- Thick, tightly woven nylon
- Resists UV, chemicals, gasoline, salt, snags, cuts, abrasion, and penetration
- Deflects high-pressure hose ruptures
- MSHA

Rot resistant for continuous outdoor use.

WELD WRAP

- Coated fiberglass
- Withstands temps. to 1000°F
- Resists abrasion and punctures
- FED 191/5093

Protects hoses and wiring from molten welding splatter and sparks.

THERMASHIELD REFLECTIVE

- Withstands temps. to 500°F
- Resists gasoline, engine chemicals, cuts, and abrasion

Aluminized heat shield is bonded to tightly braided, insulating fiberglass. Wrap uses a high-temp. adhesive.

DURAWRAP HARSH ENVIRONMENT

- Tightly woven ballistic nylon
- Hook-and-loop closure
- Resists UV, abrasion, gasoline, engine chemicals, and salt water
- Deflects high-pressure hose ruptures

Overlarge sleeving can be used over chain as a scuff preventive.

FIREFLEX HIGH-TEMPERATURE

- Silicone-jacketed fiberglass
- Nonconductive
- Stable to 500°F
- Resists abrasion and punctures

0.08"-thick sleeving bends to follow tight curves. For racing vehicles and similarly demanding industries.

GORILLA SLEEVE

- Flat-filament nylon
- Resists UV, gasoline, engine chemicals, and salt water

0.046" thick for extreme abrasion and cut resistance.

Pan-Wrap™
No. 1LEY8

PANDUIT

Wire Protection Wrap

SPIRAL WRAP

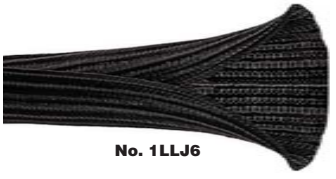
- Natural color
- Temp. range: -40° to 122°F

Allows breakouts of single/ multiple wires. Great for harnessing multiple cables into a single manageable bundle. Each roll includes installation tool. UL Recognized.

PAN-WRAP™

- Black color
- Temp. range: -40° to 122°F

Slot pattern provides improved flexibility and abrasion protection in any application. Wall design facilitates cable breakouts. UL Recognized.



Pan-Wrap™ Installation Tools

- Black color
- Temp. range: -40° to 122°F

180° opening allows easy loading of max. bundle diameters to considerably speed Pan-Wrap™ installation.

Ty-Rap® PANDUIT®

Nylon Cable Ties with Stainless Steel Lock

T&B TY-RAP®

- Indoor natural-color ties are plenum rated
- Corrosion-resistant

316 stainless steel locking device in 6/6 nylon head maintains the right tension. Smooth, low-profile, no-notch body design is less stress-sensitive than notched ties, and infinitely adjustable. No-slip tail allows easier grasping for secure tensioning. Ribbed and stippled inner body keeps ties from slipping on the bundle. Black, weather-resistant, outdoor ties withstand temperatures ranging from -40° to 185°F, except Nos. 1PLA7 and 1PLA8 withstand -40° to 221°F. UL Listed.

PANDUIT DOME-TOP® BARB TY

Nylon ties with stainless steel locking barb secure wires and cables. Curved tip speeds initial threading. Temperature range: -76° to 185°F.

Stainless Steel Cable Ties

Ty-Rap® PANDUIT®

TY-RAP® MULTI-LOK 316 STAINLESS STEEL

Ties feature a multiple-locking system that holds in excess of 200 lb. Outdoor versions are halogen-free, nylon 11-coated making ties weather resistant and unaffected by UV sunlight.

TY-RAP® 304 STAINLESS STEEL

Strong, low-profile, single-wrap ties feature a dual-lock design. For harsh environments such as boiler rooms, chemical plants, refineries, and pulp and paper mills. Fireproof and UV-resistant.

PANDUIT PAN-STEEL®

Metal self-locking ties are for applications that need strength, long life, and resistance to chemicals, vibration, radiation, weathering, and extreme temperatures (-112° to 1000°F). Ties lock into place at any length along tie body. Smooth surfaces and rounded edges. For indoor, outdoor, and direct burial applications.

Panduit MRT and MRS Series

Retained-tension ties for mechanical application of rigid materials. MRT Series tightly bundle armored cables, pipes, conduit and other rigid materials. MRS Series have 360° radial seal to eliminate gaps and provide a sealed installation.

Specialty Cable Ties

Ty-Rap® PANDUIT®

TY-RAP DETECTABLE

Nonmetallic ties incorporate a unique compound for detection by metal detectors and x-ray equipment, necessary to avoid contamination in food-processing areas. They provide the advantages of Ty-Rap®, including no-notch body and infinite adjustment, without the expense of stainless steel. Colored bright blue for visibility and withstanding temperatures ranging from -40° to 185°F. UL 94V-2.

PANDUIT METAL DETECTABLE

These ties feature metal-impregnated material that make them identifiable to metal detectors. Curved, tapered tip provides easy pickup from flat surfaces and allows faster threading speed. Unique blue color allows visual identification of tie on conveyor belts. Smooth, round edges make them perfect for fastening cables and hoses in processing and packaging areas.

PANDUIT HIGH-TEMP. PEEK (POLYETHERETHERKETONE)

Harsh-environment tie holds up to chemical or radiation exposure and temperatures from -76°F to 500°F. Used for strain relief for leads on electric pump stators, and for wire management with instrumentation tools in the oil- and gas-drilling industries. 1-pc. tie has a low threading force and high-strength, nonconductive material.

PANDUIT HIGH-TEMP. TEFZEL® EFTE FLUOROPOLYMER

Ties resist chemical attack, gamma and ultraviolet radiation, and extreme temperatures (-76° to 338°F). Used to fasten wires in nuclear power facilities and chemical processing plants, indoors or outdoors. Tefzel pawl design has a low threading force.

Hook-and-Loop-Style Cable Ties

Adjustable, releasable, and reusable hook-and-loop ties are great for applications requiring frequent moves, adds, or changes. Hook-and-loop fasteners protect against overtensioning.

Note: Min. 2" overlap is required to achieve loop tensile rating.

Buckle-Style Hook-and-Loop Cable Ties

PANDUIT® Ty-Rap®

Hooks and loops are on the same side for a greater range of bundle dia. Temperature range: 0° to 140°F. Contoured cinch ring is low-profile, provides extra strength and bundle tightness, and reduces overall bundle size. Grommet styles add strength and pullout resistance; excellent for cabinet applications.

Note: See Grainger.com® for additional color options.

HUBBELL® Wiring Device-Kellems

Temporary Power Systems

- For indoor and outdoor use

Hubbell's Spider® Box meets NEC requirements for personal protection against electrical shock on job sites and is listed at the latest UL 1640 standard for portable power distribution equipment. Provide temporary power access for 20A and 30A straight-blade or Twist-Lock® devices in a metal NEMA 3R raintight enclosure. Compact and easy to store. UL Listed; No. 1DNU8 is also CSA Certified.

50A-input models are for use with Twist-Lock® connector No. 3D322; see page 338.

FIXED, DIE-CAST ALUMINUM
Specification-grade contactors feature heavy-duty housing and base; gasketed for max. weather protection. For parking lot and building perimeter lighting and controlling outdoor signage lighting.

LEXAN®
Material screens out ultraviolet rays for long service life.

Fixed- and Swivel-Mount—
Impact- and vandal-resistant. Ultrasonically welded for max. strength. For flood and patio lamps and decorative lighting.

Flush-Mount—Mount in a weatherproof junction box for post lanterns and lighting fixtures. No. 4JNR2 includes single gang cover plate and gasket.

TURN-LOCK
Heavy-duty enclosures use high-impact UV-stabilized polypropylene materials for long service life. Color coded for voltage designation. Positive snap-action relays reduce bounce and prolong contact life.

Astronomical Lighting Controls

INTERMATIC

- Backup maintains program and time
- Steel enclosures and polycarbonate where noted have lock hasp

Timers automatically adjust daily for changing sunrise and sunset times, eliminating the need for separate photocontrol devices.

ET8000 SERIES

- Enclosures have ½" to ¾" knockouts (1 on the back and each side, 2 on bottom)
- Operating temp. range: -40° to 155°F

Automatically switch loads according to the preset weekly schedule with to-the-minute accuracy. Manual override. Automatic sunrise and sunset settings allow flexibility for applications where load switching differs each day of the week. CSA Certified. UL Listed.

ET90000 SERIES

- Operating temp. range: -40° to 120°F

Permits up to 4000 scheduled On/Off operations; turns On/Off at sunrise or sunset without a photo control device. Provide to-the-second accuracy. Ethernet port allows remote programming via PC; standard on all timers with 4 or more channels and on 1- or 2-channel timer models Nos. 13D101, 13D103, 13D105, and 13D107. Copies programming to other time switches for backup purposes via USB cable. Built-in supercapacitor maintains program during power outages. CSA Certified. UL Listed.

Surface/DIN Rail or Flush Mount Time Switches

INTERMATIC

- 21A SPDT contacts
- Captive trippers
- True clock face
- Clear plastic dust cover

These switches are designed to be mounted inside a control panel and can accommodate surface/DIN Rail or flush/panel mounting. Ideal for single-phase applications like lighting control, HVACR, pumps, motors, fan controls, access controls, OEM applications, agricultural facilities, and general purpose electrical circuits.

INTERMATIC®

24-Hour and 7-Day Electromechanical Timers

- Heavy-duty clutchless gears prevent slipping
- Contacts are tungsten-rated to handle inrush currents 10 times their rating

Enclosures feature lock hasp and knockouts. Snap-out timing mechanism with manual On/Off override does not interfere with program. Day skipper adds the flexibility of omitting any day or days from the program. Self-lubricating, synchronous motors. Outdoor enclosures are rated NEMA 3R.

Note: Timers include trippers. Extra trippers are available on this page.

1-Pole Steel Indoor No. 2E021

2-Pole Steel Outdoor No. 2E259

2-Pole Plastic Outdoor No. 4E025

Multioperation 1-Pole Steel Indoor No. 2E026

MULTIOPERATION

- Operating temp. range: -40° to 130°F

Provide up to 48 On/Off settings per day with 96 permanently fixed trippers.

7-DAY

Allow precise time-of-day scheduling with 7-day dial. Timers allow different settings for each day of the week.

Cycle Timers

TORK®

60 captive tabs per dial provides up to 30 On/Off cycles.

PERCENTAGE CYCLE TIMERS

Tork®—Can alternately cycle 2 different loads. 2 control knobs set cycle repeat time and percentage operating time. Each knob has Hold setting for manual On/Off. Sealed for use in severe environments. UL Listed and CSA Certified.
- More than 900 jumperless cycle variations
- LED load status indicators

Intermatic®—Can be wired in series with a manual switch or time switch for time-of-day cycling applications. CSA Certified.
- 8 selectable total cycle durations: 30 sec.; 1, 3, 5, 10, 30 min.; and 1, 4 hr.
- Cycling pattern selectable from 3% to 97% of total cycle

Contractor Select™ Low Profile

Indura® Series

Indura Series, NEMA 4X

Quantum Series

Titan® Series

Wall/Ceiling-Mount Series

Wet Location Series

Emergency Lighting Units

- Provide 90 min. illumination upon loss of AC power

CONTRACTOR SELECT™ LOW-PROFILE

Lights are designed with small, unobtrusive dual-heads, making these units ideal for wall- or ceiling-mounting in small spaces at lower mounting heights. Features a test switch and status indicator. Approved for use in damp locations. No. 487V39 has additional battery capacity to power 1-watt of remote lamp load for 90 min.

INDURA® SERIES

Vertical design minimizes pole- or column-mount overhang; also suitable for wall, I-beam, unistrut, or ceiling and pendant mounting. Quick-Beam™ installation with steel mounting bracket. Thermal protection and compensation prevent overheating and charger failure.

Indura® Series NEMA 4X—Harsh-environment fixtures have a sealed housing with silicon gasket to withstand rain, sleet, snow, splashing, hose-directed water, and windblown dust.

QUANTUM SERIES

Corrosionproof, UV-stable housing is impact- and scratch-resistant. Removable knockouts and universal J-box pattern on back panel, and flexible conduit entry points on top, help simplify installation. Wall- or ceiling-mount. Multichromatic LED indicator displays charging, test activation, and diagnostic status.

TITAN® SERIES

Feature a test switch and ready/charge light for monitoring system operation.

WALL/CEILING-MOUNT SERIES

Installed square unit has a clean, finished appearance. Surface mounting, J-box mounting pattern. Push-to-test lens conceals test switch and ready light.

WET LOCATION SERIES

Compact, low-profile housing is made from engineering-grade UV-stable thermoplastic that is impact-resistant, scratch-resistant and corrosionproof. A full-perimeter gasket seal between front and rear housing helps seal out moisture. Wall-mount with external mounting tabs for easy installation, while two 7/8" knockouts on each side permit flexible conduit entry only. UL Listed for Wet Locations.

Emergency Light Remote Heads

LITHONIA LIGHTING

Use with compatible battery equipment (sold separately) as part of a full emergency lighting system, to provide brownout protection and light for paths of egress.

Emergency Lighting Drivers

LITHONIA LIGHTING PHILIPS bodine

- Provide at least 90 min. emergency lighting
- 120/277VAC input

No. 460J99

No. 454R53

No. 454R56

Power Sentry®—Compact, low-profile ballasts are compatible with a variety of LED fixtures, including troffers, volumetric recessed, industrial, commercial and strip. With integrated self-diagnostics to help prevent failure. Can be installed at the factory or in the field. UL Listed. Meet UL 924, NFPA 101, NEC, and OSHA illumination standards. CA Title 20 compliant.

- Temp. range: 41° to 122°F

Bodine—Smart charger technology monitors output to help ensure low energy consumption; switches to emergency mode to provide power when AC power fails. Designed with a high-temperature nickel-cadmium battery, charger, and electronic circuitry in one case. UL Listed. RoHS Compliant.

- Temp. range: 32°F to 131°F; except No. 454R56 is 32° to 122°F

Fluorescent Backup Lighting Systems

FULHAM LITHONIA LIGHTING PHILIPS bodine

- Provide at least 90 min. emergency lighting
- 120/277VAC input
- High-temperature nickel-cadmium batteries (except No. 12X237)

Ballast Battery Packs, Ballasts, and Generator Transfer Device allow existing fluorescent lighting to provide emergency lighting upon loss of normal power.

FULHAM® FIREHORSE™

- Temp. range: 32° to 131°F
- Recharge time: 24 hr.

Low-profile ballasts can be mounted in the factory or in the field and are compatible a variety of switched and unswitched fluorescent lamps. Also work with TLEDs; check lamp manufacturer specifications for compatibility. Include LED push-button indicator.

LITHONIA LIGHTING®

Ballast Battery Packs—Compatible with electronic, magnetic, instant-start, rapid-start, and slimline ballasts. Work with switched or unswitched fluorescent fixtures and compact fluorescent downlights. Include pilot light and test switches. Quick Disconnect system allows for easy installation and maintenance.

- Temp. range: 32° to 100°F

PHILIPS BODINE

UL LISTED.

No. 12X237, Generator Transfer Device—Device switches the lighting load to a generator-fed circuit in response to a power loss. Connected fixture illuminates regardless of light switch position.

Emergency Ballasts—Work in conjunction with an AC ballast to convert new or existing fluorescent fixtures into emergency lighting. No. 34E653 is self-testing.

- Temp. range: 32° to 122°F
- Recharge time: 24 hr.

HUBBELL® COMPASS DUAL LITE

LED Exit Signs

- 120/277VAC
- 6"H letters with ¾" stroke
- Universal mounting (wall/ceiling/end), except Nos. 32WU20 and 32WU22 are flush-mount
- Snap-in chevrons for direction choice

Thermoplastic housings are impact- and scratch-resistant, corrosionproof, and UV-stabilized. Snap-together design and push-in wire connectors simplify installation.

Signs with battery backup provide 90 min. emergency illumination and have LED status indicator and test button.

Contractor Select Exit/ Light Combo
No. 16U220

Titan® Exit/ Light Combo
No. 2XLF9

CONTRACTOR SELECT SERIES

3-sided housing has snap-fit components for easy installation. Push-button test. No. 13M596 features high-efficiency LED lamp heads and LED indicators. Nos. 16U220 and 16U221 feature a swiveling emergency light bar and rechargeable battery.

QUANTUM® SERIES

Impact-, scratch-, and corrosion-resistant housing snaps together with no additional fasteners; UV-stabilized to resist discoloration.

Self-Diagnostic*

Automatically run charging, battery condition, and AC-to-DC transfer tests for 5 min. every 30 days, and for 30 min. every 6 mo. Continuously monitor AC functionality. Additional features include low-voltage disconnect and brownout protection. With 2-state constant-current charger, multichromatic, multifunction status indicator, and interchangeable faceplate and back cover. LEDs operate in normal (AC) and emergency (DC) modes.

SIGNATURE® SERIES

Provide uniform illumination. Hinged faceplate and spring latches provide easy lamp access.

Self-Diagnostic*

Automatically run tests for 5 min. every 30 days, and for 30 min. every 6 mo.; manual test switch activates 30-sec. diagnostic testing. With multichromatic, multifunction status indicator and interchangeable faceplate and back cover. Single-point microcomputer controls all electronic features. Low-voltage disconnect (LVD) prevents excessive discharge that can permanently damage the battery.

TITAN® SERIES

Heavy-gauge, die-formed housing with impact-resistant color panels is well-suited to general industrial environments. Fully assembled 1-face exit includes an extra faceplate for easy conversion to 2-face.

LED Exit Signs

- 120/277V
- 6" H letters
- Provide at least 90 min. emergency lighting
- Universal mounting

Maintenance-free LED lights are energy-efficient with up to a 10-year expectancy, helping reduce costs. Nos. 35GK18, 35GK20, 35GK22, and 35GK23 have multifunction capabilities and provide LED performance on both sign and lights. Meet UL 924.

LED Edge-Lit Exit Signs

- 120/277V
- 6"H letters; New York Approved have 8"H letters with 1" stroke

LEDs operate in normal (AC) and emergency (DC) modes. Conveniently located test switch and status indicator. Extruded brushed-aluminum or aluminum/acrylic lamp housing.

Nos. 2YGL2, 2YGL3, 46T227, 46T228, and 2YGL5 have a mirrored background.

Great for architectural applications where aesthetics are important, including schools, hospitals, retirement facilities, offices, restaurants, theaters, hotels, and retail spaces.

No. 46T229

No. 454Y90

LED Vandal-Resistant Wet Location Exit Signs

- 120/277V
- 6"H letters

Housings are made to withstand high-abuse environments. Thermoplastic faceplate incorporates universal directional chevron knockouts that are concealed, yet easily removed and replaced. Clear, UV-stable cover is secured with 4 Torx® T20 tamperproof screws with center pin. Tough enough for prisons, parking garages, schools, and commercial buildings.

HUBBELL

- Universal mounting

Severe-condition, cast aluminum housing is vandal-resistant. For indoor/outdoor wet locations.

LITHONIA LIGHTING®

- Universal mounting, except Nos. 4PH56 and 4PH57 are back-mounted

Nos. 4PH56 and 5YB73 have a vandal-resistant magnetic test switch that maintains the integrity of the housing, while providing a simple means of manual testing. Not for use in temperatures below freezing, except Nos. 46C212 to 46C217 are for cold temperatures.

Self-Luminous Exit Signs

isolite

- No electricity or batteries required
- 6"H letters with ¾" stroke
- Universal mounting hardware included
- Vandal-resistant signs must be surface mounted
- Directional chevrons

Maintenance-free signs have no lamps or batteries to replace and do not require a light source. Phosphor-coated, tritium-filled glass tubes provide worry-free emergency lighting. Vibrationproof, spark-free, and unaffected by extreme temperatures. Great for damp, wet, and explosive-atmosphere environments.

Vandal-Resistant Signs Nos. 2TUG5, 2VDE8, 2TUG6, and 2VDE9 have cast aluminum frame with ⅜" unbreakable polycarbonate face. Designed for high-abuse and high-traffic applications. UL Listed. Meet UL 924 and NFPA 101 standard.

LED Exit Sign Retrofit Kits, Chicago/New York City-Approved

RADIONIC HI-TECH, INC.

- Replace existing fluorescent and incandescent exit sign lamps in edge-lit and box-style exit signs
- Meets both City of Chicago and New York City Standards
- 5-yr. warranty

Long-lasting LEDs use only 4.5W of power and are eligible for utility rebates. They help reduce labor and replacement bulb costs, with a 12 to 18 month typical payback. Install easily in about 8 min. Internal Driver model is 1"H; External Driver model is ⅜"H for signs with a small lip. UL 924 approved for most exit signs.

LED Tape and Rope Lights

★ LumaPro

- 120V
- Rated avg. life: 35,000 hr.

Low-profile flexible accent lighting uses 80% to 90% less energy compared to incandescents. Excellent for general indirect illumination, as well as in under-cabinet, cove lighting, and entertainment center applications. Dimmable.

TAPE LIGHTS

1-sided lights have an adhesive backing. Conform to and stick to most surfaces, even uneven surfaces.

ROPE LIGHTS

- Outdoor rated

Include installation clips and screws. 150-ft. lights also include additional power connectors for field cutting.

JUNO
Recessed and Trac Lighting

LED Downlights and Trim

- Rated avg. life: 50,000 hr.
- 90 CRI
- Dimmable

Provide significant energy cost savings and high-quality light when installed as direct replacements for incandescent and CFL downlights. With IC-rated insulation and J-box connectability. UL and C-UL Listed.

Recessed Lighting LED Retrofit Kits

Can be installed as direct replacements for existing incandescent, spiral CFL, and halogen recessed cans to provide significant energy cost savings.

GE Lighting—Include pigtail base attachment. UL and C-UL Listed, suitable for damp locations.

Juno®—Include LED light engine, baffle/trim, socket adapter, and quick connectors. All are UL and C-UL Listed.

LumaPro®—Suitable for damp locations.

LED Track Heads

PHILIPS LIGHTOLIER

- Dimming: Trailing edge (ELV)
- ENERGY STAR® Rated

Precision optics, interchangeable reflectors, and precise beam patterns help you use light to bring out the best qualities in your merchandise, displays, and more.

CorePro LED—Get CBCP performance equivalent to that of most 50 W MR16 halogen luminaires, while consuming 82 % less energy. Units feature a completely integrated driver, thermal management, and unitized optics. The sleek aesthetics and uniform beam help make it an easy choice for a variety of retail, residential, and hospitality accent lighting applications.

Alcyon LED—Compatible with all Monopoint, Multipoint, recessed track, suspension track, suspension stems, and sloped ceiling adapters, as well as Basic, Advent and Radius track systems. Ceiling and horizontal or vertical wall mounted

LED Flat Panel Fixtures

▪ Integral LED driver

Edge-lit panels provide soft, glare-free lighting that is ideal in a variety of public spaces, including retail, schools, and offices. Designed to fit easily into drop ceilings.

GE LIGHTING®

Lumination™ fixtures give off minimal glare, to help enhance productivity. 5-yr. warranty.

Lumination™ LET—Ultrathin fixtures blend in with the ceiling pattern, making them an excellent choice for public spaces. Designed to fit in narrow ceiling plenums. Compliant with the materials restriction requirements of RoHS.

HUBBELL

Fixtures can be recessed, surface, or cable mounted and are suitable for use in damp locations.

LITHONIA

Fixtures have integral T-bar clips that allow installation into 5/16" T-grid ceilings, and a low profile for flexibility in restricted plenum spaces.

LUMAPRO®

Fixtures are compatible with building controls, motion sensors, timers, and daylight harvesting systems.

PHILIPS DAY-BRITE

Designed to provide smooth lighting gradient on the lens surface and ease of installation. Ideal for general lighting applications such as open office, schools, healthcare, and retail.

PILA

Provides a uniformly lit lens for a clean aesthetic appeal, and even distribution of light to the space to minimize the number of light points needed.

LED Troffer Retrofit Kits

GE—Upgrade your existing linear fluorescent fixtures to high-efficiency LED and reduce both energy usage and maintenance costs. Drivers and internal components can be easily accessed via a drop down door. Suitable for general lighting applications in dry environments
- **Rated life: 50,000 hr.**
- **Ambient temp. range: 0° to 104°F**
- **LED 0-10V dimming**

Hubbell—GORK Series Retrofit Kits provide a low-cost LED retrofit for 2-ft. x 2-ft. or 2-ft. x 4-ft. prismatic fluorescent troffers, and can be installed in just 5 minutes. Kit includes pre-wired LED boards and driver.
- **Rated life: 60,000 hr.**
- **Ambient temp. range: -20° to 25°C**
- **LED 0 to 10V dimming**

Lithonia Lighting—Series relights renovate installed recessed fluorescent systems to improve energy efficiency. An impact-modified clear acrylic diffuser provides shielding and wide light distribution. Suitable for damp location installations. UL and C-UL Classified for use in recessed fluorescent light fixtures.
- **Rated life: 50,000 hr.**
- **Ambient temp. range: 0° to 104°F**
- **LED 0-10V dimming**

LumaPro®—For use with existing recessed troffer fixtures. Kits include light engine with heat sink, driver, and mounting hardware.
- **Rated life: 50,000 hr.**
- **Ambient temp. range: -14° to 120°F**

Philips EvoKit—Designed to replace any 2-ft. x 2-ft. or 2-ft. x 4-ft. fluorescent configuration providing the appearance of a new fixture with the energy saving performance of LED. Dimmable volumetric-type troffer enables compliance with ASHRAE and T24.
- **Rated life: 70,000 hr.**
- **Ambient temp. range: 0° to 95°F**
- **LED 0 to 10V dimming**

GE current, a Daintree company | HUBBELL® | JUNO Recessed and Trac Lighting

LED Recessed Troffers

No. 417Y26

No. 53VU40

No. 53VY25

- Rated life: 50,000 hr., except Hubbell are 60,000 hr.
- LED 0-10V dimming
- Dimmable
- 5 yr. warranty
- Ambient temp. range: 0° to 104°F

Make the switch to LED lighting for reliable lighting that provides you with significant savings in both energy usage and maintenance costs.

GE—Lumination™ luminaires are specifically designed to fit into T-grid drop ceilings. The smart, attractive design gives you below-ceiling access to the light engine and LED driver, for easy maintenance. LBT Series units are designed for retrofit applications. LBV Series units feature an attractive, gently curved lens, and can be used in either retrofit or new construction installations.

Juno®—Lightweight, cold-rolled steel troffers are easy to install in any standard T-Bar or screw-slot grids in either new construction or remodel applications. The easily removable lens gives you quick access to LED boards and driver. ETL listed for damp locations.

Hubbell®—LCAT Series architectural troffers are suitable for classroom, office, retail, and health care applications. LSTE Series provide uniform illumination at mounting heights as low as 8 ft. LTRX Series and MDM Series are designed to provide both even illumination and critical examination lighting in medical examination rooms.

PHILIPS Day-Brite

LITHONIA LIGHTING

LumaPro

LED Recessed Troffers

- Fixture Voltage 120 to 277

Philips Day-Brite—Architectural-style troffers feature a soft opal diffuser with a large luminous area that helps reduce uncomfortable bright spots that can sometimes be created by standard basket luminaires. The 2.75"D housing requires minimal plenum space and provides convenient access to LED boards from below. 0-10V dimming. cULus Listed for Damp Locations; meets UL 924.

Lithonia Lighting®—Suitable for general ambient lighting in commercial applications. Combine digital LED lighting technologies with high-performance optical design for ambient lighting.

LumaPro®—Cost-effective fixtures are excellent in offices, sorting rooms, cafeterias, lunchrooms, washrooms, and hallways. 0-10V dimming driver is reverse-compatible with 0-10V fluorescent dimmers.

Fluorescent Commercial Recessed Troffers

- 120/277V
- Easily positioned integral T-bar clips secure fixture to T-bar system
- Lamps not included (except No. 3YA10)

T8 electronic ballast systems provide 30% to 40% energy savings when compared to F40T12 magnetic ballast systems. Fixtures with GE UltraStart® ballasts maximize lamp life in frequently switched applications typically associated with the use of sensors and controls.

NOTE: Additional replacement lenses are available on page 440.

PARABOLIC TROFFERS

Provide light control, lamp cutoff, and reduced glare for visual comfort. Black reveal creates a floating louver appearance. Great for use in locker rooms, recreational facilities, and kitchens.

ES8 Series are louvered models that provide a high-performance energy-saving alternative to 3-lamp options. When used in place of parabolics, they can provide up to 44% energy savings.

LENS TROFFERS

Maximize light output for most commercial applications. SP5 and SP8 series include program start ballasts, which should be used when lighting controls are needed. Low-profile design is suited to restrictive plenum applications. Smooth, hemmed edges make handling easier. Use in offices, schools, healthcare facilities, and retail applications.

Labor-Saving Tandem Fixture, No. 7AA50

2 fixtures work in tandem: snap-together design uses half the connections, wiring, and components of 2 separate fixtures. Wiring connections for both are located at 1 access plate. Separate ballasts allow turning on only a portion of the lights, conserving energy.

LED Surface Mount Lighting

Energy-efficient no-maintenance fixtures can be mounted individually or in series. Temperature-limiting and -diffusing features extend lamp life. Directional LEDs focus light where needed, with no flicker or buzzing. Suitable for use in office, commercial, industrial, and retail applications.

GE

Lumination™ WS Series— Wrap-mount fixtures provide efficient, even light distribution, and have a compact, ceiling-hugging profile. Ideal for back office, hallway, storage, and utility applications. C-UL Listed.

HUBBELL

- **5-yr. limited warranty**

Long life helps virtually eliminate the need for maintenance.

CWP4 Series—An economical solution for effective lighting in general low-bay applications. Damp location listed.

LBIL Series—Fixtures feature an integral occupancy sensor that can be configured to operate at 50% when the area is unoccupied and at full power when occupied.

LAW Series—These wrap-around fixtures are an excellent choice for hallways, closets, utility rooms, and low-ceiling areas. The heavy-gage steel housing hinges from either side for easy access to driver boards. Can be surface-mounted or susp ended.

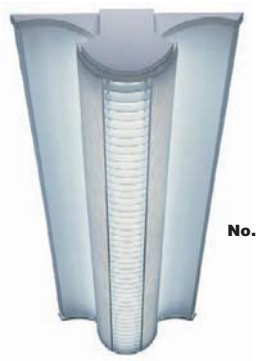
LITHONIA LIGHTING

FMLWL Series—Wraparound fixtures provide ambient lighting for both residential and commercial use. An excellent choice for use in kitchens, laundry rooms, utility work spaces, stairwells, and offices. Suitable for damp locations.

ST Series—Fixtures can be mounted individually or in series, and feature LED AccuDrive™ dimming. An excellent choice for general ambient lighting in offices, workrooms, retail, and other commercial applications. Thermally protected.

LBL Series—Fixtures feature a digital lighting platform to deliver dependable, general purpose lighting. Ideal for closets, storage rooms, hallways, and offices. Suitable for damp locations.

W Series—Dirtectional LEDs can be aimed to focus more light where needed. Suitable for use in office, commercial, industrial, and retail applications.



SBL Series—Fixtures can be mounted individually or in series, and the directional LEDs can be focused to illuminate hard-to-light areas. Suitable for office, commercial, industrial, and retail applications. Steel housing.

LUMAPRO

Meets building and safety codes for utility, parking garage, and stairwell lighting. Designed with a full-length wraparound acrylic lens.

Architectural Fluorescent Fixtures

- 120 to 277V
- Integral T-bar mounting clips UL Listed.

Direct/Indirect—Mix of direct and indirect lights increased visual comfort and minimized shadows. Diffuser pivots down for simple lamp changes and can be removed for cleaning or replacement. Ideal for office, school, hospital, and retail applications.

Volumetric—Fixtures fill the room with soft lighting from an evenly distributed combination of volumetric and quiet ceiling light. Ideal for office, school, hospital, and retail applications. Nos. 2MZF3 and 5XY99 feature electronic step dimming.

Healthcare Exam Light—Streamlined multifunction fixture provides ambient and task lighting. Reading and direct task lighting are on a separate circuit with pull-chain control. High-gloss white polyester powder-coated finish.

- Steel construction

Fluorescent Surface Mount Fixtures

- Acrylic diffusers
- White finish
- 120 to 277V
- Ambient temp. range: 0° to 104°F

These commercial-grade fluorescent fixtures can be surface- or suspension-mounted in unit or row applications (except No. 2PFV4 is surface-mount only).

Surface Troffer—Lensed fixture provides general area illumination. Door has tee hinges and rotary-action cam latches.

Low-Profile Wraparound—Rounded prismatic diffuser with continuous interlocking support prevents accidental opening. Injection-molded, luminous end caps and linear side prisms control brightness. Row mount without tools using snap-in couplers.

Economy Low-Profile Wraparound—Compact design minimizes ceiling shadow and sharp contrasts. Lightweight unit has flat-bottom prismatic diffuser.

Volumetric—Ceiling fixtures create an optimal mix of light to horizontal and vertical work surfaces. Crescent shape, linear faceted refractor provides uniform light distribution and high angle brightness control.

Square Basket Wraparound—Flat bottom prismatic diffuser opens from either side for easy cleaning and service. Low profile fixture has linear side prisms for brightness control.

Corridor Wraparound—Prismatic diffuser with interlocking support provides secure attachment. Injection molded, luminous end caps and linear side prisms control brightness. Snap in couplers allow row mounting without tools.

LED Vapor Tight Fixtures

- 120/277V
- UL Listed

All feature fiberglass housings, except LumaPro.

GE—The precision lens system provides optimized illumination for open floor plans, and directional LEDs let you direct light where needed to help increase efficiency. Surface- or chain-mount. Recommended for low-bay lighting applications at 20 ft. or lower.

Hubbell—Multi-function fixtures can withstand severe conditions and serve well in food service areas. A removable gear tray provides quick access to LED drivers and light board. Impact modified acrylic lens equivalent to 100% DR.

Lithonia Lighting—Fixtures feature a closed-cell gasket and frosted acrylic lens. FEM Series is designed for challenging situations and is approved as a wireway and for through wiring.

LumaPro—Operate at cooler temperatures for more output and longer life. Surface-mount. Steel housing, except 53DK Series are polycarbonate.

- 0-10V LED dimming

Ironclad® Vandal-Resistant Correctional Facility LED Fixture

shat-r-shield® INC. The Protective Lighting Company

- 120 to 277V
- UL Listed

Constructed to withstand extreme abuse, this one-piece fixture can be easily mounted completely flush into concrete ceilings using tamperproof fasteners. The high efficiency LED light engine generates a cool light that simulates daylight, while a night light LED module provides soothing low-level illumination for additional safety after "lights out." Has no accessible parts or hinges that can offer a point of entrance, and no areas to hide or conceal contraband.

LITHONIA LIGHTING® ★ LumaPro®

Special Application Fluorescent Fixtures

- Lamps not included

DUST-RESISTANT

Designed to prevent entry of airborne contaminants. Impact-resistant acrylic diffuser is secured to housing with cam latches for a positive seal. Suitable for use in fabrication and machining areas, welding, grinding, or any nonhazardous environment. All are UL Listed for wet locations. LumaPro® fixtures are also C-UL Listed for wet locations.

HIGH-PRESSURE, HOSE-DOWN

Sealed fixtures have a high-impact acrylic lens and are intended for low to medium mounting heights. IP65 rated. UL and C-UL Listed for wet locations. Nos. 1BP87 and 2LYX8 meet FDA/USDA guidelines.

INDUSTRIAL TROFFER

Wet Room, No. 3XY80—Specification-grade troffer is completely gasketed with closed-cell neoprene for extra moisture resistance. Housing and door frame have white polyester powder-coated paint finish for corrosion resistance.

WET LOCATION

Great for pharmaceutical and food handling, sauna, traffic tunnel, parking lot, and similar applications. UV-resistant gray polycarbonate housing is corrosion- and high temperature-resistant and impact-, shock-, and fireproof. Clear polycarbonate diffuser. 5-yr. warranty. Include hardware for surface or suspended mounting. UL and C-UL Listed for wet locations.

VAPOR TIGHT FIXTURES

Ballasts are energy-saving and thermally protected. UL Listed for wet locations.

Fluorescent and Xenon Undercabinet Lighting

★ LumaPro LITHONIA LIGHTING

- 120V
- Electronic ballast

Lens material is nonyellowing white acrylic on fluorescent fixtures, glass on xenon fixtures. Each includes cord; Linking Convertible fixtures include plug-in and linking cords.

Hardwired and Plug-In fixtures feature hinged and unitized wireways; xenon units have a stepdown 12V transformer and can be wired to a dimmable switch.

Fluorescent Wall Bracket Fixtures

★ LumaPro LITHONIA LIGHTING

- Mount horizontally on wall (General-Grade All-Purpose can also be mounted vertically and on ceiling)
- Lamps not included

GENERAL-GRADE ALL-PURPOSE

- Up and down light
- White opal acrylic diffuser

For multipurpose areas such as corridors, utility rooms, and lavatories where high vertical illumination is required. White finish. Lithonia fixtures feature easy-maintenance design with standard spring-loaded endcaps, for easy diffuser removal without tools.

PREMIUM-GRADE COMMERCIAL

- Direct or direct/indirect light
- Tinted acrylic snap-in diffuser (prismatic pattern)

For areas that require contemporary, low-profile lighting. No tools required for relamping. White finish. Lithonia fixtures feature detachable, hinged electrical service tray for easy installation and maintenance.

Fluorescent Strip Lights

- **Painted surfaces have a high-gloss, baked white finish**

Lithonia models with MV ballast are NEMA Premium® and CEE Qualified.

NARROW

Use in cove, storage areas, and other light-duty applications. Suitable for surface or suspended mounting; can be single or row mounted.

SIDE-MOUNT

For low-profile, cove, and general-purpose applications.

HEAVY-DUTY

Gripper back channel feature provides strength; allows additional mounting options, while the premium row aligner (included) allows for continuous row mounting. Larger end plates protect lamp holders from damage.

GENERAL-PURPOSE

End plates allow continuous row mounting.

LOW-PROFILE

Suitable for general and premium illumination in surface or suspended applications; can be single or row mounted in tight spaces. 3-point row aligner allows straighter continuous row mounting. Gripper back feature offers stronger construction than typical strips.

Z STRIP

Suitable for surface or suspended applications. Nos. 16U234, 16U235, and 16U233 have instant-start ballasts. Snap-together components. Not for continuous row mounting

LED Strip Lighting

- 120 to 277V

LED luminaires are an energy-efficient, low maintenance alternative to traditional fluorescent lighting.

GE

Mount at 20 feet or lower in commercial, low bay lighting applications. Match with motion, daylight, and wireless controls (sold separately) for increased energy savings.

Albeo™ ALC Series—The Albeo™ ALC5 Series has a rugged extruded aluminum housing and a precision lens system that optimizes light distribution. White polyester powder coat finish. Surface mount.

Albeo™ ALV Series—Albeo™ ALV1-series LED luminaires have directional LEDs that let you put light where it's needed. Stamped metal housing. Surface or chain mount.

HUBBELL

CSL Series—With a frosted acrylic lens, and fully assembled for quick installation. Excellent for commercial indoor, classroom, conference room, and similar applications. Surface mount on wall or ceiling.

LCL Series—A formed acrylic lens helps eliminate pixilation and reduce glare. Excellent for anywhere aesthetics are not essential. Surface, wall, or suspended mount.

LCS Series—Utilitarian strip has a heavy die-formed steel channel; excellent for back-of-house use. Designed for simple maintenance and upgrades. Surface or suspended mount.

LSRK Series—LSRK retrofit kits are designed to fit into most 4-4.25" and 5-5.25" wide linear housing channels with minimum dimensional requirements.

LITHONIA

All fixtures have a cold-rolled steel housing.

CDS Series—Designed for one-for-one replacement of fluorescent strip lights in retail, warehouse, and office applications. Feature a polycarbonate lens. Surface or suspended mount.

CLX Series—Can be continuous row mounted or installed as a stand-alone fixture. Ideal for commercial, manufacturing, warehouse, and display applications. Acrylic lens and injection molded endcaps. Wall, pendant, or stem ceiling mount.

MNSL Series—Damp location strip light simulates the look of traditional fluorescent tube fixtures. Diffuse polycarbonate lens. Surface or suspension mount.

ZL1D Series—Drop lens fixtures provide a clean look for commercial or architectural applications. Intentional uplighting helps minimize the cave effect. Snap-on/snap-off lens. Surface, pendant, or stem mount.

ZL1N Series—Ideal for both uplighting and downlighting in new construction and retrofit applications. Fixtures have a standard diffuse snap-on/snap-off lens, and can be surface, pendant, or stem mounted.

LITHONIA LIGHTING® ★ LumaPro®

Low Bay Fluorescent Industrial and Shop Lights

- **Lamp not included**

Heavy duty construction; code gauge steel. Painted surfaces have a high-gloss, baked white polyester finish. Lithonia models with MV ballast are NEMA Premium® and CEE Qualified.

GENERAL-PURPOSE PREMIUM SERIES

- **For mounting heights up to 20 ft.**

Embossed reflectors are suitable for most industrial-type applications. Premium row aligner (included), allows continuous row mounting. Gripper Back Channel feature offers additional mounting options.

GENERAL-PURPOSE STANDARD SERIES

- **For mounting heights up to 16 ft.**

12" reflector offers suitable illumination for light-duty direct or suspended applications; can be single or row mounted. Solid-top reflector style (nonapertured) for general lighting; apertured models offer 8% uplight

HEAVY-DUTY

- **For mounting heights up to 25 ft.**

Spring-loaded turret sockets hold lamps securely in place, while the heavy-duty spin nut fasteners secure reflector to channel. Gripper Back Channel feature offers additional mounting options. Apertured models offer 20% uplight.

SHOP LIGHTS

Lights offer reliable ballast operation and reduced noise. Sturdy, thick-gauge steel for durability. Fully assembled; include mounting hardware and power cord. C-UL Listed.

High Bay LED Pendant Lights

HUBBELL

Suitable for wet locations.

FPH Series—Sealed LED fixture has cast-aluminum construction with a smooth exterior and no exposed fasteners. Designed for use in food processing facilities or any other any area that demands a well-sealed, smooth high-output LED fixture.

- UL Sanitation listed

HBL Series—Severe location fixture has cast-aluminum cooling fins and sealed optics. DesignLights Consortium® (DLC) qualified.

PHB Series—Well-sealed 3-pc. low copper alloy die-cast aluminum housing provides a durable, rugged high-bay lighting solution for tough industrial applications. Can be easily installed by a single person on ¾" or 1" threaded conduit.

UTB Series—Designed to light gyms, industrial, multi-purpose rooms in schools and churches and retail. Its simple, straightforward design is meant to provide high quality light economically

LITHONIA LIGHTING

JEBL Series—Fixture is built with a unique, quick-connect, driver-to-optical assembly interface that allows quick and easy maintenance. 6kV surge protection standard. Wet location listed.

JHBL Series—Designed for maintaining greater light levels in heavy industrial applications, unforgiving climates, and demanding areas. Built to withstand dust, moisture and airborne contaminants.

LUMAPRO®

With an enclosed power supply housing and covered optics, this durable unit is designed to stand up to difficult locations. Features radial aluminum heat sink fins for cool operation. A slide-out driver tray lets you service the fixture without removing it from its installation.

High Bay LED Fixtures

- 5-yr. limited warranty

Designed for manufacturing, warehousing, and other large indoor spaces. Narrow and wide distributions are offered to meet horizontal and vertical light-level requirements.

LUMAPRO®

Fixtures replace 4- or 6-lamp T5HO fluorescent high bay or 400W HID high bay fixtures. They feature a powder-coated galvanized steel housing, with a frosted acrylic lens to help minimize glare. Can be suspended mount by chain (included) or cable.

LITHONIA LIGHTING

Note: Wide Light Distribution models are available on Grainger.com®.

IBE Series—Fixtures can be mounted at heights of 18 ft. or more, and feature an aluminum housing and acrylic lens. They can be bracket, chain, cable, hook, pendant, or surface mounted. Can be used in damp locations.

IBG Series—Highly configurable fixtures can be mounted at heights up to 60 ft., and have a standard IPX5 dust-resistant diffuse lens. An outstanding choice for warehousing, manufacturing, and general industrial applications.

HUBBELL® LIGHTING

Note: Units with occupancy sensors are on Grainger.com®.

HHH Series—Wet location fixtures are a good choice for tough industrial locations.

PHB Series—Fixtures are an excellent choice for warehouses, manufacturing, gymnasiums, convention centers and other large, open commercial spaces. Can be suspended mount by chain or cable.

LWS Series—Powerful, compact LED suspended Wrap High Bay fixtures have narrow or wide distribution for simple installation. They are an excellent choice for industrial and retail applications.

GE

Note: Units with occupancy sensors are on Grainger.com®.

ABR1 Series—IP66 rated fixtures utilizes a seale form factor for demanding industrial environments with high ambient temperatures and wet applications. They can accommodate a single or double fixture with one or two modules per fixture.

ABV3 Series—Fixtures utilize a new form factor and feature a steel and aluminum housing. They can be suspended mount with chain or cable. Suitable for damp locations.

Low-Bay LED Fixtures

- 5-yr. limited warranty

Durable steel fixtures start reliably down to 0°F and come with "S" hook hangers that allow adjustable mounting angles. Lithonia IBH Series feature a 20-ga. steel full-body housing and optical assembly and a thermally protected dimming driver. No. 22CK50 includes power cord.

LumaPro® Series

IBZ Series

TMS5HB Series

High Bay Fluorescent Fixtures

- Up to 50% energy savings over metal halide
- Instant-on lamps
- Steel construction
- Ambient temp. range: 0° to 104°F.

Narrow-distribution fixtures are designed for aisle or higher mounting heights; wide-distribution fixtures are designed for general or open areas.

Series FGB

LUMAPRO®

Post-painting process provides excellent corrosion resistance at a value price.

LITHONIA LIGHTING IB/IBC/IBZ SERIES

Designed as 1-for-1 replacements of common metal halide high-bay systems, these fixtures mount at heights from 15 to 30 ft. (No. 48H448 mounts up to 40 ft.). Suitable for most warehousing, commercial, and retail applications. Models with Modular Receptacle simplify field installation of various modular accessories, including cordsets and motion sensors. Modular Plug versions must be powered using one of the Modular Cord Sets (6CGD0, 6CGD1, and 6CGD2), sold separately. Field-installed sensors can be used with T5 versions to tightly control light distribution and effectively manage lamp heat to increase overall efficiency. Help provide superior optics in narrow distribution for aisles, or wide distribution for general lighting.

LITHONIA LIGHTING MS5HB/TMS5HB SERIES

Excellent where high-angle brightness or appearance is significant, such as aisles, assembly lines, or retail environments. White straight-blade louver assembly shields lamps and reduces brightness.

LITHONIA LIGHTING FGB SERIES

- Wide variety of precision optics available
- Motion sensors help provide increased energy savings
- NEMA Premium ballasts standard

SPEC-BEAM™ high-lumen fixtures can be used as a direct replacement for common metal halide high bay systems in warehousing, manufacturing, commercial facility, and retail applications. Mount at 15 to 40 ft. Channel, end caps and socket brackets are manufactured from code-grade steel; fixture assembly is riveted and screwed together for added strength and offers toolless access to ballast and wiring. Segmented optics are 95% reflective and warranted for 25 yr. All distributions included.

Hazardous Location Signal Flashers

KILLARK®

- Temp. range: -40° to 104°F
- Hazardous location rated Class 1, Div. 2, Groups A, B, C, D; Class 1, Zone 2, Groups IIC, IIB, IIA; Class II, Div. 1 & 2, Groups F, G; Class III
- Enclosure Type 4X, Marine Type
- CSA Certified for U.S. and Canada

High-strength, glass-filled thermoset polyester with polycarbonate lenses. Units can be mounted up or down. Flashers are 4.75" dia. and include brass screws and silicone gasket. 12-80VDC units can operate at 24VAC.

LED

- Lamp life: 50,000 hr.

7 microflashes per sec.

XENON

- Lamp life: 10,000 hr.

60 to 80 flashes per min.

LumaPro®

HUBBELL® Wiring Device-Kellems

Vapor Tight Vandal Resistant Fixtures

- 120V
- Gray finish

Housing has twist on guard, fully enclosed, gasketed glass globe, and a premium porcelain socket. Made to withstand extreme physical assault and environmental abuse. Great for high traffic, dirty, dusty, or weather-exposed areas. Fit on ¾" conduit, or ½" conduit. No. 1UKB8 is specifically designed for use in marine applications and meets applicable standards. Nos. 3RB17 and 3RB18 are prewired with leads for flush mounting (4" round or octagonal boxes). All fixtures are UL Listed; Nos. 3RB17 and 3RB18 are CSA Certified for the U.S. and Canada.

Note: Not recommended for use in commercial or industrial range hoods or ovens.

LITHONIA LIGHTING®

Rough Service Vandal Resistant Fixtures

- Wall or ceiling mounting

Engineered to withstand extreme physical assault and environmental abuse; ideal for high risk applications. All lenses use tamper resistant Torx® fasteners. (Use with bit No. 3JA15, not included.) UL Listed for wet locations.

UTILITARIAN

1-pc. injection-molded polycarbonate lens is UV-stabilized. Housing has durable, corrosion-resistant finish.

Explosionproof Fixtures

- Lamps included

Designed to provide general and task lighting in locations where there is a continuous presence of flammable gases and vapors. Rated Class 1 Division 1 Groups C and D, and Class 2 Division 1 Groups E, F, and G. Approved for use in paint spray booths. UL and C-UL Listed. Meet USCG specs.

No. 2PDJ6

No. 4KGR3

No. 2PDA4

Hazardous Location Fluorescent Fixtures

HUBBELL KILLARK

- ¾" conduit hub
- Voltage range: 120-277VAC

Designed for use in hazardous or nonhazardous wet locations, and for indoor or outdoor general and task lighting where flammable gases/vapors or combustible dusts may be present. Nos. 2PDA4 and 4KGR5 include battery backup.

HUBBELL KILLARK

Hazardous Location Floodlights and Wall Packs

- Hazardous location rated Class I, Div. 2, Groups A, B, C, D/Class I, Zone 2, Groups IIC, IIB, IIA
- NEMA 4X wet location
- CSA Certified for U.S. and Canada

Housing is copper-free aluminum for cool operation. Bronze powder-coated finish.

FLOODLIGHTS

- Temp. range: -40° to 131°F (HPS), -22° to 131°F (MHPS), -58° to 131°F (LED)

Designed for heavy-duty applications where long life and maintenance-free service are required. Include yoke. Suitable for use around parking garages, factories, and perimeter security lighting.

WALL PACKS

- Temp. range: -40° to 104°F (HPS), -22° to 104°F (MHPS)

Designed for hazardous location areas and have an aesthetically pleasing appearance. Wall mount. Suitable for perimeter security lighting, parking garages, and walkways. Furnished with ½" hubs.

LED Anti-Glare Wall Packs

LED anti-glare wall packs project a bright, clean light and reach full brightness instantly. They use LED lamps, which last longer and use significantly less energy than wall packs with other lamp types, such as high-pressure sodium or compact fluorescent. They also produce very little heat and can withstand temperature changes and humidity.

High-Pressure Sodium & Metal Halide Anti-Glare Wall Packs

These anti-glare wall packs cast light downwards around building perimeters. They use either high-pressure sodium (HPS) or metal halide (MH) lamps. HPS and MH lamps produce a high-intensity light in either amber or natural light colors.

Lumens	Fixture Wattage	Voltage	Light Distribution	Color Temp.	Color	Item No.

Compact Wall Packs

Compact wall packs have a length or width less than 11" and take up a smaller mounting space than full-size wall packs, making them a good choice for exterior walls that have narrow surface areas. These outdoor lighting fixtures project widespread light onto building grounds and walkways to increase visibility for pedestrians and enhance security. They are typically used to illuminate commercial buildings, office complexes, recreational facilities, and apartment complexes.

Full-Size Wall Packs

Full-size wall packs are wall-mounted outdoor lighting fixtures with a length or width greater than or equal to 11" that are typically used to illuminate large areas, such as commercial building perimeters and office complexes. They cast widespread light to provide added visibility and can help deter vandals and unauthorized access to perimeters. They are also a good choice for doorway and loading areas in need of extra security lighting, or places where dark sky compliance is not required.

LED Garage and Canopy Fixtures

Garage and canopy lights are overhead lighting fixtures that cast widespread, uniform light in interior areas to increase visibility for pedestrians and vehicles. They mount to surfaces, pendants, or recesses of structure ceilings, soffits, or overhangs. Lighting fixtures project a widespread beam of light in building entrances and drive-through entryways to provide added visibility for pedestrians and vehicles.

LED Area/Roadway Lighting

Long life, energy saving fixtures illuminate entry drives, parking lots, and walkways. 5-yr. limited warranty.

Acuity/Lithonia Lighting—Replace your halogen lighting to provide uniform lighting to the same area with fewer fixtures. Integrated monitoring systems and controls help deliver superior performance and help reduce total cost of ownership, with increased system life and reduced energy consumption and maintenance costs. Stainless steel bolts fasten the mounting block securely to poles and walls.

- Die-cast aluminum housings

GE—Outdoor LED lamps feature rugged wildlife protected housings, making them an excellent choice for area, site, and other outdoor lighthing applications, including street and roadway. An integrated heat sink helps extend LED life and further reduce cost of ownership.

- Die-cast aluminum housings

Hubbell—Energy efficient LED Area/Roadway lighting provides superior performance with long life and minimal maintenance, with lighting performance that is equal to or better than traditional HID lighting, at a fraction of the cost of ownership. Meet DLC standards.

- Die-cast aluminum housings
- Acrylic lens

LumaPro® Lighting—Sealed, maintenance-free die cast aluminum fixture is rust and corrosion resistant and has a bright anodized aluminum reflector. Full cutoff optics eliminate light pollution. Meets ETLus standards. RoHS compliant.

- Polycarbonate lens
- Mercury free
- IP65 rated

HID Roadway and Security Fixtures

Durable, lightweight, die-cast aluminum fixtures bolt securely onto mast arm mounting.

LITHONIA LIGHTING ROADWAY

- Photocontrol receptacle adjusts without tools
- Bolt to 1¼"-dia. mast arm mounting

Built in wildlife shield adjusts to fit most arms. Heat resistant gasket seals the optical chamber from environmental contaminants. Terminal block standard. Nos. 5YB45 to 5YB47 are pre-wired and include hardware.

AREA/SECURITY LIGHTING

- Include cast-in external slipfitter for easy mast arm installation
- Die-cast aluminum head meets NEMA dimension standards

Nos. 4VM79 feature lightweight aluminum housing, prismatic refractor, and a 5" mounting arm. Nos. 2LBL6 have a powder-coated housing, high-impact diffuser, and protective steel cage. No. 5YB44 features a cooler-running ballast, 392°F wiring, and phosphor bronze contacts. UL Listed.

MOUNTING BRACKETS AND ACCESSORIES

Steel brackets for pole or wall mounting have 42-lb. capacity. No. 4EA34 has 87-lb. capacity.

Pole Mount Floodlights

Pole mount floodlights are outdoor lighting fixtures that project a bright, high-intensity light over large outside areas to increase visibility and enhance safety of pedestrians. They are installed on poles and are typically used to illuminate parking lots, parks, sports fields, and industrial yards.

Universal Mount Floodlights

Universal mount floodlights are outdoor lighting fixtures that project a bright, high-intensity light over a widespread area to increase visibility. They can be mounted on walls, ceilings, poles, or the ground. They are typically one of several floodlights used to illuminate sports fields, parks, building exteriors, and industrial yards.

Landscape Lighting

PHILIPS HADCO ★ LumaPro

Floodlight fixtures are built to withstand harsh outdoor conditions, improve nighttime visibility, and provide security on walkways, driveways, and paths. Locking-teeth design allows precise head positioning and keeps fixtures solidly in place. Die-cast aluminum hoods increase light control while keeping water and dirt out of fixtures. Glass lenses provide additional protection against water and dirt. Mounting Post (required where noted) converts for ½" riser or 3" mount; PVC construction.

Outdoor Lighting Motion Sensors and Lampholder Kits

- Not for use with fluorescent or inductive lighting
- Weatherproof with integrated circuit technology
- Large areas of coverage
- 120V

Passive infrared motion sensors constantly scan areas for changes in temperature or motion, turning lights on only when ambient light is below the set level and motion is detected. Lights stay on for a programmed length of time.

Incandescent models use max. 150W lamps (not included); order No. 2CVA5. Quartz models use two 250W halogen lamps (included); for replacement, order No. 4XLJ1.

Southwire

Landscape Lighting Wire

- 2 Stranded Copper Conductors
- Rated 150 Volts
- Black PVC Insulation/Jacket

Landscape lighting wire is a low-voltage, low-energy wire typically buried underground that is used to connect a power supply to outdoor lighting products. It has a multistrand conductor and a weather-resistant jacket that can withstand harsh conditions both above and below ground. Landscape lighting wire is used in a range of outdoor lighting applications, including floodlights, emergency egress lighting, and security lights.

LUTRON®

Incandescent/CFL/LED Dimmers

- **C•L dimmers are for use with LED and CFL lamps**

Dimmers save energy and increase lamp life up to 20 times the original lifespan. RFI filtering reduces interference with computer systems, intercoms, and sound systems. 60 Hz only. All are UL and CSA Listed, except Credenza® and Skylark® Contour™ are C-UL Listed.

Ariadni®—Designed to work with existing traditional multi-gang wall plates, to replace or match traditional-style switches. With an easy-to-use toggle switch and a small slide dimmer.

Credenza®—Get simple, effective dimming for just about any lamp, including table and floor lamps, with no need for 3-way bulbs. Simply plug the lamp directly into the dimmer, and the dimmer directly into the wall; the dimmer switch can be placed on a tabletop for easy access, and operated with a simple sliding switch.

Diva®—Designed to match your existing designer-style switches, with a paddle switch and a small, unobtrusive slider that lets you adjust the lights to the perfect level.

Maestro®—Dimmers give you full-range dimming at up to 10 locations. Use only 1 smart dimmer per circuit and up to 9 companion dimmers (Nos. 4LZ40 or 4LZ41; sold separately).

Skylark®—A convenient rocker switch turns the lights on and off, while an easy-to-use slide control lets you adjust light level. Can be used with most decorator-style wall plates (not included).

Nova®—Slide-to-off, slide-to-brighten dimmer provides simple control of light levels in just about any room.

VIDEO AVAILABLE ON GRAINGER.COM®

Wall Switch Occupancy and Vacancy Sensors

- Field of vision: 180°
- Coverage: 900 sq. ft.
- Time delay: adjustable
- Timer range: 1/5/15/30 min.
- High-low sensitivity adjustment

Passive infrared sensors detect body heat to determine when the space is occupied. Work with standard 3-way switches or up to 9 companion switches. Occupancy versions can be set to auto-on/auto-off or manual-on/ auto-off. Vacancy versions meet CA Title 24 requirements.

NOS. 36N228 TO 36N231

No neutral wire required (ground connection required for functionality). Occupancy sensor loads: incandescent, halogen, MLV, CFL, LED, magnetic fluorescent, and electronic fluorescent.

NOS. 32JA42 AND 32JA43

Switches all lighting loads. Meets many Title 20/24, ASHRAE 90.1, and IECC code requirements.

NOS. 36WH09 TO 36WH22

Sensors can control up to 25 ballasts or drivers. UL Listed. Comply with Title 20 and Title 24 Section 110.9.

No. 36N229

No. 22LU20

No. 36WH13

AcuityControls. Sensor Switch.

Wall Switch Occupancy Sensors

- 120/277VAC
- Motor Load ¼ HP Rating
- 180° viewing angle
- Timer range: 30 sec. to 30 min.
- No neutral required

Passive infrared and passive dual-technology occupancy sensors automatically turn lights On and Off as people enter and leave a room. By reducing the amount of time the lights are on, sensors cut energy consumption and significantly reduce energy costs. Sensors have an integrated photocell that can keep lights off if there is sufficient daylight in the room. Designed with a patent-pending wiring method that enables sensors to function with or without a neutral connection.

PASSIVE INFRARED (PIR)

Sensors detect body heat in motion. They must be located where full line-of-sight is possible.

DUAL TECHNOLOGY SENSORS (PIR AND MICROPHONICS™)

Feature an embedded microphone that hears sounds indicating occupancy in rooms with obstructions, such as bathroom stalls or office cubical areas.

HUBBELL® Wiring Device-Kellems

Wall Switch Occupancy and Vacancy Sensors

- Field of vision: 180°
- Rated for use with incandescent, fluorescent and LED lighting
- No neutral required, except where noted

These sensors meet the latest codes and standards, and also provide LEED® points in Sustainable Sites, Energy and Atmosphere, Indoor Environmental Quality and Innovative Design Process categories.

Sensors with adaptive technology constantly monitor the controlled area and automatically adjusts the sensitivity and time delay. This means that instead of manually adjusting the sensor for seasonal changes, occupancy pattern changes, etc., the sensor automatically adjusts itself.

DUAL TECHNOLOGY

Combine both (PIR/US) technologies, minimizing the risk of false triggering. Neutral required for Nos. 36DZ89 and 36DZ90.

PASSIVE INFRARED

Detects body heat and movement. Requires line of sight for optimal operation.

ULTRASONIC TECHNOLOGY

Detects movement by bouncing sound waves off objects. No line of sight is required.

HUBBELL® Wiring Device-Kellems

Indoor and Outdoor High Bay Occupancy Sensors

Provide advanced and accurate passive infrared (PIR) technology for unequaled occupancy detection and false trip immunity. Low bay replacement lenses are available for 8- to 16-ft. mounting heights.

No. 36DZ95

No. 29RW98

Outdoor Motion Sensors

These passive infrared (PIR) sensors provide both motion and daylight control of dimmable outdoor or wet-location fixtures. 120/277VAC. Mounts via ½" knockout (⅞" hole) in fixture or pole. UL listed, RoHS compliant, IP66.

LED Drivers for Fixture Arrays

These LED drivers protect fixtures that use LED arrays from power supply fluctuations, which can reduce light output quality. They convert high-voltage AC into low-voltage DC to power the arrays. Drivers and bulbs must be the same brand for proper operation.

LED Drivers for Type C Light Bulbs

GE current a Daintree company PHILIPS ADVANCE

LED drivers for Type C light bulbs are used to retrofit fluorescent lighting fixtures so they can be used with UL Type C LED linear light bulbs, which are more energy efficient than fluorescent bulbs. The drivers allow facilities to convert their fluorescent lighting fixtures to LED technology without the expense of replacing the fixtures entirely. They protect UL Type C LED light bulbs from damaging fluctuations in the power supply that can reduce the quality of their light output, and they power the bulbs by converting high-voltage alternating current (AC) into low-voltage direct current (DC).

Proprietary Continuous Dimming Fluorescent Ballasts

- Programmed Rapid-Start Ballast Start Type

Proprietary continuous dimming ballasts are only compatible with continuous dimming controls from the same manufacturer and series. The ballasts and dimming controls interface precisely with each other, which makes them more reliable than other types of ballasts and dimming controls. These ballasts allow a light fixture's light output to be adjusted from 100% light output all the way down to the ballasts' lowest light output setting. They are most often used in fluorescent fixtures in lighting system retrofits or new construction lighting installations for large facilities.

0-10V Continuous Dimming Fluorescent Ballasts

These continuous dimming ballasts are compatible with 0-10V continuous dimming controls and use a low-voltage analog control signal to dim a light fixture's light output to any level between 100% light output and the ballasts' lowest light output setting. They are used in fluorescent fixtures in a wide variety of settings, but may not be suitable for lighting systems that require long wire runs to connect the ballasts to the lighting controls.

2-Phase Step Dimming Fluorescent Ballasts

Two-phase step dimming ballasts are compatible with two-phase step dimming controls and are used in fluorescent fixtures in classrooms, hallways, and other settings that don't require a wide range of dimming. They alter the supply voltage to dim the fixtures' light output to specific levels, for example 100% (full brightness), 50%, and 0% (off).

Line-Voltage Continuous Dimming Fluorescent Ballasts

Line-voltage continuous dimming ballasts are compatible with line-voltage continuous dimming controls. They receive control signals through their power leads, so they don't require any extra wiring to connect them to the lighting controls. The ballasts allow a fixture's light output to be adjusted from 100% light output all the way down to the ballasts' lowest light output setting and are used in fluorescent fixtures in conference rooms, private offices, auditoriums, and other areas where lights will be dimmed infrequently.

Rapid-Start Electronic Fluorescent Ballasts

LumaPro | FULHAM Lighting. Global. Intelligent. Sustainable. | PHILIPS ADVANCE | GE current a Daintree company

Rapid-start electronic fluorescent ballasts turn on lights near-instantaneously. They are less damaging to light bulbs than instant-start ballasts and are used in fluorescent fixtures that will be turned on or off frequently via occupancy sensors and other lighting controls that automatically operate the lights. These ballasts are not dimmable.

Instant-Start Electronic Fluorescent Ballasts

Instant-start electronic fluorescent ballasts turn on lights immediately and are used in fluorescent fixtures in warehouses and other areas where lights are left on for long periods of time. These non-dimmable ballasts provide high voltage at start-up and should not be used with occupancy sensors or other lighting controls that turn lights on or off frequently.

Trigger-Start Magnetic Fluorescent Ballasts

PHILIPS ADVANCE

Trigger-start magnetic fluorescent ballasts require a higher open-circuit voltage than rapid-start ballasts to turn on light bulbs. They turn light bulbs on near-instantaneously, but it may take the bulbs a few seconds to reach full brightness.

Sign Ballasts

Sign ballasts provide power to light up T8HO or T12HO high-output light bulbs used in indoor and outdoor signs. They withstand cold temperatures, rain, and other harsh weather. These ballasts are designed power specific quantities and lengths of bulbs. When one bulb in the circuit fails, the other bulbs will stay lit so the burnt-out bulb can be quickly identified and replaced.

Ballast Checker

Handheld device confirms ballast type from up to 15 ft. away. When pointed at a light fixture, the device turns green if the fixture is powered by an electronic ballast, and it turns orange if the fixture is powered by a magnetic ballast. Compact unit is 4½" x 2¼". Includes battery and lanyard.

Electronic HID Ballasts

Electronic HID ballasts are more energy-efficient and less damaging to HID bulbs than other types of HID ballasts, and they provide accurate power regulation for consistent light output and light quality across the life of the bulbs. They also tend to be smaller and weigh less than other styles of HID ballasts. For use with metal-halide HID bulbs.

Indoor Quiet HID Ballasts

The inside of the housing on these HID ballasts is insulated to eliminate or greatly reduce the hum generated by HID ballasts. Also known as F-can ballasts, they are used in HID light fixtures in indoor areas where noise must be minimized.

No. 3V564

Indoor Remote-Mount HID Ballasts

These enclosed HID ballasts mount outside of light fixtures. They are used in installations where the ballast must be mounted away from the fixture to reduce noise in the area around the fixture or to protect the ballast from damaging ambient temperatures. For use with metal-halide HID bulbs.

HID Capacitors

HID capacitors install into ballasts on HID light fixtures to help prevent the bulbs in the fixtures from flickering. They help regulate the voltage and current going to the bulbs and ensure the bulbs can produce a steady light output. HID capacitors require regular replacement to ensure they continue to operate HID bulbs at full brightness.

The Life of an LED Bulb

LED bulbs use significantly less energy and need to be replaced less often than other bulb types. Instead of burning out, LED bulbs typically undergo lumen reduction where their brightness fades over time as individual diodes in the bulbs begin to fail. An LED bulb is considered spent when its light output has decreased by 30%. Note: The life of an LED bulb (as measured in hours) and how that life compares to other bulb types is based on ideal conditions where the bulb is used in its intended application.

Understanding Color Temperature of a Light Bulb

Color temperature describes the hue and tone of white that a light bulb emits. It is measured numerically on the degrees Kelvin (K) scale. Light output at about 4000K is neutral white. Light output below 4000K gets warmer and yellower as the degrees Kelvin rating decreases. Light output above 4000K gets cooler and bluer as the degrees Kelvin rating increases.

Color Temperature	Warm/Medium	Neutral	Cool	Daylight
Kelvin Range	2700K - 3000K	3500K - 4100K	4100K - 5000K	6500K
Appearance	Orange/Yellow	White	Blue	Blue
Commercial and Industrial Spaces	Restaurants, Lobbies and Hotel Rooms, and Retail Stores	Offices, Classrooms, Supermarkets, Restrooms, and Breakrooms	Merchandisers Showrooms, Hospitals, and Parking Garages	Museums, Galleries, Task Lighting, Warehouses, and Manufacturing
Residential Environments	Living room, Dining room and Bedrooms	Kitchens, Bathrooms and Workspaces		Reading Areas and Outdoor lighting
Ambiance	Relaxing, Calming, and Friendly	Friendly, Inviting and Vibrant	Bright, Clean, and Invigorating	Energizing, Alert and Intense

Lumens and Watts

Lumens is a measure of how much light a bulb produces, its brightness. The higher the lumens, the brighter the light. Lumens, not watts, provide a basis for comparing the brightness of light bulbs. Watts is a measure of how much energy a light bulb uses. LED light bulbs are the most energy efficient light technology. They require the least energy to run compared to CFL, halogen, and incandescent bulbs of the same lumen output.

Lumens	LED	CFL	Halogen	Incandescent
450	6-8 Watts	9-13 Watts	25-29 Watts	40 Watts
800	9-12 Watts	14-16 Watts	40-43 Watts	60 Watts
1100	13-15 Watts	17-22 Watts	50-53 Watts	75 Watts
1600	16-20 Watts	23-30 Watts	70-72 Watts	100 Watts
2600	21-28 Watts	30-45 Watts	30-45 Watts	150 Watts

Color Rendering Index (CRI)

Color rendering describes how accurately a light source shows color as compared to a natural light source. It is measured on the Color Rendering Index (CRI), which is a scale from 0 to 100% with 100% representing the most crisp, vivid, and true-to-life color. Light sources with CRI ratings from 85 to 90 provide good color rendering. Light sources with CRI ratings of 90 or more provide excellent color rendering and are ideal for lighting photo studios and production floors where tasks require color differentiation.

Plug & Play LED General Purpose Linear Light Bulbs (UL Type A)

Install these bulbs in fluorescent lighting fixtures that are powered by ballasts. Avoid the expense of retrofitting lighting fixtures with LED drivers or wiring the bulbs into the building's power supply when switching lighting systems from fluorescent technology to LED technology. Users must verify that the light bulbs are compatible with the ballasts in the fixtures they will be installed in.

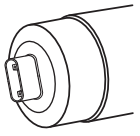
Ballast-Bypass LED General Purpose Linear Light Bulbs (UL Type B)



These bulbs do not require a ballast or driver to power the bulbs. They can be installed in compatible fluorescent lighting fixtures. They eliminate the risk of lighting outages due to faulty ballasts or drivers and avoid the expense of installing LED drivers when converting lighting systems. Ballast-bypass LED linear light bulbs require the fixtures to be wired into the building's power supply, so they are not suitable for facilities that have frequent power surges.

Separate-Driver LED General Purpose Linear Light Bulbs (UL Type C)

The bulb and driver are designed to work together, which helps these bulbs perform more reliably than other types of LED linear light bulbs. The driver also protects the bulb from power quality issues, making the bulbs suitable for warehouses and industrial sites that experience power issues but still wish to convert their lighting system. They install in fluorescent lighting fixtures that have been retrofitted with a compatible LED driver to power the bulbs.

Hybrid LED General Purpose Linear Light Bulbs (UL Type A/B)

shat-r-shield INC. The Protective Lighting Company

These bulbs can be installed in a fluorescent lighting fixture that is powered by a ballast. If the fixture's ballast fails, the fixture can be wired directly into the building's power supply to power the bulb. Avoid the expense or replacing failed ballasts when switching lighting systems. Because users will need access to the lighting fixture to rewire it if the ballast fails, these bulbs are typically used in offices and other spaces where ceilings are 10 ft. high or less.

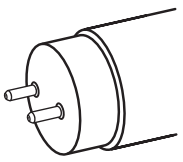
Hybrid LED General Purpose Linear Light Bulbs (UL Type A/C)

PHILIPS



Install in a fluorescent lighting fixture that is powered by a ballast. If the fixture's ballast fails, the fixture can be retrofitted with a compatible LED driver that provides power to the bulb. This spreads out the cost of converting lighting systems from fluorescent technology to LED technology. Users must verify that the light bulbs are compatible with the ballast in the fixture they will be installed in.

Safety Sleeves & Tube Holders

LumaPro

Safety sleeves and tube holders keep glass shards and phosphors contained when linear light bulbs break, which eases cleanup and helps prevent injuries. They slip over LED or fluorescent linear bulbs to provide a shatterproof barrier that protects the bulb from impact, damage, dust, and moisture. Colored sleeves tint the light that's emitted from the bulb and can be used in ambient-lighting or accent-lighting applications as well as for marking safety areas, exits, or equipment.

Fluorescent Shatter-Resistant Linear Light Bulbs

A surface coating keeps broken glass, mercury, and phosphors contained if the bulbs burst or break. This prevents safety hazards by keeping the contaminants from spreading into the surrounding area. The bulbs have bases on both ends and are installed in light fixtures to provide general area lighting in manufacturing plants, food-processing facilities, and other environments where product contamination must be avoided. They are also used in areas where the light bulbs may be exposed to shaking or impacts, such as railway systems and freight elevators.

Plug & Play LED U-Bend Light Bulbs (UL Type A)

Install in fluorescent lighting fixtures powered by ballasts. Use of these bulbs avoids the expense of retrofitting lighting fixtures with LED drivers or wiring the bulbs into the building's power supply when switching lighting systems. Users must verify that the light bulbs are compatible with the ballasts in the fixtures they will be installed in.

Ballast-Bypass LED U-Bend Light Bulbs (UL Type B)

Ballast-bypass bulbs do not require a ballast or driver for power. Install in compatible fluorescent lighting fixtures. These bulbs eliminate the risk of lighting outages due to faulty ballasts or drivers and avoid the expense of installing LED drivers when converting lighting systems. They require the fixtures to be wired into the building's power supply, so they are not suitable for facilities that have frequent power surges.

General Purpose E12 Candelabra and E39 Mogul Screw-Base Light Bulbs

E12 CANDELABRA SCREW-BASE LIGHT BULBS

Compact candelabra screw-base light bulbs fit into tight spaces in appliances, bath and vanity fixtures, and accent lighting fixtures. Their E12 screw base has a 12mm dia. and screws into a standard E12 socket.

E39 MOGUL SCREW-BASE LIGHT BULBS

Mogul screw-base light bulbs are used in large jobsite lights and other industrial fixtures. They have an E39 screw base with a 39mm dia. and screw into standard E39 sockets.

General Purpose GU24-Base Light Bulbs

The GU24 base on these light bulbs pushes into a GU24 socket and then twists slightly to lock it in place. General purpose GU24-base light bulbs are used in new construction projects, restaurants, hotels, and other residential or commercial facilities that are required to use energy-efficient CFL and LED bulbs.

Angled Candle-Shaped Decorative Light Bulbs

The angled tip on these candle-shaped light bulbs resembles a flickering candle flame. The bulbs have a slim, tapered and fit into chandeliers and other decorative lighting fixtures with limited space for bulbs.

Heat Lamp Reflector Light Bulbs

The wide beam of infrared light cast by these bulbs also emits radiant heat. Heat lamp reflector bulbs are used for warming animal enclosures, drying chemicals and paint, heating bathrooms, preventing pipes or equipment from freezing, and keeping food warm in food-service areas.

Shatter-Resistant Spot, Reflector & Flood Light Bulbs

The surface coating on these bulbs keeps broken glass, mercury, and phosphors contained if the bulbs burst or break, preventing the contaminants from spreading into the surrounding area. The bulbs have a reflective inner surface that intensifies their light output. Shatter-resistant bulbs are used in manufacturing plants, food-processing facilities, and other settings where product contamination must be avoided. They are also used in areas where the light bulbs may be exposed to shaking or impacts.

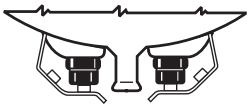
PAR Light Bulbs

PHILIPS GE current a Daintree company



Parabolic aluminized reflector (PAR) light bulbs are used for indoor and outdoor accent lighting, such as high-lighting flagpoles or building facades, interior track lighting, illuminating walls, security lighting, stage lighting, and sign lighting.

BR Light Bulbs

Bulged reflector (BR) light bulbs have a reflector that prevents light from becoming trapped in the bulbs' neck and sides and instead directs the light forward out the bulbs' top. These bulbs are commonly used as floodlights and corridor lights.

MR Light Bulbs

Multifaceted reflector (MR) light bulbs have several internal reflectors that direct light at a precise angle as it exits the bulbs. MR bulbs produce a narrow beam of light and are used in display cases and small task lights where the bulb is spotlighting objects that are a short distance away. These compact bulbs also fit into tight areas where the bulb will be concealed, such as elevator lights.

R Light Bulbs

Reflector (R) light bulbs have a reflective inner surface that intensifies the bulbs' light output. They install into track lights, can lights, and accent lights for general lighting applications.

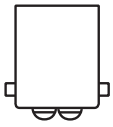
Bayonet-Base T-Shaped Miniature Light Bulbs



Bayonet-base miniature light bulbs are pushed into a compatible socket and then twisted. The bayonet base has lugs on either side that lock the bulb in place.

2-Pin Base T-Shaped Miniature Light Bulbs

These miniature light bulbs have two pins on the bottom of their base and are pushed into a compatible socket to install. The base type for each bulb has a number that indicates the distance between the pins, in millimeters. For example, a G4 base has two pins that are spaced 4mm apart.

Medium Prefocus (P28s) Base

No. 6DZH4

GE current a Daintree company EIKO CERTIFIED GREEN

Prefocus-Base T-Shaped Miniature Light Bulbs

The prefocus bases on these T-shaped miniature light bulbs have a ring or collar that helps ensure the bulbs are properly aligned when they are pushed into a compatible socket to install. Also known as P28s bases, medium prefocus light bulb bases have a 28mm dia. They have a smooth cap shape with two dimples on the sides and one contact on the bottom.

B-Shaped Miniature Light Bulbs

B-shaped miniature light bulbs have an oval shape with a rounded or pointed top. They are also known as bomb-, bullet-, blister-, or bulged-shaped bulbs. The bulbs have bayonet base with one or two contacts on the bottom and lugs on either side that lock the bulb in place when the base is pushed into a compatible socket and twisted.

RP-Shaped Miniature Light Bulbs

RP-shaped miniature light bulbs have a rounded pear shape that is wider at the top and narrower at the base. Sometimes called reflector pear bulbs, they have bayonet base with one or two contacts on the bottom and lugs on either side that lock the bulb in place when the base is pushed into a compatible socket and twisted.

High-Intensity Discharge (HID) Lamp Information

HID lamps offer high light output and have longer life expectancy than incandescent bulbs. **LED** lamps use significantly less energy and need to be replaced less often than other HID lamp types. They reach full brightness instantly, produce very little heat, and can withstand temperature changes, vibration, and humidity. **Ceramic metal halide and metal halide** lamps offer better color rendering than high-pressure sodium and mercury vapor lamps and are used for indoor and outdoor lighting. **High-pressure sodium** and **mercury vapor** lamps are used for outdoor, security, and roadway lighting. Ceramic metal halide, metal halide, high-pressure sodium, and mercury vapor lamps take a few minutes to reach full brightness and must cool down before they can be restruck after turning off.

Quick Guide to Color

Color Temperature	Color Designation
1800K	Orange
1900-2200K	Warm Yellow
2700K	Soft White
3000-3200K	Warm White, SP30
3400-3700K	Neutral White, SP35
3800-4500K	Cool White, SP41
5200-5700K	Blue White, SP50
6200-6700K	Daylight, SP65

Light Efficient Design

EX39 Mogul Screw-Base HID & LED HID-Replacement Light Bulbs

The EX39 extended mogul screw base on these light bulbs has a 39mm dia. and a longer center terminal than an E39 base. The bulbs screw into both E39 sockets (typically found on enclosed fixtures) and protected EX39 sockets (typically found on open fixtures). These bulbs are used in fixtures with a high mounting height, such as street lights, floodlights, and high-bay and low-bay lights in warehouses and convention centers.

E39 Mogul Screw-Base HID & LED HID-Replacement Light Bulbs

These light bulbs have an E39 mogul screw base with a 39mm dia. They screw into standard E39 sockets, which are typically found on enclosed fixtures. E39 mogul screw-base HID and LED HID-replacement are used in fixtures with a high mounting height, such as street lights, floodlights, and high-bay and low-bay lights in warehouses and convention centers.

Medium Screw (E26) Base

GE current a Daintree company PHILIPS
LumaPro Light Efficient Design

E26 Medium Screw-Base HID & LED HID-Replacement Light Bulbs

The most commonly used type of light bulb base, an E26 medium screw base has a 26mm dia. and screws into a compatible socket. E26 medium screw-base HID and LED HID-replacement bulbs are commonly used in post tops and bollards.

B22d Bayonet-Base LED HID-Replacement Light Bulbs

The B22d bayonet base on these light bulbs is a 22mm-dia. base with two contacts on the bottom and lugs on either side that lock the bulb in place when the base is pushed into a compatible socket and twisted. These LED bulbs replace low-pressure sodium (LPS or S0X) HID bulbs in outdoor light fixtures.

shat-r-shield INC. The Protective Lighting Company

Shatter-Resistant HID Light Bulbs

A surface coating keeps broken glass, mercury, and phosphors contained if the bulbs burst or break, which prevents these harmful contaminants from spreading into the surrounding area. Shatter-resistant HID light bulbs are used in manufacturing plants, food-processing facilities, and other settings where product contamination must be avoided. They are also used in areas where they may be exposed to shaking or impacts.

AIRCYCLE

Bulb Eater® Lamp Crushing Systems and Accessories

Bulb Eater 3
No. 20VR90

No. 401M81

Units safely crush fluorescent lamps into 100% recyclable material. Activated carbon and dust filters capture and neutralize over 99.99% of mercury vapors released in the process. Systems include one straight lamp tube, filter combo kit, spinner assembly, and carbon filter. No. 20VR90 accepts all fluorescent lamps when No. 20VR91 is added.

Notes: Use and recycling of the crushed lamps is regulated by the EPA. Not available in CA, CT, ME, MN, MO, NH, PA, RI, VT, WV. Permits required in NJ and MI; application required in TXand VA.

Lamps must be crushed in building where used.

Battery Recycling

RECYCLEPAK VEOLIA SERVICES
EverLights

Battery recycling products help users comply with regulations for recycling batteries, which may contain hazardous materials. **Prepaid recycling and disposal kits** come with containers, preprinted shipping labels, and shipping instructions for recycling specific types of batteries. Prepaid shipping fees and recycling costs are included with the kits, and a certificate of reclamation is available upon request. **Recycling tubes for standard batteries** can be placed in high-traffic areas such as copy rooms and supply rooms to collect dead batteries for recycling.

RECYCLEPAK VEOLIA EverLights

Recycling Kits

Kits come with the necessary items for recycling specific quantities of light bulbs, ballasts, and other products that contain hazardous materials in compliance with environmental regulations. RecyclePak® Kits include container (except where noted), preprinted address label; and certificate of reclamation. EverLights Kits have a pre-labeled container with state-specific universal waste shipping instructions and provide a certificate of reclamation upon request.

Note: For customers in Alaska, Hawaii, Arkansas, the Virgin Islands, Guam, and Puerto Rico, please call 1-800-GRAINGER (472-4643).

Floor Stand Exam and Surgical Lights

These reliable all-purpose lights provide high-intensity lighting and flexibility for just about any healthcare facility. Meet IEC standard. UL Listed.

Note: Accessories are available separately on Grainger.com®.

Exam Lights—These exam lights give off minimal heat, producing a cool light, to help provide a more-comfortable setting.

No. 35FT57 offers 2 illumination levels. Dual handles and K-arm allows for smooth positioning of light. No. 35FT58 has a Y-shaped design helping to minimize obstruction of light. Multiple reflectors can be tilted to adjust the lighting position. No. 35FT65 helps provide shadow-free operation. No. 35FT63 has a venting system that absorbs and filters out infrared. No. 35FT62 features a special optics system that helps provide exceptional lighting.

Surgical Lights—Shadow-free light with adjustable focus offers maximum intensity with minimal heat output. Flexible arm with extensive reach allows for a greater range of motion. Include footswitch, locking casters, hardware kit, and cord wrap.

Task Light—Designed to provide usable light while keeping patients comfortable, the dimmable light source is recessed inside the light head to reduce glare and minimize disruption to other patients. The ergonomic handle lets you aim the light where it's needed, and an integrated "night-watch" observation light lets nurses check on patients without disturbing them while they are sleeping.

Examination Lights

AIM—Energy-efficient lights are designed with a unique, Y-shaped head that facilitates placement of the light around the physician's head, minimizing the obstruction of light into the examination field.

Cool Spot—Provides pure, white light along with a no-drift arm, high-intensity setting, and variable spot-sized control.

Nova—Produce a cool light that enhances both physician and patient comfort while delivering a uniform beam pattern, and higher illumination levels. Designed with K-arm and dual handles that make it easy to position the light.

Outpatient—Low-maintenance light is an excellent choice for most examination applications in the hospital, physician's office, surgery center, and veterinary field. Sleek profile. Provides a virtually heat-free light so the patient remains comfortable.

Super Exam—Controls are mounted directly on the easy-access handle, so you can access all light functions and simultaneously aim the bright, white LED light exactly where you need it, all with a single hand. The drift-free spring-loaded arm helps make sure that the light stays put. A recessed light source helps reduce glare. A low-output mode lets you check on sleeping patients without disturbing them.

Carelite—Designed to provide usable light while keeping patients comfortable, the Carelite has a dimmable light source that is recessed inside the light head to reduce glare and minimize disruption to other patients. An integrated "night-watch" observation light lets nurses check on patients without disturbing them.

Task Lights

Versatile lights deliver strong illumination and are ideal for workstations and desktops in production, inspection, medical, and research applications.

Articulating Arm—Articulating arm system is easy to move and can be maintained in a fixed position.

Clamp-On—Lightweight lamps conveniently clip to desktops and workstations for quick and powerful light source.

Desk Lights—Illuminate any workstation in a fixed position.

Gooseneck—Deliver bright light and have a flexible neck that allows easy adjustment to desired position.

Pivoting Head—Swivel head allows adjustment and maneuverability.

Machine Tool Lights

Waldmann—Coolant-, lubricant-, and vibration-resistant tool lights are built to give you bright, dependable lighting in most volatile machining environments. LED Fixtures are waterproof, impact-resistant, and offer a variety of installation options. Waterproof fluorescent linear fixtures include a built-in electronic ballast. Fixtures have a 10-yr. warranty.

Electrix—Get energy efficient lighting around enclosed and open machinery and any other areas where coolants are in constant use. All models are provided with direct-mount universal brackets, or a variety of optional accessories to satisfy most mounting applications. Ideal for CNC and EDM wet location machinery, standard and large size lathes, milling machinery, metal working equipment, and tool manufacturing.

O.C. White—A solid die-cast aluminum body acts as the heat sink for the LED arrays, while a tempered safety glass and a slim, nickel-plated bezel protect the light source. If the light exceeds maximum temperature, the lamp automatically dims itself to cool down. Fixture can be easily mounted to just about any metal surface using the pre-installed high-strength neodymium magnets, or permanently affix using 4 countersunk holes. Up to 3 light fixtures can be run from a single power point. Use light on any mill, lathe, grinder, or a variety of other machines.

Hazardous Location Temporary Job Lights

Larson Electronics

Portable lighting provides a safe solution that is flexible and easy to manage in dangerous and confined spaces.

TEMPORARY JOB SITE LIGHTS

Feature a light head, mounted to a unit that is fabricated from nonsparking aluminum and hardware.

TEMPORARY STRING LIGHT

Ten durable hand-held lamps are connected in series. Designed with an eyelet hook for easy suspension. Resists damage from chemicals, abrasions, vibrations and impact.

Vandal-Resistant Lights

Harris Lighting
Innovative Lighting Designs Since 1970

- Vandal-, impact-, and corrosion-resistant

Portable work lights contain heavy-duty magnets and eyebolt. Safety yellow nonconductive housing. Clear polycarbonate lenses provide optimal lumen output; LED models feature a frosted lens, while all others have a prismatic lens. Great for shipbuilding, maintenance, aircraft assembly, mining, and other production areas.

Balloon Work Lights

- 5-15P NEMA plug
- Avg. rated life: 50,000 hr.

Lights have bright LED diodes, housed in a fiberglass housing for glare-free illumination and no bulb breakage. They set up easily; fold open like an umbrella, plug in and turn on. All include a carrying case and tie down set. Nos. 444P62, 444P66, and 444P61 include a tripod stand; Nos. 444P63, 444P64, and 444P66 have a hanging loop. No. 444P65 features solar panel and solar controller.

FoxFury Lighting Solutions · NightSearcher by ProBuilt · PELICAN · PROLIGHT by ProBuilt

LED Remote-Area Lights

Weather-resistant systems illuminate remote locations.

FoxFury—Quick-deploy area/spotlights are waterproof to 9.8 ft. Included AC or DC cables can be used to drive the system directly, or to recharge the battery. Nos. 44M834 and 44ZY99 offer 360° scene, 120° area, and 12° spotlight.

Pelican™—The practical, durable, watertight design packs an LED lighthead mounted in an aluminum heat sink into a single case. Tough injection-molded ABS glass-filled nylon housing with telescoping mast and 360° articulated light arrays stands up to tough field use. Includes 110V charger.

WOBBLELIGHT by ProBuilt

Self-Righting Work Lights

- 120V
- Polycarbonate dome protects bulb
- Project light in 20- to 100-ft. dia. arc, depending upon bulb wattage

Self-righting bases cannot be knocked over, for stable lighting with no bulb breakage. Require no setup; just plug in. Internal ventilation system keeps lights cool to the touch.

STREAMLIGHT

Dualie® 3AA LED Flashlights

- Submersible to 1 meter for 30 min.
- Intrinsically Safe - Class I, II, Div. 1

Rugged multifunction LED lights feature intuitive, independent switching for each function. The tough non-conductive, corrosion-proof polymer resin construction is impact-resistant to 2 meters and has an integrated low-profile pocket clip to help you keep your hands free for performing other tasks. Nos. 52VG80 and 52VG81 include a red laser pointer that can be used either on its own, or simultaneously with the forward-facing spot beam to identify equipment or hazards from a distance. Nos. 52NY68 and 52NY69 have an integrated magnetic clip to provide you with another option for hands-free lighting.

Tactical Flashlights

These compact flashlights offer high performance, high durability, and feature enhanced body texture for improved grip. Suitable for professionals in challenging environments, such as law enforcement, military, and security. High-lumen lights feature tail switch operation, which may include strobe for temporary disabling. Sizes range from smaller hand held for ease of transport on belt to larger, heavier lights for security forces who may want to use light as a baton or to break through auto glass.

Disposable Standard Batteries

Dayton Energizer DURACELL RAYOVAC STREAMLIGHT

Alkaline batteries are the most-common choice for most everyday applications. Lithium batteries provide level, consistent performance in all devices, including high-power-draw devices. Designed to be leakproof and perform well in extreme temperatures, from -40° to 140°F.

Everyday—All-purpose batteries for everyday use in devices such as flashlights, remote controls, clocks, smoke detectors, and other equipment that is used intermittently or has a low power draw.

Premium—Higher-tier batteries provide dependable performance in low-drain devices such as flashlights, remote controls, clocks, smoke detectors, medical devices, multimeters, and similar intermittent-use equipment.

High Performance—Top-tier, high-capacity batteries can handle power demand spikes from high-drain devices such as digital cameras, thermal imagers, digital audio players and recorders, drones, video game controllers, GPS equipment, and keyless locks.

Sealed Lead Acid Batteries

- Terminal location: Top

Sealed lead acid (SLA) batteries are heavy, block-shaped batteries for powering large equipment and industrial systems. Also called storage or standby batteries, sealed lead acid batteries are slow draining when not in use so they're often used in uninterruptible power supplies (UPS) and other backup or reserve power applications. The terminal placement and overall dimensions of an SLA battery must match the location of mating connectors and the installation space within equipment to ensure a proper fit.

Battery Chargers and Maintainers

GA GRAINGER APPROVED

Sealed lead acid battery chargers and maintainers recharge or maintain the charge of SLA batteries so they're ready for use. These trickle chargers supply a slow, constant charge that typically takes hours to reach full capacity. Slow charging reduces the risk of damage to the battery while maximizing the charge level and life cycle. Charging a battery fully replenishes its charge before it's returned to service, while maintaining a battery keeps it at full charge during storage. Sealed lead acid battery chargers and maintainers should match the voltage of the battery being charged. These devices are commonly used by service and repair personnel. For more chargers see page 927.

FLUKE

Digital Multimeters

Rugged, high-quality meters are designed for field professionals in a wide range of applications. All except No. 24K480 feature audible continuity.

FLUKE 3000FC SERIES WIRELESS MULTIMETER

True-RMS Wireless Multimeter with Fluke Connect® and ShareLive™ video call. Designed for professional technicians to troubleshoot and repair many problems in electrical and electronic systems. AC and DC voltage measurements to 1000V. AC and DC current with 0.01mA resolution. Continuity, resistance, diode test, capacitance, and frequency measurements. Min./max. recording. CAT III 1000V, CAT IV 600; IP54.

FLUKE 289 TRUE RMS INDUSTRIAL LOGGING MULTIMETER

Industrial logging multimeter designed to solve complex problems in electronic, plant, automation, power distribution, and electro-mechanical equipment. Log data and review it graphically on-screen, solve problems faster, and help minimize downtime. Communicate wirelessly with Fluke Connect and ir3000 FC wireless connector (sold separately).

FLUKE 28 II EX INTRINSICALLY SAFE TRUE RMS DIGITAL MULTIMETER

Completely sealed, IP67 case. 10-ft. drop-resistant. For testing and troubleshooting in petroleum, chemical, or pharmaceutical environments and other hazardous zones: Class 1 Div. 1 Zone and 2 (gas), Class 2 Div. 1, and Class III Zone 21 (dust) areas. The enclosure is IEC 6029 water and dustproof. CAT III 1000V pollution degree 2 and CAT IV 600V pollution degree 2. Intrinsically safe and regulatory compliance certifications include Aex ia IIC T4 and AEx iaD T130°C.

Fluke 116 HVAC Multimeters with Temperature and Microamps

Auto-V automatic AC/DC voltage detection helps eliminate guesswork and LoZ low-impedance input reduces chance of false readings due to ghost voltage. Built-in thermometer and microamp measurements quickly troubleshoot problems with HVAC equipment and flame sensors.

FLUKE 179 TRUE RMS DMMS

Ideal for working with HVAC or electrical equipment, or in small spaces. Feature a digital display with analog bar graph and built-in temperature measurements. All inputs are protected to IEN61010-1 CAT IV 600V/CAT III 1000V. CSA Certified and TuV Listed.

Digital Multimeters Kits

FLUKE.

Rugged, high-quality meters with advanced feature sets are designed for field professionals in a wide range of applications.

Description	Includes	Mfr. Model	Item No.
Fluke Connect® Kits			
Wireless Temperature Kit	Multimeter, Test Leads, Alligator Clips, Bead Probe, Magnet Strap, Quick Start Guide Only	FLK-T3000FC K	**31FN20**
AC and DC Voltage Module Kit	Multimeter, Test Leads, Alligator Clips, Batteries, Magnet Strap, Soft Case, Information Pack	FLK-V3003FC K	**31FN27**
AC Voltage Module Kit	Multimeter, Test Leads, Alligator Clips, Batteries, Magnet Strap, Soft Case, Information Pack	FLK-V3000FC K	**31FN22**
DC Voltage Module Kit	Multimeter, Test Leads, Alligator Clips, Batteries, Magnet Strap, Soft Case, Information Pack	FLK-V3001FC K	**31FN26**
Wireless General Maintenance Kit	Multimeter, 3X Test Leads, 3X Alligator Clips, 1X Current Module, 1X iFlex Coil, 1X AC Voltage Module, 1X DC Voltage Module, 1X PC Adapter, 1X Windows Software CD, Batteries, Soft Case, Information Pack	FLK-3000FC G	**31FN11**
Wireless HVAC System Kit	Multimeter, 1X Test Leads, 1X Alligator Clips, 1X Current Clamp, 1X Temperature Module, 1X PC Adapter, 1X Windows Software CD, Batteries, Soft Case, Information Pack	FLK-3000FC H	**31FN12**
Wireless Industrial Kit	Multimeter, 2X Test Leads, 2X Alligator Clips, 3X Current Module, 3X iFlex Coil, 1X AC Voltage Module, 1X PC Adapter, 1X Windows Software CD, Batteries, Soft Case, Information Pack	FLK-3000FC I	**31FN13**
Digital Multimeter Kit	3000FC Multimeter, Batteries, Test Leads, Alligator Clips, IR Adapter, PC Software, Magnet Hanger, Softcase, Thermocouple Adapter, Manual CD	287/FVF/IR3000/WWG	**45GG41**
Digital Multimeter Kit	3000FC Multimeter, Batteries, Test Leads, Alligator Clips, IR Adapter, PC Software, Magnet Hanger, Softcase, Thermocouple Adapter, Manual CD	289/FVF/IR3000/WWG	**45GG42**
Fluke Connect® DMM			
Digital Multimeter Kit	Software, Cable, Thermocouple, Test Lead Set, Alligator Clips, Magnetic Meter Hanger, Soft Carrying Case, Instructions	Fluke-289/FVF	**1EVC7**
Digital Multimeter Kit	Batteries, Test Leads, Alligator Clips, Temperature Probe, Interface Cable, Software, Instructions, Magnetic Hanging Kit	Fluke-287/FVF	**4CPU5**
Kits			
Automotive Multimeter Kit	Fluke 88V Automotive Digital Multimeter, No. 3MU86 Leads (TL224), No. 3MU87 Probes (TP220),No. 3MU85 Alligator Clips (AC285), No. 4XL48 Hanger (TPAK) No. 2DPH6 Temp. Probe (80BK-A),No. 5U843 RPM Pick-up (RPM80) 2 Probe Pins, Insulation Piercing Clip, No. 5U830 Case, (C800),No. 4YE79 Holster, 9V Battery and Instructions	Fluke 88 V/A	**5BB61**
Digital Multimeter Kit	Soft Case, Electronic Test Probes, Silicone Test Leads, Heavy Duty Hook Clips,Magnetic Hanging Kit, Integrated Temp. Probe	Fluke 179/EDA2 Kit	**1LWZ6**
Digital Multimeter Kit	Test Leads, Alligator Clips, Temp. Probe, Magnetic Hanging Kit, Yellow Meter Boot, Soft Case	Fluke-87-V/E2	**1PEK9**
Digital Multimeter Kit	Silicone Test Leads, Long Reach Alligator Clips, Test Probes, Magnetic Meter Hanging Kit, Temperature Probe, Lightweight Soft Accessory Case, 9V Battery (Installed), Getting Started Manual	Fluke-87-V/E2 NIST	**4EB22**
Infrared Thermometer Kit	Mfg. No. Fluke-62 MAX+, T+PRO, Fluke 1AC-II, Fluke C115 Soft Case, Battery, Instruction Sheet and Information Sheet	Fluke62Max+/T+P/1AC	**46N344**
Infrared Thermometer Kit	Mfg. No. Fluke-62 MAX+, Fluke-323, Fluke 1AC II, Fluke C115 Soft Case, TL175; Battery, Registration Card and Instruction Sheet	Fluke62Max+/323/1AC	**46N345**
Digital Multimeter, Clamp On Kit	Mfg. No. Fluke-116 Multimeter w/Batteries, TL175 Test Leads, TPAK Hanging Strap, 80pk-11 Pipe Clamp Thermocouple, 80BK Integrated Temperature Probe, 80AK-A Thermocouple Adapter, C115 Soft Carry Case, Fluke-323 True RMS Clamp Meter, Information Pack	FLUKE-116/323	**46N341**
Digital Multimeter, Clamp On Kit	Mfg. No. Fluke-117 Multimeter w/Batteries, TL175 Test Leads, TPAK Hanging Strap, C115 Soft Carry Case, Fluke-323 True RMS Clamp Meter, Information Pack	FLUKE-117/323	**46N342**
Digital Multimeter Kit	3000FC Multimeter, Batteries, Test Leads, Alligator Clips, 1AC-II Voltage Detector	3000FC/1AC-II/WWG	**45GG40**
Digital Multimeter Kit	3000FC Multimeter, (3) AA Batteries, Test Leads (TL224), Hook Clips, Sharp Test Probes, Soft Case, Magnet Hanger, CD	3000FC/EDA2/WWG	**45GG43**
Wireless Digital Multimeter Hanging Kit	3000FC Multimeter, (3) AA Batteries, Test Leads, Soft Case, Magnet Hanger, CD	3000FC/TPAK/WWG	**45GG44**
Digital Multimeter, Infrared Thermometer Kit	Mfg. No. Fluke-116 Multimeter w/Batteries, TL175 Test Leads,TPAK Hanging Strap, 80pk-11 Pipe Clamp Thermocouple, 80BK Integrated Temperature Probe, 80AK-A Thermocouple Adapter, C115 Soft Carry Case, 62Max Infrared Thermometer, Information Pack	FLUKE-116/62Max+	**46N340**
Digital Multimeter Kit	Digital Multimeter, Battery, Battery Charger and Adapter, Test Leads, Alligator Clips, Flexible Current Probe, Carrying Case, Hanging Strap	FLK279FC/IFLEX	**48RH42**
Digital Multimeter Kit	Battery, Test Leads Thermocouple, Alligator Clips and Fluke PRV240 Proving Unit Kit	FLUKE-87V/PRV	**40KJ11**
Digital Multimeter Kit	Battery, Test Leads and Fluke PRV240 Proving Unit Kit	FLUKE-117/PRV	**40KJ12**
Soft Carrying Case	Detachable, Extendable Shoulder Strap	C280	**2VFZ9**
Accessories			
Modular Test Lead Kit	Mfr. No. AC220 SureGrip(TM) Alligator Clip Set, Mfr. No. TP220 SureGrip(TM) Test Probe Set, Mfr. No. TL222 SureGrip(TM) Silicone Test Lead Set (Standard)	Fluke-TL220	**3EB21**

Digital Multimeters

EXTECH INSTRUMENTS · WESTWARD · AMPROBE · FLIR

Audible continuity lets your eyes focus on other test results. Each includes test leads and batteries. Select models have the following features. Low-impedance (LoZ) mode prevents false readings caused by ghost voltages. Low-pass filter (LP) reduces noise for accurate readings. Microamp (M) measurement is for HVAC flame rod applications. Noncontact voltage (NCV) verifies power is off to help assure safe testing. True RMS (TRMS) boosts accuracy when reading noisy, distorted, or nonsinusoidal waveforms.

Extech® Pocket—Easy-to-read meters slip into your pocket to keep with you at all times—great for most mechanics and technicians.

Extech Compact EX350 Series—Advanced features include LoZ and Low-Pass Filter.

Extech Compact EX360 Series—No. 40JK37 is designed for electrical applications, No. 40JK38 for HVAC applications. Both include LoZ.

Extech Full-Size EX400 Series—1" digits are easy to read.

Westward Kit—Conveniently combines digital multimeter No. 22XX19 with infrared thermometer No. 28AF72 and accessories for on-the-go maintenance and troubleshooting.

Amprobe® Pocket Digital Multimeters—No. 1WKN7: one-handed, pen-style meter has digital/analog displays. Nos. 1WKN3 and 1WKN5: ⅜"-thick meters display large digits with icons. Convenient attached test leads. No. 1WKN5 automatically selects resistance or AC or DC voltage.

Amprobe Full-Size Digital Multimeters—No. 1WKP5 performs component and logic tests. No. 12U584, for electrical contractors, checks voltage, current, continuity, resistance, startup capacitors, capacitor banks, frequency, and temperature. Nos. 34K450 and 12U583 offer HVAC-specific features.

FLIR® Industrial—Nos. 22UL80 and 22UL81 have integrated Bluetooth® connectivity compatible with the FLIR Tools mobile app.

No. 22XX21

No. 444M24

FLIR

DM284 Imaging Multimeter

- True RMS AC voltage and current
- High-contrast TFT LCD

Visually guides you to the exact location of an electrical problem with Infrared Guided Measurement (IGM) technology powered by a built-in 160 x 120 FLIR® thermal imager. Features LoZ (low-impedance mode) and VFD (low-pass filter) to help you solve even the most complicated electrical issues. Complete with test leads, test lead holder, alligator clips, and Type K Thermocouple.

EXTECH INSTRUMENTS

Waterproof Multimeters

Designed for heavy use in industrial applications. Measure AC/DC voltage and current, resistance, dual-sensitivity frequency (electrical and electronic), duty cycle, audible continuity, 2.8V diode test, and have data hold and auto-off functions. No. 1PTK1 is average responding. No. 1PTK3 also measures temperature. No. 2ELP6 has an analog bargraph. No. 2ELP7 also has 0.06% basic accuracy and a 40,000-count display. All models include test leads, magnetic hanging strap, carrying case, and 9V battery. All except No. 1PTK1 also have Type K temperature probe.

Simpson

Analog Multimeters

Analog display gives you a quick visual status check. Each includes test leads and batteries.

Simpson Instruments accuracy: VAC ±3% full scale, VDC ±2% full scale.

Rugged No. 4CWP2 is designed for railroad signaling and communications service, with an AC current transformer, current-limiting diode, and adjustable pointer stop. Padded case.

Note: Simpson Instruments optional clamp current probes Nos. 2T416 or 2T978 extend meters' AC capability up to 250A; sold separately on Grainger.com® or call 1-800-GRAINGER (472-4643).

True RMS Current vs. Inrush Current

TRUE RMS
- "RMS" (root mean square) comes from a formula that calculates the effective value (or heating value) of any AC wave shape
- Electrical components such as fuses, bus bars, conductors, and circuit breakers are rated in RMS current because their main limitation has to do with heat dissipation
- When checking an electrical circuit for overloading, the RMS current is measured and compared to the rated value for the component in question
- For circuits with AC and DC components or distorted signals, a meter with an AC+DC function is used

INRUSH
- Fluke® clamps' proprietary inrush (starting) measurement takes a large number of samples at the beginning of the starting current, then digitally filters and processes the samples to calculate the actual starting current
- Measure starting current in the same manner as an overcurrent protection device
- More accurate than slower min./max. functions that can miss the event partially or completely

FLUKE.

Clamp Meters

Each includes a soft carrying case.

GENERAL PURPOSE

Fluke 323/324/325 True RMS AC
- Continuity for quick checking of shorts
- Capacitance and temperature (324 and 325)
- AC/DC current measurement (325)

Small size fits easily into tight places. CAT IV 300V, CAT III 600V.

Fluke 324
No. 20E890

HEAVY INDUSTRIAL

Fluke 353/355 True RMS AC/DC 2000A
- AC+DC true RMS ensures accurate measurement of AC+DC and distorted signals
- Selectable low-pass filter to smooth out noisy loads and stabilize readings

Measure frequency up to 1 kHz for optimum troubleshooting. Quickly analyze readings using the min., max., and avg. functions. CAT IV 600V.

Fluke 355
No. 2FTY9

HVAC/R

Fluke 902 FC
- Flue gas temperatures with Type K thermocouple
- Flame rod testing with µA current measurement range
- Capacitance measurement

CAT IV 300V.

Fluke 902 FC
No. 48RH39

DETACHABLE JAW

Fluke 365 True RMS AC/DC
- Built-in flashlight/torch
- Designed for use while wearing personal protective equipment
- 200A AC/DC

Detachable jaw eases wire access and viewing the display. Compact design fits in your hand. CAT III 600V, CAT IV 300V.

Fluke 365
No. 6FXH8

FLUKE CONNECT® CLAMP METER
- True RMS
- Measures up to 400A AC
- Inrush function

Fully functional meter wirelessly relays measurements to other Fluke Connect-enabled master units. Designed to be used as a standalone or as part of a system. Features logging function for recording and saving up to 65,000 readings.

Fluke A3000FC
No. 31FN14

Clamp Meters and Flexible Current Probes

FLUKE

Wires in tight, compact spaces. Panels out of reach. Feature extra large conductors. Designed for noise-free, reliable readings. Built on success, these clamp meters are known as workhorse clamp meters. With advanced performance, the clamp meter line is simple to use and gimmick-free.

FLUKE-373 TRUE RMS CLAMP METER

Offers advanced troubleshooting performance that is perfect for a number of AC-only current measurements. The state-of-the-art signal processing technology cuts through electrical noise to help you get stable, dependable measurements that are easy to read on the large, backit LCD. Automatically sets the correct range, so you won't have to change positions while taking a measurement. Includes clamp meter, test leads, and soft case. CAT IV 300V; CAT III 600V.

Fluke 373
No. 6FXH7

REMOTE DISPLAY CLAMP METER

Fluke 381 Remote Display True RMS AC/DC with iFlex™

- Designed to increase productivity and save troubleshooting time
- Frequency measurement to 500 Hz with jaw or iFlex
- Min./max./avg. and inrush recording captures variations automatically
- Radio transmitter Auto-Off when display is connected to meter

The removable magnetic, wireless display increases measurement flexibility. It can be conveniently mounted where it is easily seen, and carried up to 30 ft. from the point of measurement without interfering with measurement accuracy. Integrated low-pass filter and state-of-the-art signal processing allow stable readings in noisy electrical environments. CAT IV 600V, CAT III 1000V.

FLUKE CONNECT FLEX CLAMP METER KIT

Provides all the essentials for convenient test and measurement troubleshooting.

IFLEX™ FLEXIBLE CURRENT PROBES

Fluke i2500-18 and i2500-10

- 2500A AC current measurement
- Small cross-section for improved wire access
- Provide inrush and frequency on select Fluke meters, including those on this page

Fluke I2500
No. 6FXJ0

Expand a clamp meter's measurement range to 2500A AC. The probes also provide increased display flexibility, ability to measure awkwardly sized conductors, and improved wire access. Connect directly to the meter, displaying current measurements without error-prone scaling factors. 6-ft. cord allows separation between the measurement location and the clamp meter, making it easier to view the display. 0.3" coil dia. allows measurement in tight spaces. CAT IV 600V, CAT III 1000V.

Fluke Connect® Wireless Current Modules

FLUKE

Designed to take 3-phase measurements in ⅓ of the time. Record over time to monitor circuit load changes for an hour, a shift, or a week. Use Fluke Connect® wireless to collect and share logged data from remote modules. Perform analysis with your PC and share the results using Fluke Cloud™ storage and ShareLive™ video call. Video data or graphs to get input from team members.

FLUKE A3000 FC WIRELESS AC CURRENT CLAMP MODULE

True RMS current clamp meter. Fluke Connect enabled.

FLUKE A3001 FC WIRELESS IFLEX® AC CURRENT MODULE

True RMS flexible current meter. Measure around awkward-sized conductors or get into tight spaces. Fluke Connect enabled.

FLUKE 370 FC SERIES CLAMP METERS

True RMS meters offer advanced troubleshooting performance. The iFlex® flexible current probe allows easy connections to wires in tight spaces. In addition, all three clamps are now part of the Fluke Connect® family of wireless test tools. With a 370 FC Series Clamp Meter and Fluke Connect Measurements app, you can log and trend measurements to pinpoint intermittent faults. Transmit results wirelessly via Fluke Connect Measurement app. Create and send reports right from the field. Capture measurements outside the arc flash zone with Bluetooth® connectivity to your Apple® or Android™ devices.

Imaging 600A True RMS AC/DC Clamp Meters with IGM™

FLIR

- Frequency counter: 60 kHz
- Smart diode with disable
- Inrush current
- LoZ
- Variable-frequency drive (VFD) low-pass filter
- 60 Hz frequency calibration

2-in-1 testers have a built-in thermal imager that uses Infrared Guided Measurement™ (IGM) and a laser pointer with crosshair to pinpoint potential electrical problems and capture center-point temperature readings. The narrow jaw and built-in worklights help you enter tight or dark locations. Both models include CAT IV silicon test leads and AAA batteries. CAT IV 600V. No. 444M26 can also datalog and store 10 sets of 40,000 scalar measurements and 100 images. Bluetooth® connectivity for easy transfer to a PC and direct connection to FLIR Tools™.

Clamp Meters with IR Thermometer

FLIR

Commercial-grade electrician's 1000A meters also provide noncontact infrared temperature measurements on vents, equipment, and motors. Measure voltage, resistance, frequency, AC/DC current, and capacitance, with min./max./avg., rel., data hold, and peak hold. LCD shows results, or stream them to a compatible mobile device with the free FLIR Tools™ Mobile App. Readings also can be transmitted directly to a FLIR® METERLiNK™-enabled thermal imaging camera (see page 607). CAT IV 600V, CAT III 1000V safety rating. Each includes test leads and battery. No. 22UL79 includes calibration certificate.

Clamp Meters

EXTECH INSTRUMENTS FLIR

1000A SERIES INDUSTRIAL

These tough meters have a built-in noncontact infrared thermometer and allow you to locate hot spots and overheating motors. All models have peak hold to capture inrush current and transients. Include Type K bead wire probe, belt holster, 9V battery, and soft carrying case. Nos. 4GGD9 and 4GGE1 also include professional test lead kit.

HIGH CURRENT—1500A AND 2000A

High-capacity models support a variety of measuring functions and feature true RMS sensing. Each includes test leads and 9V battery. Nos. 5LUT4 and 5LUT5 also include case.

HIGH CURRENT—3000A FLEX CLAMPS AND ADAPTERS

True RMS 3000A AC flex clamps are designed with a 0.3" (7.5mm) dia. coil to take measurements in tight or awkward spaces. Inrush current (100ms) for equipment startup spikes. Bright LED work lights provide easy navigation. Datalog up to 20,000 points for trend analysis. Bluetooth® communication for remote viewing and data transfer to mobile devices via FLIR Tools™ Mobile App.

Nos. 40GT09 and 40GT08 flex clamp adapters plug directly in any meter with standard banana plug inputs and 1 mV range to convert it into a 3000A clamp meter.

Clamp Meters

Maintenance and troubleshooting testers for electrical, industrial, and HVAC applications include battery(ies). Select models have the following features. True RMS (TRMS) provides accurate readings of noisy, distorted or nonsinusodial waveforms. Autosensing (AS) technology enables the meter to recognize the input and automatically switch to the correct mode of operation. Low-pass filter (LPF) attenuates high frequencies to reduce noise for accurate measurement of variable frequency drive signals. DC microamp (M) measurement is for flame rod applications.

MINI CLAMP METERS

Compact size allows measurements in tight locations. Include test leads and case.

HIGH RESOLUTION MINI SERIES

Devices feature DC autozero and accuracy at low currents, and are designed to operate in tight spaces. No. 2HPF6 provides noncontact frequency measurement to 10 kHz through the clamp jaws. Each includes case; all except No. 2HPF6 include test lead.

POCKET-SIZE WITH AUTOSENSE

5.8" x 2.4" x 1.2" testers have a compact 0.8" jaw that accommodates conductors up to 300MCM and allows measurement in tight locations.

EXTECH INSTRUMENTS

OPEN JAW WITH AUTOSENSE

Feature an open-jaw design for quick measurements in tight locations. No. 40JL43 has input impedance that automatically decreases with the input voltage to provide low-impedance testing of ghost voltages.

COMPACT CLAMP METERS

Pocket-size meters loaded with multimeter features and built-in noncontact voltage (NCV) detectors to meet many applications. Jaws fit conductors up to 500MCM.

MULTIFUNCTION HVAC

5-in-1 meters feature dual Type K thermocouple inputs for superheat differential measurement. Nos. 2HPF8 and 6RGL7 add IR thermocouple with laser pointer and 2 temp. probes. Each includes test leads and case.

600 SERIES ELECTRICAL

Low impedance (LoZ) mode helps eliminate false readings caused by ghost voltages in these meters with true RMS AC or AC/DC. Include test leads, No. 40JK35 also includes bead wire probe.

EXTECH INSTRUMENTS

Troubleshooting Kits

Essential diagostic, installation, and repair tools are combined in a handy carrying container to provide protection and organization for the meters and accessories.

No. 15X977

No. 4DKJ7

Includes	Mfr. Model	Item No.
Energy Audit Kit		
Mfr. No. MO290 Pinless Moisture Psychrometer Plus InfraRed Thermometer, Patented InfraRed Thermometer with Laser Pointer for Non Contact Surface Temperature Measurement, Pin Probe, AN200 CFM, CMM Mini Thermo Anemometer Plus Infrared Thermometer, CO250 Portable Indoor Air Quality CO2 Meter, Datalogger, Cable to Analyze Data On Your PC, BR200 Video Borescope, Wireless Inspection Camera, MicroSD Memory Card, Heavy Duty Hard Carrying Case	MO290-EK	**15X977**
Digital Multimeter Kit		
Mfr. No. EX505 Industrial Grade, CAT IV-600V, 4000 Count Display, Waterproof, Drop Proof, Rugged Multimeter with True RMS Functions, DV25 Dual Range AC Voltage Detector (24 to 1000VAC/100 to 1000VAC) Plus Flashlight with Audible, Visual Indication, Double Molded Housing, CAT IV-1000V Safety Rating, TL808 (8) Piece Professional Test Lead Kit with CAT III-1000V Safety Rating, Set of Double Molded Professional Test Leads, Type K Thermocouple Bead Probe and Type K to Banana Input Adaptor, Soft Carrying Case	EX505-K	**4DKJ7**

Clamp Meters

AMPROBE

No. 4FFJ8

No. 2ATU9

CAT III 600V safety rating unless otherwise noted. Select models are VAR clamps, which measure volts, amps, and resistance (continuity). Each includes carrying case. All except Nos. 38RX02 and 2ATU8 include test leads, and all include batteries.

ANALOG

Instrument works in cold temperatures where digital clamp LCD screens tend to freeze, and measures amps and volts without needing batteries. Cat IV 600V safety rating.

400 AMPS ELECTRICAL

A 180° rotating head measures AC current and helps take other readings in tight places.

600 AMPS ELECTRICAL

No. 2ATU9 has extra-thin jaws for frequency measurement and is overload protected.

Nos. 3DNY9 and 3DNZ1 show voltage and current on dual displays for voltage drop tests.

800 AMPS ELECTRICAL

VAR clamps for electrical and HVAC applications include relative readings; No. 2AUZ9 features true RMS.

1000 AMPS INDUSTRIAL AND HIGH CURRENT

No. 2ATU8 provides a wide range of measurements.

Nos. 4FFK1 is designed for high-current industrial applications, supporting a broad range of measuring functions with true RMS sensing. Large backlit display. No. 4FFK1 has CAT IV 600V safety rating.

No. 4NYX6

Clamp/Fork Meters

Milwaukee

Rugged, heavy-duty instruments feature true RMS measurement for greater accuracy. High-contrast, white-on-black, backlit display is easy to read. LED task light. Each includes test leads and AA batteries. Nos. 4NYX6 and 4NYX7 are CAT IV 600V. No. 4NYX6 features Lo-Z measurement to eliminate ghost voltage. No. 4NYX7 provides 600µA DC readings for flame rectification and has a dual banana thermocouple input for contact temperature measurement. No. 5MLK3 is CAT III 600V.

Voltage Testers

FLUKE.

Instruments are designed for use by electricians and professionals in industry, HVAC, and building maintenance. 2-yr. warranty.

Fluke T5-600 No. 4KF19

Fluke T6-600 No. 420J01

Fluke T+Pro No. 1CWL2

Fluke 9040 No. 2NV55

V3000 FC AC Voltage Module No. 31FN21

FLUKE T5 ELECTRICAL TESTERS

Compact pocket testers make easy and accurate OpenJaw™ current measurement.

FLUKE T6 ELECTRICAL TESTERS

Measure voltage without test leads using integrated FieldSense technology. Measure voltage through the open fork, without test lead contact to live voltage, without opening covers, or removing wire nuts. Use on wires up to AWG 4/0 (120mm²) carrying as much as 200A.

FLUKE T+/T+PRO VOLTAGE AND CONTINUITY TESTERS

- GFCI trip test

Vibration, light, and beeper indicate presence of voltage without the hazards of a solenoid tester. Low impedance avoids ghost errors.

FLUKE 9040 PHASE ROTATION INDICATOR

- 3-phase indicator
- Clear LCD

Powered by unit under test—no batteries required.

FLUKE CONNECT® VOLTAGE TESTERS

Designed to help you spend ⅓ the time taking 3-phase power readings, work safer, and communicate wirelessly with Fluke Connect app with these fully functional AC voltage meters.

VOLTAGE TESTER ACCESSORIES

T5-1000 Tester Kit

T5-1000 electrical tester No. 4KF17, 1AC-II VoltAlert™ No. 2KU25, and H5 Holster No. 4PD22.

T+PRO-1AC Electrical Tester and AC Voltage Detector Kit

T+PRO Voltage Tester No. 1CWL2 and 1AC-II VoltAlert™ No. 2KU25.

T5 Tester Accessory Starter Kit

TP220 SureGrip™ test probes with removable comfort grips No. 3MU87, AC285 SureGrip large-Jaw alligator clips No. 4FB12, and soft case.

Fluke T5 RLS Replacement Test Lead Set for T5-600 and T5-1000 No. 13E627

High Voltage Storm Restoration and Maintenance Tools

Personal Voltage Detector—Detects and alerts operator when in the presence of electrical fields or energized electrical equipment.

Noncontact Voltage Detectors—Noncontact voltage detectors gives indication with a typical detection distance of 10". A 15-min. charge will provide a full day use.

Voltmeters—Compact dual-stick voltmeters and phasing set with capacitance test point mode and peak hold. With 1% accuracy from reading.

Direct-Contact Voltage Detectors—Single-point instruments are designed to read voltage on a conductor up to 500kV line-to-ground.

Low-Voltage Detector—Used to detect stray voltage as low as 5 volts.

High Voltage Ammeter—Capability to take spot-load studies at transformers or any mid-span location, as well as phase balance studies on primary or secondary lines, all within accuracy of 1%. Takes True RMS AC current measurements up to 2000A, 25 to 500 Hz.

Hotsticks—Fiberglass sticks are designed and required to be used with voltmeters, noncontact and direct contact voltage detectors, and ammeters.

6 Ft.				S-6H	**35ME37** *

Required with PRX, DVM (2 required), DVI and HVA Instruments

No. 4JNV4

No. 2CJN9

AMPROBE

High Energy Tic Tracer

- Verifies presence of 30V to 122kVAC (above 1500V requires Hot Stick No. 2CJN9, sold separately)
- Visual and audible voltage indication
- Dropproof to 6 ft.

Utility tool safely checks transmission lines, power distribution equipment, downed power lines, fuses, and load break connectors. Includes 9V battery.

Description	Item No.
High Voltage Detector	**4JNV4**
Adjustable Hot Stick	**2CJN9**

EXTECH INSTRUMENTS | IDEAL

GFCI and AC Circuit Analyzers

Units measure loaded and unloaded AC line voltages; calculate and display % voltage drop and line impedance; and display peak line voltage and frequency. Offer selectable 12, 15, or 20A load. No. 5GCC8 includes test cord with 3-prong plug. CAT II 300V. No. 9TE53 is CAT III 300V.

No. 5GCC8

Item	Voltage	Load Current	Brand	Item No.
GFCI Analyzer	90 to 240VAC	6 to 9mA for GFCI, 30 to 37mA for EPD	Extech	**5GCC8**
AC Circuit Analyzer	85 to 265VAC	6 to 9mA for GFCI, Greater than 30mA for EPD	Suretest	**9TE53**

No. 4WRC5

GA GRAINGER APPROVED

Modular Test Lead Probes, Clips, and Extensions

No. 4WRC8 has a 4mm dia. sharp point and 2mm tip.

Nos. 4WRC5 and 4WRC7 have a 2mm dia. sharp point for hard-to-reach areas and recessed components.

No. 4WRC6 is flat-bladed.

No. 4WRA3 is insulation piercing, plunger style.

No. 4WRA2 is designed to test semiconductor interconnects and high-density circuit boards.

Nos. 4WRC1, 4WRA9, 4WRC2, and 4WRD4 are plunger style. No. 4WRA9 alligator clip tip grabs round fasteners. No. 4WRC1 is a hook clip. No. 4WRC2 is a pincer clip for testing areas in close contact. No. 4WRD4 is a bus bar clip.

Description	Instrument Safety Rating	Includes	Mfr. Model	Item No.
Clamp Test Leads				
5-Way Test Lead Set	CAT I 30V	1 pr. (red, black) flexible silicone-insulated leads	Fluke-TL26A	**1TC10**
Automotive Test Lead Set	CAT I 30V	1 pr. (red, black) flexible silicone-insulated leads	Fluke-TL28A	**1TC11**
Modular Test Lead Kits				
SureGrip™ Master Accessory Set	CAT IV 600V, CAT III 1000V	2 plunger-style alligator clips, 2 plunger-style hook clips, 2 plunger-style pincer clips, 2 alligator clips, 2 sharp test probes, 2 test leads, foldable pouch	Fluke-TLK-225	**4CB84**
Electronic Set	CAT II 300V	2 med. alligator clips, 2 probe-tip extenders, 2 test probes, 2 test clips with hook clips, 2 test clips with pincer-tip adapters, 2 test lead couplers, 2 bare-spade lugs, 2 test leads with stainless steel tips, foldable pouch	TL81A	**5XV77**
Electronics Master Set	CAT III 1000V, CAT II 300V	2 modular leads, 2 modular probes, 2 Minigrabber® jack sets, 2 med. alligator clips, 2 spade lugs with banan jack set, 2 couplers, 2 Micrograbbers®, 2 Micrograbber® leads, foldable pouch	TLK287	**2JYX5**
Industrial Master Set	CAT IV 600V, CAT III 1000V	2 test leads, 2 alligator clips, 2 hook clips, 2 large alligator clips, 2 test probes, hanging kit, thermocouple temp. probe, soft case	TLK289	**2JYX6**
SureGrip™ Deluxe Lead Set	CAT IV 600V, CAT III 1000V	Right-angle test leads, 2 styles of alligator clips: plunger-style and large jaw, sharp test probes, zippered vinyl case	Fluke-TLK-220	**4CB83**
SureGrip™ Electrical Lead Set	CAT IV 600V, CAT III 1000V	63" silicone-insulated test leads, test probe with flat blade, alligator clips with safety grip, spring-loaded jaws, wide 20mm opening	Fluke-TL223	**3EB22**
SureGrip™ High-Energy Lead Set	CAT IV 600V, CAT III 1000V	Modular insulated-tip test probes, modular probe extenders, modular test leads	Fluke-TL238	**4YE80**
Probe Test Leads (1 Pair)				
TwistGuard™ Test Leads	CAT IV 600V, CAT III 1000V, CAT II 1000V	Adjustable length probe tip with Wearguard™ to indicate wear	Fluke-TL175	**6YPT0**
Retractable Tip Test Probes, 5" L, PR	CAT IV 600V, CAT III 1000V	Interchangeable probes for use with most Fluke test lead sets	Fluke-TP175	**6YPT1**
Hard Point™ Test Lead Set	CAT IV 600V, CAT III 1000V	1 pr. (black, red) comfort-grip probes, 48" PVC insulated test leads with right-angle shrouded banana plugs	Fluke-TL75	**1T341**
Premium Test Lead Set	CAT IV 600V, CAT III 1000V	1 pr. (black, red) comfort-grip probes with silicone-insulated, right-angle test leads	Fluke-TL71	**4XL47**
RetractableTip Test Lead Set	CAT II 600V	1 pr. (black, red) test leads with sharp needle-point tips adjustable from 0mm to 76mm	Fluke-TL40	**1ND97**
Test Clips				
SureGrip™ Alligator Clips	CAT IV 600V, CAT III 1000V	1 pr. (red, black) small, insulated, nickel-plated jaws in plunger-style clips	Fluke-AC220	**3MU82**
SureGrip™ Hook Clips	CAT IV 600V, CAT III 1000V	1 pr. (red, black) nickel-plated jaws	Fluke-AC280	**3MU83**
SureGrip™ Pincer Clips	CAT IV 600V, CAT III 1000V	1 pr. (black, red) pin grabber jaws	Fluke-AC283	**3MU84**
SureGrip™ Alligator Clips 1.13" Opening	CAT IV 600V, CAT III 1000V	1 pr. (red, black) large alligator clips with nickel-plated steel jaws	Fluke-AC285	**3MU85**
Heavy Duty Bus Bar Clip Set	CAT III 600V	1 pr. (black, red), bus bar jaw	Fluke-AC87	**4YV66**
Heavy Duty Insulation Piercing Clip	CAT IV 600V, CAT III 1000V	1 red clip with banana plug	Fluke-AC89	**1TC26**
Test Lead Extentions (1 Pair)				
SureGrip™ Test Lead Extension Set	CAT IV 600V, CAT III 1000V	1 pr. (red, black) silicone-insulated leads with straight connectors on both ends	Fluke-TL221	**3EB19**
SureGrip™ Silicone Insulated Test Leads	CAT IV 600V, CAT III 1000V	1 pr. (red, black) shrouded leads with right-angle on both ends	Fluke-TL222	**3EB20**
SureGrip™ Insulated Test Leads	CAT IV 600V, CAT III 1000V	1 pr. (red, black) DMM test leads with safety shrouded, standard dia. banana plugs	Fluke-TL224	**3MU86**
Heavy Duty Test Leads	CAT III 1000V	1 pr. (red, black) straight leads	Fluke-TL27	**5PR89**
Test Lead Kits				
Basic Electronic Lead Set	CAT III 300V	Two 1m test leads (10A), 2 insulated alligator clips (5A), 2 insulated probe-tip extenders (3A), zippered vinyl soft case	Fluke-TL80A	**5XV76**
Test Probes (1 Pair)				
Slim Reach™ 2mm Diameter Tip	CAT IV 600V, CAT III 1000V	1 pr. (red, black) slender probes	Fluke-TP2	**4PD27**
Slim Reach™ 4mm Diameter Tip	CAT IV 600V, CAT III 1000V	1 pr. (red, black) slender probes	Fluke-TP4	**4PD28**

FLUKE.

Power Quality Troubleshooters

Additional accessories are available; call 1-800-GRAINGER (472-4643).

Rugged, reliable tools test power quality for troubleshooting, preventive maintenance, and analysis in industrial applications and utilities. PowerLog software included with select models allows data analysis, graphs, reports, and logging over time. Color LCD display.

FLUKE 437-II, 435-II, AND 434-II 3-PHASE TROUBLESHOOTERS

- Auto-trend automatically records every measurement without setup
- System monitoring: Up to 10 power quality parameters on 1 screen
- Inrush mode for troubleshooting nuisance circuit breaker tripping

Troubleshoot in real time: Cursors and zoom tools help analyze trends while background recording continues. Energy loss calculator quantifies classic active and reactive power measurements, unbalance, and harmonics to pinpoint the true dollar cost of system energy losses. No. 12Y317 measures up to 400 Hz to capture power quality measurements for avionic and military power systems. Nos. 12Y317 and 12Y316 capture transients up to 10µS. CAT IV 600V/CAT III 1000V safety rating for use at the service entrance. No. 12Y316 conducts tests according to the IEC 61000-4-30 Class A Standard.

FLUKE 345 POWER QUALITY CLAMP METER

- Clamp-on measurement of AC current up to 1400A RMS and DC current up to 2000A without breaking the circuit
- Troubleshoots harmonics with analysis and digital or graphical logs
- Inrush current: Captures and analyzes nuisance tripping, from 3 to 300 sec.

Accurate in noisy environments, even with distorted waveforms present on electronic loads with low-pass filter. Data logging identifies intermittent faults by logging any power parameters, including harmonics, for minutes or months. Includes PowerLog software. CAT IV 600V safety rating for use at the service entrance.

Power Quality Recorder and Loggers

Additional accessories are available; call 1-800-GRAINGER (472-4643).

Rugged, reliable tools test power quality for preventive maintenance and long-term recording and analysis in industrial applications and utilities.

VOLTAGE RECORDER

Fluke VR1710 Voltage Event Recorder

- Records all values continuously with no gaps
- CAT II 300V

Easily pinpoints the root cause of 1-phase voltage problems. Plugs directly into main power socket to capture data for fast, easy recording of voltage trends, dropouts, and power quality. Saves testing time by simultaneously recording events and voltage. Includes USB interface cable and software.

3-PHASE ENERGY LOGGERS

NIST Certified.

Fluke 1732/B and 1734/B

Easy-to-use, 3-phase electrical energy loggers help find the sources of electrical energy waste. Loggers discover when and where energy in your facility is being consumed—from service entrances to individual circuits. Connect with other Fluke Connect devices to simultaneously log up to 2 other measurement parameters (log virtually any parameter available on a Fluke Connect wireless digital multimeter or module).

Fluke 1736

This power logger can employ the Fluke Connect® Mobile App and desktop software to help you respond in real time to critical power quality and energy consumption data. The instrument automatically captures and logs more than 500 power quality parameters for energy studies and power quality logging, to help you optimize system reliability and cost savings. Comes with voltage test leads, 4 alligator clips, four 1500A flexible current probes, WiFi® adapter, 3 line cords, color coding set, Fluke Energy Analyze Plus software on a USB flash drive, and soft case.

3-Phase Power Quality Recorders

EXTECH INSTRUMENTS DRANETZ

No. 4DKJ9

- Backlit LCD shows 35 parameters

Work with 1- and 3-phase systems (wye and delta). Programmable sampling rates. Log voltage, current, sags or surges, harmonics, energy, power factor, power, and frequency.

Note: Additional accessories are available on Grainger.com®; search for "power quality recorders accessories."

PQ3400 Series—Provide true RMS power measurements on displays that can be read in direct sunlight. Adjustable CT and PT ratios. Log up to 30,000 readings in Microsoft® Excel® format on a removable SD memory card for easy data transfer. Each includes 4 voltage leads with alligator clips, universal 100 to 240VAC adapter, case, and AA batteries. Cat III 600V.

No. 32ZN35

No. 15E579 graphical power and harmonics analyzer shows simultaneous harmonics and waveform with peak values. Phase diagram with 3-phase system parameters, 3-phase voltage or current unbalanced ratio (VUR, AUR), and unbalanced factor. Captures transient events with programmable % threshold.

- **Kit current capability up to 3000A, probe dependent (clamp probes sold separately)**
- 2 GB SD memory card

382100 Series—Provides simultaneous display of true RMS data. Adjustable CT and PT ratios. Includes three 1200A current clamps, 4 voltage leads with alligator clips, AC adapter, AA batteries, and case. CAT III 600V.

- Optically isolated RS-232 interface; USB adapter

PQ3350 Series—Provide clamp-on true RMS power measurements with simultaneous display. Adjustable CT and VT ratios. Measure 1- and 3-phase/3-wire or 3-phase/4-wire systems with datalogs (52,428 1-phase readings, 17,476 3-phase). Each includes 3 flexible clamp probes (1200A, 12" PQ3350-1; 3000A, 24" PQ3350-3), 4 voltage leads with alligator clips and retractable plunger clips, USB cable, software, AC adapter, case, and AA batteries. CAT III 600V.

- **Graphic phase diagram with 3-phase system parameters**
- **Peak capture**
- **Optically isolated USB interface**

Power Quality Recorders—The Dranetz HDPQ merges state-of-the-art power monitoring capabilities with excellent communication capabilities to provide users with an exceptional monitoring experience. Each instrument has a built-in 7" color widescreen LCD user interface for monitoring setup and data review. By putting operator safety first, the Dranetz HDPQ also enables users to review data and change settings remotely from virtually any Smartphone or Tablet mobile device, along with traditional PC and Mac laptops and desktops. Just hook up the instrument, close the cabinet doors to the "safe" the environment, and use either a free third party VNC App or the Dranetz HDPQ Apple® or Android™ App.

AEMC INSTRUMENTS EXTECH INSTRUMENTS

No. 2KGY1

No. 5LUT6

AEMC® CL601—Self-contained, data logging, true RMS AC clamp-on current logger offers simple 1-button operation with no exposed connections. 64 samples per cycle. Overload indication. Includes DataView® software, USB cable, and batteries.

- Jaw opening: 1.7"
- 5 LED indicators

AEMC L261—Provides continuous voltage recording for up to 8 wk. and real-time wave form viewing when connected to a PC. Sampling rate is programmable from ⅛ sec. to 1 in 24 hr. Has true RMS and DC voltage logging. Includes test leads, DataView software, interface cable, and batteries.

Extech® DL160—Can simultaneously measure 2 AC voltage inputs, 2 AC current inputs, or 1 each of AC voltage and AC current. Programmable sample rate from 1 sec. to 24 hr. Readings can be downloaded to a PC for analysis. Includes 2 current and 2 voltage sensor modules, 2 test leads, 2 alligator clips, software, USB cable, universal AC adapter, and batteries.

Extech DL150—Has programmable sample rate from 1 sec. to 24 hr., and true RMS readings to 600V or 200A. Data can be downloaded to a PC for analysis with included software. Includes current clamp, test leads, USB cable, universal AC adapter, and battery.

Milliohm Meters and Micro-Ohm Meters

Measure resistance of motor coils, circuit breaker contacts, transformers, and printed circuit board layouts. Test leads have Kelvin clip connectors.

AEMC®—No. 5GTJ1 has a polarity reversal switch for bidirectional testing and features overload and input fuse protection. Stores up to 99 test results. DataView® software included.

Seaward Cropico—4-terminal measurement with automatic or manual current range selection and open circuit lead warning LED. No. 39N142 measures temp. from -50° to 800°C, with automatic temperature compensation.

Extech® No. 1XU20—High-resolution instrument provides 7 resistance ranges, with automatic zero and built-in comparator for Hi/Lo/Go resistance testing or selection.

Extech Nos. 4PC52 and 5ZR91—Precision testers feature manual zero display adjust and over-range indication.

Extech No. 1XU18—Overtemperature/overvoltage protection, plus invalid test indicators and Auto-Hold.

Megger® No. 4WXR6—Power limited ranges, high power outputs, and 10A duty cycle ranges, with high noise immunity and up to 600V protection between terminals.

Megger Nos. 1APD9 and 1APE1—Low-resistance testers average forward and reverse readings and provide manual current selection or automatic testing of contact resistance and bonds. No. 1APE1 features selectable high/low test limits and stores up to 700 time-stamped tests to download via RS-232 interface.

No. 6NZF7

5k/10kVDC Output Megohmmeters and Voltage Tester

AMPROBE EXTECH INSTRUMENTS Megger

No. 21YE32

No. 40D468

Amprobe® No. 6NZF7—Automatically calculates PI (polarization index), DD (dielectric discharge), and DAR (dielectric absorption ratio). Step voltage tests. Noise (EMI) rejection filters, real-time graphs, and simultaneous display of all parameters. 1-sec. to 30-min. tests; 1000-test storage. Includes cables, shielded test leads, alligator set, test lead, software, and USB and RS-232 cables.

Extech® No. 21YE32—High-contrast OLED display with PI and DAR measurement. EnerSave™ limits test duration to save energy. Built-in heavy-duty carrying case with cover. Includes test leads.

Megger® MIT 400 Series—Insulation testing, capacitance measurement, TRMS and DC voltage measurement, PI, and DAR. Analog arc and dual-digital display. Timer function, pass/fail limit alarms, test button, and auto power down. Silicone lead set with clips. No. 49AG75 has Bluetooth® wireless data transfer and storage.

Megger No. 40D467—Automatically calculates PI and DAR. High noise immunity with specified guard terminal. 1000V protection between all terminals. Separate AC/DC voltage range with Hz. Locking/touch-proof test leads and tough dual case.

Megger Nos. 40D468 and 40D469—Automatically calculate PI, DAR, DD, and stepped voltage (SV). With 1000V protection and high noise immunity with specified guard terminal. Store date/time/temperature-stamped results with software. Separate AC/DC voltage range with Hz. Locking/touch-proof test leads, line supply, and dual case.

Megger No. 36MG30—Automatically performs PI, DAR tests. Separate AC/DC voltage range with Hz. Includes locking/touchproof test leads.

Megger No. 30KA05—Performs IR, timed IR, PI, DAR, DD, SV, and ramp test, with dedicated voltmeter function, high short circuit current, and high noise immunity. Stores results and data log for onscreen recall or transfer to PC. Double-insulated test leads. IP65 dust- and moisture-resistant dual case is fire-retardant.

AEMC® No. 6YPR4—Test voltages up to 1000V, 5000MΩ. Brushless alternator with solid-state rectifier, automatic discharge, folding crank, guard and ground terminal. Steady test voltage output across entire range. Designed for harsh environments, the case seals out rain, water, and dust.

Extech® No. 9XJ79—Fuse-protected meter with 3 test voltages, automatic discharge circuit, lock On, 1.3mA short circuit current, and continuity and resistance testing. Includes test leads with alligator clips, carrying case, and batteries. CAT III 1000V.

Megger® Nos. 3T841 and 3T843—Feature automatic discharge and guard terminal. No. 3T841 is lightweight—only 2.25 lb.—with an impact-resistant housing. Safety check, AC voltage range. Use No. 3T843 for high-resistance insulation testing.

Simpson® Electric No. 4CWN9—High-voltage (to 2000V) insulation tester features 8 test voltages, automatic discharge, AC/DC voltmeter, LED indicators, and lock On testing. Complete with test probes, permanently attached cables, 2 alligator clips, plug-in battery module, batteries, and carrying case.

Supco® No. 3T105—Includes test leads with alligator clips and carrying case. Requires 2 C batteries (not included).

UEi Test Instruments™ No. 46MV77—Hand-crank tester measures 100V, 500V, and 250V output ranges with 1-division accuracy. Damping time is more than 4 sec. Rugged sealed, water-resistant metal housing. Includes test leads.

Compact Digital Insulation Tester

EXTECH INSTRUMENTS

Troubleshooting tester has a wide measurement range (up to 1000V) and insulation resistance. Offers polarization index (PI), dielectric absorption ratio (DAR), 30V to 600VAC voltage, 10MΩ internal resistance test, low resistance (with zero function), and audible continuity. High voltage and overload indicators. Auto-discharge and voltage output warning functions. Backlit 2000-count dual display. 6" x 4" x 2.8", 1½-lb. housing. Includes test leads, alligator clips, batteries, snap-on protective hard cover, and soft pouch.

Motor Rotation Indicators and Testers

AEMC® INSTRUMENTS | AMPROBE | EXTECH® INSTRUMENTS | Megger | UEi TEST INSTRUMENTS

Devices help ensure correct motor/pump installation by identifying the phases and CW/CCW rotation, to prevent damage to the motor or electrical system.

AEMC® Phase Sequence Tester—Detects open or de-energized phases. Determines correct wiring for proper rotation. Color-coded leads and black alligator clips. Line powered; no battery required.

Amprobe® Phase Sequence Motor Rotation Tester—Tests power sources and motors, using test leads or wirelessly. L1/L2/L3 inputs. Convenient error display. Test leads, probes, alligator clips, carrying case, and AAA batteries.

Extech® Noncontact Phase Sequence Tester—Checks phase sequence and status on 3-phase power sources. Beeper indicates phase detected and if it is reversed. 3 built-in, 30" test leads have color-coded, fully insulated alligator clips. Case and AA batteries.

Extech Phase and Motor Rotation Tester—Checks phase orientation on 3-phase power sources and shows motor rotation. Indicates phase sequence and status.

Extech Phase Sequence Tester—Phase orientation on 3-phase power sources. Graphical and multiline indication. No battery required.

Megger® Phase and Motor Rotation Tester—Tests phase sequence and rotation, motor rotation, and transformer polarity without having to first energize the motor. Fuse-protected test leads, spare fuses, and battery.

UEi Test Instruments™ Hermetic Compressor Analyzer—Indicates motor winding continuity and ground faults. Breakout jacks for voltage and resistance, 3 ranges of 250VAC, dual AC voltage operation, and reverse motor option.

Earth/Ground Resistance Testers

EXTECH® INSTRUMENTS | Megger | AEMC® INSTRUMENTS | AMPROBE

Each includes carrying case and batteries.

Extech® Autoranging Clamp-On Tester 382357—Measures resistance current from 0.2mA to 30A. Programmable data logging with 116 data points. Automatic self-calibration, high/low alarms, and 9999-count LCD. Resistance check plate.

Megger® Autoranging Clamp-On Tester DET24C—Measures resistance current from 0.5mA to 35A and true RMS ground leakage current up to 35A RMS. Stores up to 2000 date- and time-stamped records. Electric noise filter, intelligent data hold, resistance and current alarms, and Bluetooth® download capability. Includes calibration check, wrist strap, and software.

AEMC® Autoranging Tester 4620—2- to 4-point ground resistance tester is fuse-protected to 250VAC. All error conditions are listed on the front panel, including low battery, overrange, and test lead shorts and lead reversals. Requires ground kit.

Amprobe® Autoranging GP-2A—3-point (fall of potential) or 2-point tests. Automatically calculates earth resistivity (4-point test). Automatically applies 3 testing frequencies for the most accurate reading. Holds 999 readings, with RS-232 for download to a PC. Includes test leads, auxiliary electrodes, and software for instrument autoranging.

Extech 4-Wire GRT300—Autoranging tester with automatic zero adjustment measures resistance current less than 2mA. Performs 4-, 3-, and 2-wire testing with automatic I (current) and P (potential) spike checks. AC earth voltage, test hold, data hold, and overrange and low battery indication. Includes test leads with alligator clips and 4 auxiliary earth bars. Pollution degree 2.

Megger 1-Button DET3TC—Ground rod and grid testing and noise rejection to 40V. Measures ground resistance without disconnect when used with clamp No. 2MY26, sold separately on Grainger.com®. IP54 weather-resistant. Includes probe and wire test kit.

Extech 3-Range Kit 382252—Measures earth/ground resistance in 3 ranges. Hold, auto-zero, Auto-Off, and overload protection. Indicates overrange and low battery. Includes test leads, 2 auxiliary earth bars, and rubber holster.

Transformer Turns Ratio Tester

Megger

Handheld instrument designed for use in harsh conditions tests 1- and 3-phase distribution and power transformers (phase by phase), potential and current transformers, and voltage regulators. Measures excitation current and polarity. Excitation voltage range: automatic 8VAC for distribution, power, or potential transformers; 0.5, 1.5, or 8VAC for current transformers. RS-232 port. Includes 6-ft. winding leads, pouch, and AA batteries.

Excitation Current Range	Turns Ratio Range	Accuracy	Mfr. Model	Item No.
0 to 100 mA	0.8 to 10,000	±0.2 to 0.25% Range Dependent	TTR20-1	**3GZX6**

Insulation and Leakage Testing Basics

Equipment—including motors, drives, cables, and transformers—relies on insulation for proper operation. In insulation testing, a relatively high DC voltage is used to make leakage current more apparent (similar to pressure testing a plumbing system). Although instruments supply high voltage, the current delivered is strictly limited to protect machinery and ensure operator safety.

Most digital multimeters have a resistance measurement capability, but this function uses just a few volts. What's needed is to test the insulation at a higher voltage than working voltage. This will ensure that any leakage will show up, and if there is a potential for arcing it will occur under controlled test conditions. If testing above the working voltage is not possible, insulation resistance can be determined by measuring leakage current directly with a leakage clamp meter.

No. 45ZA03

No. 5NLK7

No. 45ZA04

Insulation and Leakage Testers

FLUKE

Rugged and reliable testers are designed for troubleshooting and preventive maintenance applications. 1k to 10kVDC output tests insulation beyond working voltage and ensures that leakage and arcing are identified in a controlled testing environment.

FLUKE 1507/1503 MEGOHMMETERS

- Earth bond resistance measurement verifies grounding integrity

Insulation testers have a remote test probe that simplifies repetitive or hard-to-reach testing. No. 1BE65 has a CAT III 1000V, CAT IV 600V safety rating; No. 1BE68 has CAT III 600V. No. 1BE65 autocalculates polarization index (PI) and dielectric absorption ratio (DAR), saving time and money. Its pass/fail compare function enables repetitive tests.

FLUKE 1555/1550C MEGOHMMETERS

- Selectable test voltages: 50V increments from 250V to 1000V, 100V increments above 1000V
- Autocalculate polarization index (PI) and dielectric absorption ratio (DAR) with no additional setup
- Guard system prevents leakage current effect on high-resistance measurements
- Capacitance and leakage current measurement
- Ramp function for breakdown testing

Provide digital insulation testing up to 10,000V (1555) or 5000V (1550C)—the entire range of test voltages specified in IEEE 43-2000. Test a wide range of high-voltage equipment, including switchgear, motors, generators, and cables. Store up to 99 measurements with user-defined labels, with a PC interface for preventive or predictive maintenance programs. No. 5NLK9 includes heavy-duty alligator clips. Kits add NIST certificate of calibration, IP67 case, and heavy-duty alligator clips for 1550C. Instruments have CAT III 1000V, CAT IV 600V safety rating.

FLUKE 1587/1577 INSULATION TESTERS

- Autodischarge capacitive voltage
- AC/DC voltage, DC mV, AC/DC mA, resistance, and continuity

Instruments provide 2 powerful tools in 1—a multimeter and an insulation tester. Model 1587 No. 1BE59 adds capacitance, diode test, temp., min./max., frequency, and low-pass filter. Both have CAT III 1000V, CAT IV 600V safety rating.

FLUKE 1587FC/MDT ADVANCED MOTOR AND DRIVE KIT

- Polarization index (PI) with dielectric absorption ratio (DAR)
- Memory storage and temperature compensation through mobile app
- Bluetooth interface

Digital LCD (backlit), remote probe, contact temperature probe, phase rotation indicator, and VFD low-pass filter. Kit includes Fluke 1587FC Insulation Multimeter (No. 45ZA03), Fluke i400 Current Clamp (No. 4YE82), and Fluke 62 Max +IR Thermometer (No. 16X950). Instruments have CAT III 1000V, CAT IV 600V rating.

Vibration Testers

FLUKE

Vibration measurement and evaluation is one of the best ways to assess the condition of rotating machinery. These vibration testers make machine condition evaluation fast and simple for frontline technicians by providing onboard identification and severity of the most common mechanical faults: bearing impacting, shaft misalignment, looseness, and unbalance. Fault conditions are categorized as slight, moderate, serious, or extreme to help prioritize corrective actions.

FLUKE 810 VIBRATION TESTER

Compares machine vibration signatures to a database of hundreds of thousands of machines of many types, sizes, and configurations, to produce an instant diagnosis and severity without the need to build-up measurement baselines over time. Includes laser tachometer, tri-axial accelerometer with magnet, viewer PC software, training DVD, smart battery pack with charger. 3-yr. warranty.

FLUKE 805 FC VIBRATION METER

This Fluke Connect®-enabled wireless meter monitors machine condition with direct-measurement sensor tip, noncontact IR temperature sensor, and connector for external magnetic sensor accessory.

FLUKE

Earth/Ground Testers

Provide frontline troubleshooting and in-depth soil analysis—a complete solution for utilities, electrical contractors, industrial facilities, telecom, and data centers. Each includes required connections, leads, and hard case. Genuine Fluke® accessories are available; on Grainger.com®, search for "earth ground tester acc".

FLUKE 1623-2 AND 1625-2

Designed with 3- and 4-pole fall of potential and 4-pole soil resistivity testing. Also features selective earth ground rod testing using 1 clamp and stakeless earth ground rod testing using 2 clamps. No. 30JZ61 features automatic frequency control that identifies existing interference and selects a measurement frequency to minimize its effect; provides more accurate earth ground value. Also calculates earth ground impedance at 55 Hz to more accurately reflect the earth ground resistance that a fault to earth ground would see. Includes adjustable limits for faster testing. Kits Nos. 30JZ58 and 30JZ59 include 4 stakes, 3 wire spools, 2 clamps, cables, batteries, manual, and carrying case.

FLUKE 1621 BASIC EARTH/GROUND TESTER

- **Adjustable limits for fast testing**
- **Autochecks for noise voltage, with alert before testing**

The multimeter-like form is rugged and portable.

Portable Oscilloscopes

Connect-and-View™ automatic triggering captures complex signals. TrendPlot™ paperless recorder mode extends trend analysis up to 22 days. 5 versions of each model are complete kits that include FlukeView ScopeMeter software and hard carrying case. NIST versions include calibration certificates.

Note: Additional accessories are available on Grainger.com®; search for "fluke oscilloscope accessories."

FLUKE 190 SERIES

- DMM and paperless recording modes
- Color display
- Safety rating: CAT III 1000V, CAT IV 600V, with isolated floating inputs

Rugged instruments combine oscilloscope and digital multimeter (DMM) functionality in a single housing, for use in harsh environments. 60-, 100-, 200-, and 500-MHz oscilloscopes provide up to 2.5G samples per sec. (Sa/s) with advanced triggering, waveform measurement, and analysis. They feature 2- and 4-channel input. Each includes shielded 10:1V test lead, ground lead, 2 hook clips, 3 alligator clips, banana-to-BNC adapter, rechargeable Li-ion battery pack, and charger.

COMPACT SCOPEMETER® 120B SERIES

- Paperless recording
- Safety rating: CAT IV 600 V

5,000-count True-RMS digital multimeters combine an oscilloscope, multimeter, and paperless recorder in a rugged, IP51 housing for use in harsh environments. They integrate with the Fluke Connect® mobile app and FlukeView® for ScopeMeter software for easier collaboration, enhanced data analysis, and improved critical test information archiving. Fluke 125 models also perform harmonics and bus health test. Complete kit contents are listed on Grainger.com®.MDA-500 Series Motor Drive Analyzers

- Built-in report generator
- Color display
- Safety rating: CAT III 1000V, CAT IV 600V

Portable Motor-Drive Analyzers help ease troubleshooting for inverter-type motor drive systems, with guided testing and preset measurement profiles to make sure that you have the data that you need. Measure key motor-drive parameters, perform extended harmonics measurements, conduct guided measurements, and create reports all with a single tool. Graphical step-by-step voltage and current connection diagrams ease set-up.

FLUKE

Bench Digital Multimeters

- 2 x 4-wire, precision 4-wire resistance measurement technique
- Dual readings for interrelated measurements
- Interface ports for data capture to PC

Handle demanding measurements on a workbench or in a system. Each includes test leads, power cord, and spare line power fuse.

Description	Mfr. Model	Item No.
Accessory		
2x4 Wire Ohms 1000V Test Leads	TL2X4W-PTII	**1CXJ1**

FLUKE 8846A

- 6.5-digit resolution, up to 0.0025% accuracy
- Graphical display analysis modes with TrendPlot™, statistics, and histogram
- Includes USB memory device port

FLUKE 8808A

- 5.5-digit resolution, up to 0.015% accuracy
- Dedicated DC leakage range for sensitive current measurements

Current Transformers and Shunts for Digital and Analog Panel Meters

CURRENT TRANSFORMERS

Produce a 5A output for each primary range.

SHUNTS

50mV shunts enable a digital or analog panel meter to indicate higher DC currents than with a self-contained internal shunt. Portable units are mounted in a phenolic base. Switchboard units mount directly onto a busbar.

EXTECH INSTRUMENTS | B&K PRECISION ELECTRONIC TEST INSTRUMENTS

Single-Output DC Power Supplies

EXTECH®

Each includes power cord.

5% to 100% Current Limits

Nos. 6XAA3 and 6XAA5: Short circuit protection. Constant voltage or current. High load/line regulation. Banana plug output terminals. Low noise/ripple.

No. 13X092: Dual-action voltage and current control with push-knob for fine and coarse tuning. Automatic constant current and constant voltage crossover. Remote control for output voltage/current and On/Off. 2 custom voltage and current presets and 13.8V/20A factory preset. Overvoltage, overtemperature, and short-circuit protection. High RFI immunity and excellent EMI.

B&K PRECISION®

Constant Current

- Parallel or series connection
- Load regulation

No. 6T508: Overload, thermal, and short-circuit protection.

No. 2LUW9: Overload and short-circuit protection. Variable voltage output at continuous operation. Output selectable by slide switch.

No. 2LUW7: Overcurrent, overvoltage, and overtemperature protection. Automatically recalculates voltage/current limits for each setting. Output On/Off control. 100W max. output.

0% to 100% Current Limits

- Reverse polarity and overload protection
- Parallel or series connection
- 16 programmable preset outputs
- In-case calibration
- Output On/Off control
- Selectable 10mV/10mA resolution
- Load regulation

Each includes RS-232-to-TTL cable and software.

5% to 100% Current Limits

- Reverse polarity, overload, thermal, and short-circuit protection, except No. 1T197 reverse polarity and overload only
- Load regulation
- 0 to 30V models offer constant voltage and current and parallel or series connection
- 0 to 60V and 0 to 35V models offer current limiting, constant current, or voltage operation

Pomona® DESCO

Static Grounding Components, Kits, Systems, and Tester

Protect sensitive electronic components from static charge during assembly, repair, and transport.

Features	Brand	Item No.	Pkg. Qty.
Antistatic Heel Strap			
Blue, Elastic Hook and Loop Closure, Cross-linked Tire Grade Rubber Will Not Leave Black Marks on Floor, 1 megohm Resistor	GA	4ECU7	1
Yellow, Elastic Hook and Loop Closure, Cross-linked Tire Grade Rubber Will Not Leave Black Marks on Floor	GA	4ECU8	20
Antistatic Table Mat			
Blue mat has 3-layer construction to maximize dissipation	SCS	3BU23	1
Antistatic Table Mat, Green			
0.065" Thick, Lead Free, Nitrile Rubber	GA	4ECV1	1
0.138" Thick, Lead Free, Nitrile Rubber	GA	4ECU9	1
Elastic Wrist Strap Kit			
Adjustable Elastic Wrist Strap Kit: wrist strap, cord, and alligator clip	Pomona	4KK39	1
Lead-free, RoHS Compliant	GA	4ECV9	1
Lead-free, RoHS Compliant	GA	4ECU6	1
Grounding Strap			
Medium	Desco	8P766	1
Heel Grounding Strap			
Economy Heel Grounder,3/4 Elastic Loop, (1) Megohm Resistor, and 2-Layer, Dissipative, Blue/Black Sole	SCS	20FX03	1
NonMarring,Hook and Loop Closure,1 Megaohm Resistor	Desco	9W661	1
No-Slip Black Sole, Burgundy Hook And Loop, 1 Megohm Resistor, Moderate Heel Contact Area, ESD SP9.2 Type A, Effectively Grounds Mobile Personnel When They Are In Contact With Conductive And Dissipative Flooring	SCS	3XJZ2	1
Hi-Visibility Grounding Strap			
Yellow-Green Glow Strap, 1 Megohm Resistor, ESD SP9.2 Type A, Grounds Mobile Personnel When In Contact With Conductive And Dissipative Flooring	SCS	3XJV3	1
Metal Wrist Strap Kit			
Lead-free, RoHS Compliant	GA	4ECW2	1
Static Control Cord, Straight			
First End Straight Barrel Type Banana Jack, Second End Spring Loaded ⅛" (4mm) Socket Connector, Black PVC Cord and 7 Strand Tinsel Wire With Strain Reliefs at Both Ends, Lead-free RoHS Compliant	GA	4ECV7	1
Static Control Kit			
Portable 18 x 22" Anti-static Mat	GA	4ECW4	1
Portable 22 x 24" Static-safe Work Mat	GA	4ECW5	1
Static Control Wrist Strap			
Flexible Stainless Steel Band, Stainless Steel Back Plate, 1M Ohm Resistor and 4mm Snap	GA	4ECW1	1
Non Allergenic Elastic Band with Silver Conductive Fibers, Stainless Steel Back Plate, 1M Ohm Resistor and 4mm Snap	GA	4ECV8	1
Static Shielding Bag			
Lead-free RoHS Compliant, Amino-free, Non-corrosive, Meets EIA-541 for Static Shielding Packaging	GA	4ECV2	100
Wrist Strap			
Dual Wire, Mono Plug Connection	SCS	29AH06	1
Wrist Strap Tester			
Touch-type-on-demand tester for wrist strap and ground cord. Provides ground point for continuous protection and convenient use. Test static control wrist strap for correct operation	Pomona	4KK43	1
Wrist Strap Workstation Monitor			
Monitors Resistance/Voltage, Worksurface Ground Connections and Tool Ground Connections	SCS	3XJZ5	1

Process Tools

FLUKE.

Broad line of calibration tools, including intrinsically safe calibrators, meets the needs of instrument technicians in process industries.

Fluke 787B Process Meter—Multimeter and mA loop calibrator functionality. Simultaneous mA and % scale of readout. Frequency measurement to 20kHz.
- Measure, source, and simulate mA with accuracy
- Compatible with Fluke Connect® mobile app; required Fluke IR3000FC module (not included)

Fluke 789 Process Meters—Multimeter and loop calibrator functionality. 0 to 100% mA span check, HART resistor, and 24V loop power.
- 20mA drive into 1200Ω
- Compatible with Fluke Connect® mobile app

Fluke 750 Series Documenting Process Calibrators—Instruments source/measure almost any process signal and auto-save test results, with upload/download data to PC ability. Pressure calibration available with 48 pressure modules (sold separately). No. 11A108 has a HART calibrator.

Fluke 725/726 Multifunction Calibrators—2-channel instruments measure/source volts, mA, RTDs, thermocouples, frequency, ohms, and pressure. Nos. 6KD42 and 2PY43 have 48 pressure modules. No. 4GU10 has 8 pressure modules; ATEX Ex II 1G Eex ia IIC T4, Class 1 Div 1 Group A-D.

Fluke 770 Series Milliamp Process Clamp Meters—Measure 4 to 20mA signals without breaking the loop and mA signals for PLC and control system analog I/O.
- 0.2% accuracy
- 0.01mA resolution and sensitivity

Fluke 705/707/715 Loop Calibrators—Selectable ramp/step modes. Simultaneous mA and % readout aid quick interpretation of readings. Push-button 25% steps for fast linearity checks. No. 3BA19 is FM Approved Class I Div. 2 Groups A and D, Ex II 1G Eex ia IIC T4.
- Source 0-20V to test 1-5V; 0-10V I/O (715 only)
- mA accuracy: 0.02% (705) and 0.015% (707)

Fluke 709/709H Loop Calibrators—Rugged and easy to use, with rotary knob and 2-wire connection. Variable ramp/step time. Source/simulate defined mA values with % keys for valve test. No. 21RL63 has a built-in HART modem with 709H/Track software and cable.
- Selectable 250Ω resistor for HART communication
- Adjustable 0-20 mA or 4-20 mA span
- mA accuracy: 0.01%

Fluke 712/714/724 Temperature Calibrators—Select by input measured/simulated: No. 4TR01 RTDs; No. 4TR03 mV/thermocouples; No. 6KD41 RTDs, volts, thermocouples, and ohms on dual display.

Process Temperature Calibration Sources

FLUKE.

Field Metrology Well

Digital Thermometer-Hygrometer

Portable instruments help calibrate and verify RTDs and thermocouples and calibrate dial and bulb thermometers, temperature switches, and mA loops.

DRYWELL TEMPERATURE CALIBRATORS

Fluke 9103/9140/9150—Field calibrators provide accuracy to ±0.25°C and stability to ±0.02°C.
- Insert A: ½", ⅜", ¼", 3⁄16", ⅛", 1⁄16"
- Insert B: ⅜" (x2), ¼", 3⁄16", ⅛", 1⁄16"
- Insert C: ¼" (x6)
- Insert D: Includes 3 pr. metric-sized wells

FIELD METROLOGY WELLS

Fluke 9142/9143/9144—Drywells give fast results in the field: just 15 min. to cool to -25°C or heat to 660°C, depending on model selected. Stability to ±0.01°C. Carrying case No. 33X033 is available on Grainger.com®. Process models feature 2-channel readout for PRT, RTD, thermocouple, or 4-20mA input, with onboard automation and documentation.
- Insert A: ¼" (x2), 3⁄16", ⅛", ⅜"
- Insert B: ¼", 3⁄16", ⅛", ⅜" (x2)
- Insert C: ¼" (x6)

MICRO BATHS AND THERMOMETER-HYGROMETERS

Fluke 6102/7102/7103—Microbaths calibrate varied probe diameters without inserts and take up minimal space. Stability to ±0.015°C.

Fluke 1620/1621/1622—Digital graphical datalogging thermohygrometers are network-enabled. Select models include logging and analysis tools.
- High accuracy: ±0.125°C
- Standard accuracy: ±0.25°C

Pressure Calibrators and Modules

FLUKE

Calibration tools and calibrators are made for industrial instrument technicians.

FLUKE 710 SERIES PRESSURE CALIBRATORS

- Switch test captures set, reset, and deadband

Easy-to-use, complete pressure calibration solution sources/measures pressure and vacuum. (717 Series requires external pump, sold separately.) 718 Series have an internal hand pump that generates pressures up to 300 psi. 719 Series have an electric pump for one-handed pressure calibration; source/simulate 4 to 20mA.

FLUKE 750P SERIES PRESSURE MODULES

- 0 to 1" H_20 to 10,000 psi

Gage pressure modules have 1 pressure fitting and measure the pressure with respect to atmosphere. Differential pressure modules have 2 pressure fittings and measure the difference between the applied pressure on the high fitting versus the low fitting. Each module is clearly labeled for range, overpressure, and media compatibility. All modules include NPT, metric (BSP), and M20 adapters.

PROCESS TOOL ACCESSORIES

Fluke 700LTP-1 Low-Pressure Test Pump

Hand-operated pump generates either vacuum to -13 psi (-0.90 bar) or pressures to 100 psi (6.9 bar). Has 2 pressure ports with quick-fit connectors. Test hoses are terminated with ¼" NPT female fittings adapted with BSP/ISO adapters.

Fluke 700PTP-1 Pneumatic Test Pump

Capable of supplying pressures up to 600 psi (40 bar). For use with 700 Series pressure modules or test gauges.

Fluke 700HTPK Hydraulic Test Pump Kit

Includes 700HTP-2 test pump, 700HTH-1 hose kit, and adapters for connection to high-pressure gauges, pressure modules, or 717 Series pressure calibrators to be tested.

Fluke 700PTPK-1 Pneumatic Test Pump Kit

Includes 700PTP-1 test pump and hoses and adapters for connection to the gauges, pressure modules, or pressure calibrators to be tested.

Fluke 700HTP-2 Hydraulic Test Pump

Hand-operated. Generates calibration pressures up to 10,000 psi (690m bar). For high-pressure testing of gauges, pressure modules, or 717 Series pressure calibrators.

Fluke 700HTH-1 Hydraulic Test Hose

10,000 psi (690 bar) working pressure. Stainless steel and nylon construction. Connects a Fluke 700HTP-1 or other hydraulic test pump to a unit under test.

Fluke 700PRV-1 Pressure Relief Valve Kit

Has a relief value settable from 725 to 5800 psi (50 to 200 bar) for use with 700HTP-1 Hydraulic Test Pump. ⅛" NPT male thread fits directly into the Fluke 700HTP-1 Pressure Pump.

Circuit Breaker Finders

Flashing LED indicator and audible tone quickly identify specific circuit breakers or fuses. Finders also identify and troubleshoot energized outlets. Feature easy-to-read display and include at least 1 transmitter/receiver. Nos. 6NZF8, 6PFG2, and 6PFG3 have automatic sensitivity adjustment. Nos. 23V745 and 23V746 have visual and audible indicators.

Ferrous Metal Locators

CST/berger

Instruments locate iron, surveyors' markers, valve covers, and other ferrous objects underground, underwater, or in snow. Each includes soft case.

No. 3XA25—LCD with digital bar graph. Sensitivity switch allows manual adjustment.

Nos. 1ELK5 and 1ELK6, with Erase—Detect metals up to 15 ft. underground. Aluminum sensor tube allows use in various weather conditions. Erase button helps distinguish between target item and interfering items. With high-tech magnetic sensors and electronic balancing. LCD with digital numeric and bar graph displays, plus power line indicator. No. 1ELK5 analog bar graph allows you to locate visually.

Cable Length Meter

Measures copper and aluminum cables, and covers the major wire gauges. Automatic temperature compensation; reads in feet and meters. Milliohm measurement capability measures from 15 to 30,000 ft. 5-yr. warranty.

Connector Type	Includes	Item No.
Kelvin Clip Leads	Soft Carrying Case, Copper Calibration Bars, Abrasive Pad, Test Leads	**29RM95**

AMPROBE Leica Megger RIDGID

Underground Utility Locators

Receiver (locator) and transmitter combine to trace buried wire, pipe, and cable lines to help avoid injury or underground utility damage during excavation operations.

LOCATORS

Amprobe® Underground Cable/Pipe Locator—Digital signal processing enables variable filtering, signal amplification, and noise reduction. Measures energized circuits with included inductive transmitter. Features fused voltage protection and 50/60 Hz passive tracing.

Leica Underground Utility Locator—Locates and traces energized lines up to 10 ft. deep. When used with the signal transmitter (Digitex), range can be over 5000 ft. and detect de-energized lines and pipes. Inductive and direct signal capabilities with 3 different frequencies.

Megger® Split Box Pipe/Cable Locator—Finds buried manhole covers and traces energized or de-energized cables up to several miles. Peak and null detection. 126 kHz output frequency. Inductive transmitter allows measurement of energized circuits.

RIDGID® Utility Locator—Antennas receive active and passive signals from all directions. Inductive and direct connection. Transmitter sold separately.

RIDGID High-Frequency Utility Locator—Can be configured with up to 30 frequencies. Continuously searches passive power and radio bands to locate and avoid unknown metallic lines. Traces energized lines and sondes (beacons) simultaneously. Inductive and direct coupling.

ACCESSORIES

Leica—Property connectors in No. 2VCX9 connect Signal Generator No. 2VCX5 to any standard 120V outlet to locate outside power supply. Service Tracer Mouse No. 2VCY1 is a dual-frequency standard sonde used with service locators and tracers to trace nonmetallic pipe. Signal Generator No. 2VCX5 includes connection cable set containing earth spike, and crocodile connection cable.

RIDGID Inductive Signal Clamp—Where direct connect is not possible, fits around 4" lines to apply a signal to cable or pipe. For use with RIDGID transmitters, sold separately.

RIDGID Transmitters—Use with RIDGID utility locators to locate buried utility lines.

No. 1DPH3 can transmit dual frequencies and audibly confirms good circuits; with two 10-ft. coil connectors. No. 1DPH4 displays line resistance, current flow, and power; with two 25-ft. coil connectors.

No. 2YCA4 induces at 8 kHz and 33 kHz for longer trace lines and low-distortion locates. Displays line resistance and current flow; with grounding stake and two 10-ft. coil connectors.

Combination Tachometers

EXTECH INSTRUMENTS · AMPROBE · MONARCH INSTRUMENT · Nidec SHIMPO

Handheld instruments offer surface and noncontact measurement choices. Each includes batteries. NIST models include certificate and calibration documents.

EXTECH®

Tachometers and Laser Tachometers—Laser light source, except Nos. 8PMK7 and 22DC94 have visible light source. Each includes tip(s) and wheel for contact readings and reflective tape for noncontact.

Nos. 41D940 and 41D941 also measure length.

Tachometers with Infrared Thermometer—Make contact/noncontact speed measurements and noncontact surface temperature measurements.

- IR temp. range -4° to 600°F

AMPROBE®

Tachometer No. 6NGZ4—Makes contact/noncontact speed measurements with noncontact rpm. Infrared light source. Features selectable units in contact mode and data hold. Includes cone and funnel contact tips and reflective tape.

Tachometer No. 4FKR9—Measures rotational and surface speed, with selectable rpm/length units using the infrared beam or adapter. Includes 6 adapters, reflective tape, and carrying case.

- Meter/foot/inch length measurements

MONARCH INSTRUMENT

Laser Tachometer and Kit—Pocket Laser Tach 200 is a 32-function tachometer/rate-meter, totalizer/counter, and timer (stopwatch). Fixed decimal points. TTL compatible pulse output can trigger data collectors or stroboscopes. Accepts remote optical sensor No. 3WB47, sold separately on page 567. Tripod mountable.

Instrument No. 4YE86 includes 12" reflective tape. Kit No. 4YE87 adds remote contact assembly with concave and convex tips, 10cm linear scope wheel, 5-ft. reflective tape, and carrying case.

SHIMPO

Tachometers—Measure rotational, linear, and surface speed plus total length. 10-measurement memory. Complete with 2 cone tips, funnel tip, extension shaft, and carrying case. Speed wheel included: 6" with Nos. 21YD75 and 21YD76, 12" with Nos. 21YD77 and 21YD78.

Analog and Digital Contact Tachometers

WESTWARD · EXTECH INSTRUMENTS · Nidec SHIMPO

Westward®

- Analog
- 2½" dial
- Reads clockwise and counterclockwise

Extech®—Each includes interchangeable cone, flat tips, surface speed wheel, carrying case, and AA batteries.

- Digital
- Max./min. values

Shimpo—Measure rotational, linear, and surface speed plus total length. 10-measurement memory. Each includes 2 cone tips, funnel tip, extension shaft, speed wheel, carrying case, and AA batteries. Nos. 21YD66 and 21YD67 have a standard 6" speed wheel. Nos. 21YD68 and 21YD69 have a 12" wheel for enhanced accuracy with high-speed readings.

- Digital
- Last/max./min. recall
- 16 selectable units

Noncontact Tachometers

GRAINGER APPROVED · EXTECH INSTRUMENTS · MONARCH INSTRUMENT

Each includes reflective tape for targeting. No. 5URH0 also includes USB cable.

Extech®—Nos. 1TZP5 and 6RGL0 employ a laser light source for noncontact rpm measurements from long distances. On-target indicator. With 9V battery.

Nos. 22DC89 and 22DC93 take rpm and speed measurements updated every second. Autoranging. With AA batteries.

- Max./min. values

Monarch Instrument—Pocket Tach 99 accepts tripod mount. With AA batteries.

- Autoranging
- Selectable max./min./last reading
- Fixed decimal points
- LED light source

Stroboscopes and Tachometers

EXTECH INSTRUMENTS | FLUKE | MONARCH INSTRUMENT | Nidec SHIMPO

EXTECH®

Digital Stroboscope/Tachometer— Handheld instrument has xenon flashtube light source. Includes 6-ft. power cord and lamp.

FLUKE®

Digital LED Stroboscope—High-intensity 7-LED array in high-efficiency, uniform-flash LED light source, which combines with digital pulse width modulation to return exceptionally sharp images at high speeds.

MONARCH INSTRUMENT

Rechargeable digital strobes provide continuous safe, cool operation. Fully backlit LCD. Each includes standard 120V charger for internal rechargeable battery. Battery life: LED 8 hr. and xenon 2 hr. Kits add spare lamp and carrying case.

Basic Stroboscopes and Kits—Digital control. Superbright LED or xenon flashtube light source.

Deluxe Stroboscopes and Kits— Multibutton keypads for x2/÷2 brightness adjust, visual phase shift, and tach mode. 8 to 10 hr. run time for LED. 3-hr. recharge time.

- Internal phase shift
- TTL input/output jacks
- Superbright LED or xenon flashtube light source

Phaser Stroboscopes and Kit—Allows degrees phase shift and time delay from external trigger. Multibutton keypad for advanced intuitive control. High-power charger/supply for continuous operation.

- External phase shift
- TTL input/output connectors
- Superbright LED or xenon flashtube light source

PLS Pocket Strobe and Kit—Provides a uniform light output for visual diagnostic inspection and rpm measurements. Features external input for remote triggering or tachometer mode, pulse output and memory for up to 5 present flash rates. 5- to 6-hr. run time.

SHIMPO

Stroboscope No. 29FK02—Compact LED scope has coarse/fine tuning and user-defined flash rate memory storage. 5-digit display.

1/8-DIN Panel Tachometers and Sensors

PANEL TACHOMETERS

Extech® No. 5AY32—Permits rpm measurements of a 1-hole gear or disc, eliminating the need for special gears. Display updates once per sec. Resolution: 0.1 rpm.

Monarch Instrument No. 4KF46—Universal-input instrument for 2- and 3-wire sensors requires 1 pulse per revolution.

Monarch Nos. 5TDG6 and 5TDG7—Programmable universal-input instruments for 2- and 3-wire sensors measure mph, cm/sec., and other units, including linear rate of travel when using 2 sensors. 1 pulse per revolution. 2 setpoints for high/low alarm. RS-232C interface.

SENSORS

Extech Photoelectric Sensor— Generates a light beam with a 0.4" (10mm) target opening.

Proximity Sensors—For use with ferrous/nonferrous metals.

Extech No. 5AY33 measures a pulse when a metallic object (stud) passes by the sensor. Min. object detection size: 0.07" x 0.11" (2mm x 3mm).

Monarch No. 4KF50 has an inductive probe that allows use with a 0.5" metallic target (bolt head or keyway).

Monarch Magnetic Sensor—As distance increases, output signal decreases. Includes 8-ft. cable and mounting nut.

- For use with ferrous metal gear teeth; min. target size 0.001"

Monarch Remote Optical Sensor—Stainless steel sensor operates up to 3 ft. and 45° from reflective target. Includes mounting bracket and 12" reflective tape. Additional reflective tape sold separately.

- LED light source and on-target indicator
- For use with reflective tape

Tension/Compression Digital Force Gauges

Measure standard and peak tension (pull) or compression (push) of mechanical items and systems.

SHIMPO
- 1000 Hz sampling rate
- LCD with reversible viewing direction

Gauges feature standard or peak measurement modes, force direction indication, and reversible keypad. Auto-Off can be disabled for continuous use with included AC adapter/charger. Each includes tension attachment (hook), compression attachments (chisel, flat, notched, and cone), metric/English thread adapter, extension rod, and hanger.

FGE-HXY and FGE-XY—Feature peak hold. Selectable oz., lb., g, or Newton units (8- to 32-oz. range) or lbs., kg, or Newton units (5- to 500- lb. range).

FGV-HXY and FGV-XY—With selectable High/Low comparator, onboard min./max./peak/avg./standard deviation, and continuous and single memory options. Software package, RS-232/USB/analog outputs, and USB cable for data export and analysis. Selectable oz., lb., g, or Newton units (8- to 32-oz. range) or lb., kg, or Newton units (5- to 1000-lb. range).

EXTECH®
- 5-digit LCD with reversible viewing direction

Feature peak hold and zero/tare functions. 0.2 (fast) and 0.6 sec. (slow) response time settings. Each includes AA batteries. Optional data acquisition software with RS-232 cable No. 1CLF1 and optional USB adapter cable No. 1CLF2, sold separately on Grainger.com®

Force Gauge/Data Loggers and Gauges with 44-lb. and 176-oz. Capacity—Feature load cell measurement transducer with tension adapter (hook), compression adapters (flat, cone, and chisel), and 5" extension rod.

Force Gauge with 220-lb. Capacity—RS-232 interface for data export. Backlit display. Includes tension and compression adapters (hooks), S-type load cell, and 6½-ft. cable.

Heavy-Duty Vibration Meters

Batteries and carrying case are included.

EXTECH®

Digital Vibration Meter Kits—Measure velocity, acceleration, and displacement. Feature Min./Max. and RMS or peak value measurement. With built-in RS-232 interface and LCD. Each includes remote vibration sensor with 3.9-ft. cable, magnetic mount, and holster. Can store and analyze data with optional software and cable No. 1CLF1, sold separately on Grainger.com®.

Pen Vibration Meter—Measures RMS acceleration and velocity, with zero adjustment and low battery indicator. Housing is IP65 dust-tight and waterproof. Includes pin-tip probe, and magnetic mount.

Vibration Meter/Data Loggers Nos. 13X134 and 43Y050—Measure velocity, acceleration, and displacement. Feature Min./Max., RMS/Peak/Max. Hold modes, and selectable sampling rate from 1 to 3600 sec. Retain up to 99 readings, or use included 2G SD card to store datalogs for analysis. Include remote vibration sensor with magnetic mount on 47.2" cable.

MONARCH INSTRUMENT

Vibration Tester—Meter/stethoscope system measures acceleration, velocity, and acceleration enveloping. Features bearing gear check and LCD. Includes accelerometer with cable, headphones, magnetic base, and stinger.

TPI®

Vibration Meters—These easy-to-use vibration monitoring and analysis tools display vibration signals. Automatically perform vibration analysis functions based on machine running speed to help diagnose faults such as unbalance, misalignment, and looseness. Designed for use with assets like pumps, motors, fans, or bearings.

Coating Thickness Gauges

DeFelsko® Inspection Instruments EXTECH INSTRUMENTS REED INSTRUMENTS

METAL TESTING

- Ferrous metals such as steel or iron
- Nonferrous metals such as brass, aluminum, or copper

PosiPen®—Pen-type, pull-off gauge is permanently calibrated to measure small steel parts, hot surfaces (up to 450°F), and hard-to-reach places. Includes leather pouch and calibration certificate.

PosiTest® FM and GM—Permanently calibrated, mechanical pull-off gauges measure nonmagnetic coatings on steel only. Each includes wrist strap, leather pouch, and calibration certificate.

Thickness Tester—Provides automatic substrate recognition: magnetic induction for ferrous substrates, eddy current measurement for nonferrous. Features single and continuous measuring modes; direct and group working modes with memory storage of 400 readings: 80 direct and 320 group. Includes user-settable high/low alarms, min./max./average measurement, and 1- or 2-point calibration. Comes with USB interface cable, software, calibration iron, calibration aluminum, precision standards, AAA batteries, and carrying case.

PosiTest DFT, Nos. 2GE21 and 2GE22—Compact digital units include wrist strap, precision plastic shims, 2 AAA batteries, and hard carrying case. Features zero and 1-point calibration adjustments. Displays the average for up to 99 measurements. No. 2GE21 measures coatings on steel. No. 2GE22 measures coatings on steel and aluminum.

PosiTector® 6000—Instruments feature no calibration adjustment required for most applications, 1- or 2-point adjustment. Average zero feature, mils/microns/mm switchable, adjustability to known thicknesses, and high-resolution mode. Provide audible and visible high/low limit alerts, calculations of average, standard deviation, and min./max. thickness. Standard models Nos. 12Y318 and 12Y320 have a 250-reading memory capacity. Advanced models Nos. 12Y319 and 12Y321 feature 100,000/1000 group reading memory capacity, Scan mode, on-screen batch annotation, and data transfer via USB, WiFi®, or Bluetooth®. All models include rubber holster with belt clip, USB cable, PosiSoft® software, nylon case, and NIST calibration certificate.

NONMETAL TESTING

PosiTector 200—Each includes plastic shims, protective rubber holster, 1 bottle ultrasonic couplant, USB cable, PosiSoft software, nylon carrying case, AAA batteries, and NIST calibration certificate.

Ultrasonic Wall Thickness Gauges

DeFelsko® Inspection Instruments CorDEX EXTECH INSTRUMENTS

DEFELSKO®

PosiTector® ultrasonic thickness gauges (UTGs) measure wall thickness of materials such as steel, aluminum, plastic, and more. Flip display for right-side-up viewing in-hand or on work table. Accuracy: ±0.001", ±0.03mm. 250-reading memory. Each includes 5 MHz probe, protective rubber holster, couplant, USB cable, PosiSoft® software, AAA batteries, nylon carrying case, and calibration certificate. Conform to ASTM E797.

UTG C (Corrosion)—Measures the effects of corrosion or erosion on tanks, pipes, or any structure accessible on 1 side only. Excellent for rough surfaces and heavily corroded applications. Scan mode for quick inspection over a large area.

UTG M (Multiple Echo)—Features through-paint capability to measure the metal thickness of a painted structure without removing the coating.

CORDEX INSTRUMENTS

UT5000 Intrinsically Safe—Provides nondestructive testing and predictive maintenance on pipelines and fixed equipment in hazardous locations. Built-in RFID+ software tags measurements with their locations along the pipeline and then organizes the data to give engineers the view at any specific location. Corrosion mode helps identify thinning spots. Accuracy: ±0.05mm (0.002").

EXTECH

Compact, rugged meters for nondestructive thickness measurements. No. 20LK16 features a 5 MHz probe, dot-matrix display, high-impact housing, and ability to capture minimum thicknesses. IP54 rated. No. 20LK17 includes echo-to-echo option to reduce coating errors, B-scan, and vibrate on alarm. No. 20LK18 has a color LCD, live waveform, file compare feature as a real-time corrosion monitor, dynamic change of waveform color on alarm, and grid review of saved readings.

Differential Pressure Gauges, Switch, and Adapter Kits

GAUGES

- ⅛" NPT side and rear pressure connections

Versatile gauges measure fan and blower pressure, filter resistance, air velocity, furnace draft, pressure drop across orifice plates, liquid levels with bubbler systems, and fluid amplifier/fluidic system pressure. Quickly indicate low air and compatible gas pressures—positive, negative (vacuum), or differential.

Magnehelic®—Series 2000 instruments are highly resistant to shock and vibration. Include 2 NPT plugs, 2 NPT to 3/16" I.D. rubber tubing adapters, and 3 mounting adapters.

- Die-cast aluminum case, 4" dial
- Plastic window

Magnehelic® Differential Pressure Gauge

Photohelic® Differential Pressure Gauge with Relay

Differential Pressure Switch

Portable Kit

Air Filter Kit

Photohelic® with Relay—Series A3000 Photohelic® switch/gauges function as versatile, highly repeatable pressure switches combined with a precise pressure gauge employing the time-proven Magnehelic® gauge design. Photohelic® switch/gauges measure and control positive, negative or differential pressures of air and compatible gases.

- 2 DPDT (double pole double throw) switches rated 10A at 28VDC, 10A at 120/240VAC
- Power required: 120VAC 60/50 Hz
- Aluminum case, 4½" dial

SWITCH

- SPDT switch, 1 NO/1 NC, 1-phase

Adjustable-range switch is great for HVAC applications: It has a dual-scale adjustment knob (in H_20 and Pa) to change settings without a pressure gauge. Barb connection for ¼" I.D.

ADAPTER KITS

Portable Kit—Adapts Magnehelic DP gauge for portable use.

Air Filter Kit—Adapts Magnehelic DP gauge to an air filter gauge. Eliminates filter replacement guesswork when installed across filter bank.

DIN- and Panel-Mount Differential Pressure Panel Meters

- 2 SPDT relays
- 4 to 20mA DC output signal
- 4-digit LCD

Digihelic® 3-in-1 digital meters combine pressure gauge, relay switch, and transmitter functions. Pressure, velocity, or volumetric flow readouts are selectable in choice of units.

▶Please choose: To order, specify input range from table.

1/8 DIN Mount—Accuracy is ±0.5% at 77°F. NEMA 4X face. RS-485 interface. Process connection uses 3/16" O.D. x ⅛" I.D. tubing with compression fitting. 4½"D.

4¾" Round Cutout Mount—Accuracy for 0" to 0.25" WC and ±0.25" WC is ±1.5%. Include front ring for mounting into 4¾" cutout. ⅛" female NPT side or back connection. 3⅛"D.

▶CHOOSE: Input Range	
0 to 0.25" WC	0 to 100" WC
0 to 1.0" WC	0.25 to 0 to 0.25" WC
0 to 2.5" WC	0.5 to 0 to 0.5" WC
0 to 5.0" WC	1 to 0 to 1" WC
0 to 10.0" WC	2.5 to 0 to 2.5" WC
0 to 25" WC	5 to 0 to 5" WC
0 to 50" WC	10 to 0 to 10" WC

Fits	Power Req.	Item No.
⅛ DIN Mount	100 to 240VAC, 132 to 240VDC	**D0739** †
4¾" Round Cutout Mount	12 to 28VDC, 12 to 28VAC	**D0741**

† Not avaliable in 0 to 2.5" WC or 0.5" to 0 to 0.5" WC.

605 Magnehelic® Differential Pressure Indicating Transmitters

- 2-wire, 4 to 20mA output signal
- 0 to 1250 ohm loop resistance from 10 to 35VDC
- Power required: 10 to 35VDC
- Output accuracy: ±2% full scale for ranges < 2" WC; l0 0.5% all others
- ⅛" NPT side and rear pressure connections

Transmitter gauge for HVAC maintenance and trouble-shooting provides visual monitoring and electronic control of very low differential pressure. 38mA DC (max.) current consumption. Die-cast aluminum case. Plastic window. Includes span-and-zero adjust tool and mounting hardware.

▶Please choose: To order, specify pressure range from table.

Molded Plastic Manometers

No. 2T650

- Zero adjustment knob and built-in level indicator
- ±3% full scale accuracy

Mount on any vertical surface to measure low positive, negative, or differential air and compatible gases in dust collection systems, noxious fume/airborne particulate exhaust systems, and HVAC filter banks. 140°F max. working temp. 10 psi max. internal working pressure. Each includes 2 static pressure taps, 8-ft. double-column plastic tubing, mounting screws, indicating fluid, and red and green pointer flags. No. 2T650 uses red indicating fluid (No. 1TC00); No. 3T292 uses blue indicating fluid (No. 1W413).

Operating Range	Mfr. Model	Item No.
0 to 3" WC	MARK II 25	**2T650**
0 to 7" WC	MARK II 26	**3T292**
Accessory		
Stand for Nos. 2T650 and 3T292 Manometers	A-612	**1TC33**

Wind Speed Indicators and Vane Anemometer

No. 3T307

WIND SPEED INDICATOR

Rooftop-mounted pickup reads wind velocities from 0 to 80 mph directly on liquid-filled tube. Calibrated in mph and Beaufort scales. Includes 50-ft. vinyl tubing.

HANDHELD WIND METER

Quickly displays wind velocity in 2 scales: 2 to 10 mph and 4 to 66 mph.

MOUNTABLE VANE ANEMOMETER

Permanent-mount or portable instrument measures velocities from 25 to 400 fpm.

Description	Mfr. Model	Item No.
Wind Speed Indicator	MARK II WSI	**3T307**
Handheld Wind Speed Indicator	WIND METER-MPH	**3T308**
Mountable Vane Anemometer	480	**1W431**

Static Pressure Sensors

For use with differential pressure instruments.

Static Pressure Tips are designed for use in ducts or rooms.

No. 23Z321 is designed for cleanroom use. No. 23Z323 mounts on top of a standard ¾"-thick ceiling tile, with its filter facing down through a ⅝" hole in the tile.

No. 23Z324 is designed for roof or outside mounting, and structured to withstand harsh outdoor conditions.

No. 23Z320

No. 23Z324

No. 23Z326

Pressure Test Kits

Dual-Range Manometer Kit—Determines static pressures; tests leakage, fans and blowers; calibrates control devices. Includes 4½" x ⅜" Tygon® tube for pressure source connection, ¾-oz. red indicating fluid (No. 1TC00), 2 magnetic clips, and carrying case.

- U-tube application reads 0" to 16"
- Inclined gauge reads -0.20" to 2.6"

Gas Pressure Test Kit—Complete kit contains No. 3T302 16" manometer (8-0-8 range) plus ⅛" to ¼" pipe thread bushing, 3 ft. x 3/16" rubber tubing, 1 rubber tubing adapter to fit standard 7/16"-dia. spud, 2 rubber tubing adapters to fit ⅛" pipe thread, ¾ oz. fluorescent green coloring agent (No. 1W409), and plastic case.

Gas Pressure Test Kits—Nos. 8P386 and 8U889 measure methane or LP gas pressure across a stove, furnace, or dryer manifold with ±1.5% accuracy. Each has a 2.5"-dia. gauge calibrated in inches H_20 as well as oz./in.^{2} Each comes in a hard case with 39" of rubber tubing, a hose clamp, and a ⅜" NPT brass quick-connect fitting.

Flexible Liquid-Filled Manometers—Determine static pressures; test leakage, fans, and blowers; and calibrate control devices. Rapid shutoff, overpressure safety traps. Connect to 3/16" I.D. hookup hose (not included). Include 1 bottle of fluorescent green coloring agent (No. 1W409).

- Magnetic clips

Note: Connection tube not included.

Environmental Meters

Pocket-sized testers come complete with wrist strap and 9V battery; Type K temperature probe sold separately. 4-in-1 No. 4TXJ1 simultaneously display air temperature and air velocity or relative humidity. No. 4TXJ1 adds foot-candle/lux light measurement.

Handheld Digital Manometers

Precision instruments test air or gas pressure in HVAC systems, laboratory testing, field calibration, and medical respiratory support equipment. Batteries included.

DWYER®

Handheld Digital Manometers—Measure pressure, flow, and velocity. Calculate and display air velocity and volumetric air flow. Nine selectable English and metric engineering units. Store up to 40 readings.

Intrinsically Safe Handheld Digital Manometers—Measure positive, negative, or differential pressure and air velocity when used with a pitot tube.

Single-Pressure Digital Manometer—Measures positive and negative pressures. Features 1-button Auto-Zero and Auto-Off. Does not measure differential air pressure.

EXTECH®

Differential Pressure Manometers—Record Max./Min./Avg. readings with relative time stamp. Data hold freezes the reading on the display. Zero function for offset correction or measurement.

Heavy-Duty Differential Pressure Manometer—Dual-input instrument with internal sensors has a wide measurement range and high resolution. Dual LCD shows 8 selectable units with Hold, Zero, and Record/Recall. RS-232 interface. Includes 2 quick-disconnect fittings, rubber holster with stand, and carrying case.

Pitot Tube Anemometer and Differential Manometer—Measures air velocity/air flow in tight locations. 5 selectable units of measure. Features Data Hold, Auto-Off, Zero, Record/Recall up to 99 readings. Complete with software, USB cable, AC adapter, and carrying case.

Pressure Meter/Datalogger—Measures pressure in hydraulic shop presses and other industrial machines. Dual-LCD shows 10 selectable units with Hold, Max./Min., and Record/Recall. Stores data on included 2G SD card. Includes hard carrying case. Optional sensors are available on Grainger.com®.

MERIAM®

Digital Manometers—Recall option allows recalibration for zero, span, and linearity. Store up to 240 readings; automatic mode saves current value every 5 sec. for up to 20 min.

Smart Manometers—Provide 11 pressure units and can be linearly scaled for custom units. Adjustable damping minimizes the effects of pulsating pressures. Recalibrate for Zero and span. Feature Min./Max., Hold, and auto-record of up to 240 readings.

TEST PRODUCTS INTL.

Dual-Input Differential Manometers—Measure pressure in seven units. No. 3LYC4 features Auto-Off, Zero function, and Trim mode to stabilize readings. Includes silicon tubing. No. 9HUA3 includes Auto-Off, Record/Min./Max., Zero function, aluminum housing with rubber boot. Data logging with optional A665 software and docking station.

Single-Input Manometer—Measures pressure or vacuum in four units of measure: inH2O, mbar, KPa, psi. Provides a range of ±60 inH2O range.

UEI TEST PRODUCTS

Dual-Differential Digital Manometer—Measures positive and negative gas supply, draft pressures, and differential in 11 scales. Min./Max., Data Hold, Zero and Auto-Off. Built-in magnet for hands-free operation. Includes 18" sample tubing and pouch.

Dual-Input Differential Manometer—Rugged dual-input meter features dynamic Min./Max. capture, Hold, Zero, and Auto-Off. Rubber-booted housing has integral magnet for hands-free operation.

Static Pressure Kits—Measure gas supply and draft pressures. Kits provide an alternative to U-tube pressure measurements. Differential mode offers a convenient method to measure pressure drops. Features dynamic Min./Max. value capture, Data Hold, Auto-Off, and rubber boot with integral magnet.

Digital Pressure and Vacuum Gauges

Sockets are made of stainless steel.

ASHCROFT SERIES DG25

5-digit LCD shows readings in any of 9 units of measure. Include protective rubber boot and batteries.

ASHCROFT SERIES 2089

5-digit LCD for 12 units of measure (including mm H_2O) and 7 languages. With password-protected calibration and disable function. 316 stainless steel wetted parts. Each includes AAA batteries. Supplied with NIST calibration certificate.

ASHCROFT® SERIES 2074

Readings are shown on 5-digit backlit LCD in any of 10 units of measure. Units have password protection. Include C batteries.

ASHCROFT SERIES 2174

Gauges with 4-20mA transmitter have 5-digit LCD for 10 selectable units of measure, and unlimited turndown. Include AA batteries.

DWYER® SERIES DPGA

Gauges have a 4-digit LCD with selectable vacuum/pressure measurement and digital push-button zeroing. For use with air or compatible gases. Run on one 9V battery (not included).

GA SERIES YSB-068

Provide readings on digital LCD for liquids or gases in any of 9 engineering units. Require 9V battery (not included).

GA SERIES YSB-070

Rubber-covered gauges provide readings for liquids or gases in any of 9 engineering units on digital LCD. Require 2 AAA batteries (not included).

SSI MG SERIES

Gauges contain a piezo-resistive pressure sensing element, signal conditioning circuitry, stainless steel input pressure port, and 4-digit LCD backlit display. Readings updated 3 times per sec. Battery-saver mode.

WEISS SERIES DUG

4-digit LCD for 4 selectable units of measure plus averaging. Self-powered: Run continuously on as little as 10 lux (1 foot-candle). IP65 weatherproof; solid-front construction with blowout back safety design.

700G Precision Pressure Test Gauges

FLUKE.

- 4 absolute pressure measurement ranges: 15, 30, 100, and 300 psia
- CSA, Class 1, Div. 2, Groups A-D rating
- ATEX rating: II 3 G Ex nA IIB T6
- 3-yr. warranty

Designed to handle all your pressure calibration needs, these rugged and easy-to-use gauges are offered with pressure ranges from ±10 in. H_2O/20 mbar to 10,000 psi/690 bar including absolute pressure ranges. When combined with the Fluke 700PTPK No. 16L019 or 700HTPK No. 16L018 test pump kits, you've got a complete pressure testing solution for up to 600 psi (40 bar) with the PTP-1 pneumatic pump No. 2GXE3 and up to 10,000 psi (690 bar) with the HTP-2 hydraulic pump No. 16L020. The large backlit screen displays 3 parameters at once. Gauges can log up to 8493 pressure measurements to memory with 700G/TRACK software No. 16L017. Test pump kits, test pumps, and software sold separately on page 563.

Standard Gauges with Stainless Steel Housing

GA GRAINGER APPROVED

- Accuracy: ±3-2-3%
- Polycarbonate lens
- Connection/internal material: stainless steel
- Ambient operating temp.: -40° to 150°F (liquid-filled to 140°)

Corrosion-resistant and suitable for outdoor use or harsh conditions. Use with air, water, and oils in hydraulic equipment, pressure washers, pumps, and compressors. Glycerin liquid fill with select models reduces pulsation and pointer vibration.

▶**Please choose:** To order, specify vacuum/pressure range from table.

Standard Gauges with ABS Housing

- Accuracy: ±3-2-3%
- Acrylic lens
- Connection/internal material: brass/bronze
- Ambient operating temp.: -40° to 150°F

Use with air and noncorrosive fluids such as water and oil in pumps, filters, compressors, and regulators. Glycerin-filled gauges have reduced pulsation and pointer vibration.

▶**Please choose:** To order, specify vacuum/pressure range from table.

ASHCROFT

Stainless Steel Gauges with PLUS!™ Performance

- Accuracy: ±1%
- Polycarbonate lens
- Connection/internal material: stainless steel
- ¼" NPT connection
- Ambient operating temp. range: -40° to 150°F

Stabilized pinion technology and a throttle plug fight pointer flutter and help reduce pulsation, giving these dry gauges better readability and a longer service life than traditional dry gauges while avoiding the difficulties and expense associated with liquid-filled gauges.

▶**Please choose:** To order, specify vacuum/pressure range from table.

GA GRAINGER APPROVED

4" Colored-Case Gauges

- Accuracy: ±2-1-2%
- Polycarbonate lens
- ABS plastic housing
- Connection/internal material: brass/bronze
- ¼" NPT lower connection
- Ambient operating temp.: -40° to 150°F

Gauges measure compressed air, water, and hydraulic oil on process lines, compressors, hydraulics, and machinery.

►**Please choose:** To order, specify pressure range and color from table.

►CHOOSE: Pressure Range		►CHOOSE: Color		Item No.
0 to 15 psi	0 to 160 psi	Black	Red

ASHCROFT

GC35 Series

GC35 SERIES

- IP65 (ranges ≤ 300 psi) or IP67 (ranges > 300 psi)

3-in-1 digital pressure gauge/switch/transducer is push-button configurable for analog scaling of switch settings. Nickel-plated aluminum housing.

GC51 Series

GC51 SERIES

- NEMA 4X (IP65)

Rangeable pressure transmitter features thin-film sensor suitable for applications where high overpressure and high cycle life are necessary. Push-button configurable ranges. Min./Max./Hold and scaling functions. Epoxy-coated aluminum die-cast housing.

GC52 Series

GC52 SERIES

- NEMA 4X (IP65)

Rangeable wet/wet differential pressure transmitter is for applications requiring low differential pressure measurement with static pressure to 300 psi. Push-button configurable ranges. Scaling function. Epoxy-coated aluminum die-cast housing.

Pressure Data Loggers

DICKSON MONARCH INSTRUMENT

No. 2TLA5

No. 45RM55

No. 36J809

DICKSON

Measure water, gas, or oil pressure with this 64 KB Storage Water-resistant IP68 logger. It displays 7 units of measure, along with low battery, and Min./Max. Data can be downloaded via USB cable or flash card. ¼" NPT connection.

MONARCH TRACK-IT™

Battery-powered, water-resistant IP67 loggers display and record up to 130,000 samples. Record pressure, vacuum, temperature, and parameter alone. Feature alarm set points and indicators, real time data, and Min./Max. readings are displayed live. The data logger plugs into a USB port on your PC; allowing you to customize settings, transfer data, or view data in real time with the included Track-It™ software program. Include software, USB cable, and battery. ¼" male NPT connection.

Tank Gauges

Read Full/Empty/8ths of a tank.

H Series is primarily for above-ground storage tanks. Stainless steel units have all-stainless steel wetted materials for outstanding compatibility with aggressive chemicals.

PH Series are all-plastic for maximum compatibility with aggressive chemicals.

LED Remote Tank Gauge

Submersible Level Transmitters

- Accuracy: ±0.25% full scale
- Power requirement: 13-30VDC
- Output signal: 4 to 20mA DC, 2-wire
- Electrical protection: Lightning and surge protection
- ½" NPT connection conduit

Measure height of liquid referenced to atmospheric pressure. Wetted materials are 316 and 316L stainless steel, epoxy adhesive, and PVC for SBLT2 series. Polyurethane models are for water monitoring, environmental remediation, and water tanks. ETFE (ethylene tetra fluoroethylene) provides a high degree of corrosion resistance for wastewater, sludge pits, clarifiers, digesters, aluminum tanks, chemical and oil tanks, lime slurry, sumps, and reservoirs.

Rotary Paddle Level Switches

- 1¼" connection: No. 2HMD1 is MNPT, No. 41D949 is NPT

Modular design allows field installation of paddle flanges, shaft extensions, or shaft guards. For dry powder or bulk materials compatible with wetted materials. NEMA 4X weatherproof No. 2HDM1 has a 1 rpm synchronous magnetic-drive motor that actuates switch when dry material impedes paddle (sold separately). With status indication light and screw cover. Side or top mount. SPDT switch; spring return.

Explosionproof No. 41D949 has 3 sensitivity settings. Top or side mount.

Paddle Nos. 2HMD2 and 2HMD3 are carbon steel. Nos. 2HMD4 and 2HMD5 are 316 SS.

Note: Complete unit requires paddle switch body, paddle, and coupling flange.

Digital Stopwatches

GENERAL® TRACEABLE® EXTECH INSTRUMENTS

Each includes lanyard and battery.

General®—Fully featured stopwatch displays day, date, current time, and lap time. Daily alarm and hourly chime. Manufacturer's lifetime warranty.

Traceable®—Continuous timing function lets you time for hours, days, or weeks; the display rolls over to zero when it maxes out, automatically beginning timing again. No. 9DUY3 is shockproof and waterproof to 3 atmospheres. No. 4YMT7 is disposable. No. 5CVT8 has vivid, large digits. No. 9NU56 simultaneously displays running time, cumulative-split, and interval-split. 300-memory.

Each instrument is provided with a serialized Traceable® Calibration Certificate indicating traceability to standards provided by NIST.

Extech®—Nos. 4TM11 include calendar display (day, month, date), plus alarm with snooze function with time delay. Pacer function on No. 2ENF6 provides an audible metronome for use as a heart rate/pulse comparator or as a walk/run pace guide. No. 4FB70 HeatWatch displays temperature, humidity, and heat index with programmable heat index alarm. Offers fastest/slowest/average lap recall.

Digital Timers

TRACEABLE® Cooper ATKINS® SUPPLIER DIVERSITY TAYLOR®

- Min. time setting: 0.1 sec.

TRACEABLE®

Each timer is provided with a serialized Traceable Calibration Certificate indicating traceability to standards provided by NIST.

No. 8RLR2

No. 8GHH3

Alarm Timer —4-channel device functions as count up/down timer, time in/out display, and 12/24 hr. clock. Memory resets display to previously programmed countdown time.

Clip-It Timer—Multitasking timer clips to any lab surface. Memory saves last programmed setting for quick recall: useful for repetitive timing events. Features loud, 1 min. alarm.

No. 4YMT6

No. 6KED8

Countdown Timer No. 8GHH3—View large 1⅓" digits from across the room. 1-touch recall returns channel to previously programmed setting. Countdown/up and stopwatch modes.

Countdown Timer No. 4YMT6—Jumbo digit, lightweight and portable timer's memory resets display to last programmed time for quick repeat of frequent, routine tests. Loud 30-sec. alarm.

No. 8PGN6

No. 9JAZ8

Jumbo Timer—Display adjusts from 90° to 180° for angled viewing. Counts up after alarm to show elapsed time since alert. Also has time in/out, 12/24-hr. clock, and stopwatch functions.

Nano™ Timer—Operates as a countdown alarm timer, stopwatch (count up), or 12/24-hr. clock. Compact design with large digits for readability. 2-channel memory automatically resets display to the original programmed time.

No. 6KED7

No. 3NZR6

Timer No. 6KED7—Big-digit timer has adjustable alarm and flashing LED alert. Green light flashes every second after timing reaches 10 sec.; red indicator flashes when zero is reached and shows time elapsed since alarm. Adjust volume for high, low, or off for silent flashing LED alert.

Timer No. 8UU14—Extra-loud alarm on each channel is well-suited for high-noise areas. Big keys make it easy to operate. Timer counts up or down and and allows unlimited time-outs.

Flashing LED Big-Digit Dual Channel Timer—6-digit, dual channel display. Features 2 simultaneous countdown activities, flashing LED timing indicator/alarm and adjustable volume. Green light flashes counting down, red light flashes once at zero.

COOPER-ATKINS®

24-Hr. Digital Timer—Large single-station timer has a red alert light that flashes when the alarm sounds. Automatically counts up once the set time has elapsed. Handy 1-touch Start/Stop button.

TAYLOR®

Digital Timer No. 2DBE9—Easy-to-read and program 10-key timer. Times up/down. Water-resistant, smooth membrane surface. Magnetic back or built-in stand.

Digital Timer No. 3NZR6—Easy-to-use, multipurpose timer counts up or down. Compact with clip, magnet, or stand positioning.

Loud Digital Timer—Times up to 4 events simultaneously with distinctive 100dB alarms for each event. Adjustable volume. Lights flash at zero. Stand or wall mount.

Wireless Weather Station

- Long-range transmission up to 450-ft. (150m) between base and transmitter
- Max./Min. readings with time-date stamps
- Hi/Lo alert settings and warnings
- Clock display with 5 languages

Helps plan day-to-day outdoor activities affected by weather. The indoor wireless base station with large LCD displays indoor temperature, humidity, and outdoor weather conditions, plus date and time. The outdoor wireless transmitter has 5 built-in sensors for measuring wind speed, wind direction, rainfall, temperature, and humidity. Kit is completely assembled for easy installation.

DAVIS

Vantage Vue® Weather Station

Wireless monitoring system updates data every 2½ sec. from solar-powered sensors up to 1000 ft. away. LCD shows barometric pressure, wind direction, wind chill, dew point, and heat index. Weather center feature provides weather variables, such as daily highs/lows. Compact outdoor sensor array is fully integrated and corrosion-proof. Console requires 3 C batteries (not included) or AC power. Includes Display Console No. 4JRJ6 and sensor array with rain collector, temperature and humidity sensors, and anemometer.

- Wind velocity: 1 to 200 mph
- Rain fall: 0 to 199.99"; accuracy: ±4%.

Monitoring systems update data every 2½ sec. from sensors up to 1000 ft. away. LCDs show barometric pressure, wind direction, wind chill, dew point, and heat index.

No. 4JRH5 is a cabled weather station with sensor array wired to the indoor console. Runs on AC power. All others are wireless, with solar-powered outside sensors and console that requires 3 C batteries (not included) or AC power.

Nos. 4JRH6 and 4JRH8 feature 24-hr. fan-aspirated radiation shield for max. temperature/humidity accuracy.

Nos. 4JRH7 and 4JRH8 add UV and solar radiation/energy sensors. Display UV index, dose rate, and daily and accumulated dose.

No. 4JRH9 is a wireless display console only.

Use WeatherLink® software with weather stations for downloading data for reporting, analysis, and sharing over the internet. Supports National Climatic Data Center (NOAA) Weather Watcher, GLOBE student science program, and the Citizen Weather Observer Program of the National Weather Service.

TRACEABLE®

Barometer

Designed with 4-line LCD display that continuously and simultaneously shows barometric pressure, temperature, relative humidity, barometric pressure trend, and time-of-day. Perfect for plants, labs, and all other environments where there is a need to monitor conditions of environmental air parameters.

EXTECH INSTRUMENTS

Desktop Indoor Air Quality (IAQ) CO_2 Monitors

- 0 to 9999 ppm CO_2 concentration
- RH range: 0.1% to 99.9%
- Min./max. CO_2 value recall

Nos. 21RV54 and 15E593—Display air quality as Good/Normal/Poor, plus year, month, date, and time. Feature automatic baseline calibration (ABC) or use manual calibration in fresh air.

No. 15E593 logs up to 5333 data points that can be downloaded to a Windows® compatible computer for analysis; software and cable included.

Nos. 21YE40—Calculate statistical weighted averages of TWA (8-hr. time weighted average) and STEL (15-min. short term exposure limit).

No. 21YE40 employs 6 facial icons to indicate IAQ levels. Displays CO_2 ppm, year, month, date, and time. ABC. Manually stores/recalls 99 readings.

Paperless Temperature/Humidity Monitors

- Graphical data logger
- Stores up to 49,512 readings
- Desk or wall mount

Simultaneous shows numerical and graphical display of humidity and temperature readings plus time and date. Also measures humidity (10% to 95% relative) and temp. (-20° to 140°F). Feature a replaceable probe that extends up to 3-ft. for measurements in closed environments. Audible and visual alarm with user programmable High/Low setpoints. Output socket can be connected to a relay to trigger an external alarm when setpoints are exceeded. Units can be wall-mounted or placed on a desktop. LabView™ software calculates and graphs dew point, wet bulb, and GPP (grains per pound). Include RS-232 cable, USB adapter, AC adapter, and AA batteries. Optional Relay Module No. 4GE81, sold separately, is available on Grainger.com®.

TRACEABLE® Cooper ATKINS®

Refrigerator/Freezer and Incubator Thermometers

Each model is individually serialized, calibrated, and provided with the Traceable® Certificate from Control Company's calibration laboratory. The certificate indicates traceability to standards provided by NIST. The glycol bottle probe is sealed in a miniature 10mL bottle or 5mL vaccine bottle filled with nontoxic glycol. The FDA generally recognizes the solution as safe. The bottle and solution insulate sensor from rapid changes. The solution mimics temperature of samples.

Digital and Analog Infrared/Probe Food Service Thermometers

- Spectral response (µM): 5 to 14
- Emissivity: adjustable, 0.10 to 1.00
- Batteries included

No. 4KY67—Instantly measures surface and internal temperatures. Lock function for long-term monitoring, Max./Min., and low-battery indicator.

No. 1VEP5—HACCP zone indication system quickly verifies whether temperatures are in safe or unsafe regions. LED spot illumination. IP54 protection facilitates cleaning.

No. 24Y994—HACCP LED indicators, Auto-Off after 20 sec., and gun-style design. Includes platinum RTD probe and case.

No. 30ZU98—NSF Certified. Dishwasher safe. Ultrasonically welded housing (waterproof IP65) with antimicrobial additive. °F/°C. Foldable with built-in magnetized strip.

No. 21XL17—Provides software, hardware, and PC interface to collect and report product temperature records for HACCP programs. Handheld instrument stores up to 3000 temperature readings/1500 checklist records.

No. 40GT03—NSF Certified, waterproof indicator measures temperatures in liquids, pastes, and semisolid foods. Min./Max., data hold, low-battery indication, and programmable audible/visual High/Low alarms.

EXTECH INSTRUMENTS TAYLOR TRACEABLE®

Digital Thermometers and Hygrothermometers

Digital Temperature and Humidity Monitors help you maintain proper temperature and humidity levels.

Acurite—Large LCD display shows simultaneous indoor temperature and humidity levels. A magnetic backing permits easy mounting, removal, and re-mounting. 24-hr. High/Low memory.

Extech—Include a built-in stand and batteries. No. 21EN92 measures temperature only and features min/max. alarms for use in sensitive environments. It has a magnetic backing for simple wall-mounting, removal, and re-mounting.

Taylor—Include battery. Celcius/Farenheit switchable.

Traceable—All measure temperature only and include NIST calibration certificate.

Temperature Switch

Thermistor-Input Devices

LOVE

- IP64 front panel
- Cutout: 2.8" x 1.14"
- Accuracy: ±1% full scale
- Red, 3-digit LED display
- Thermistor probes sold separately; on Grainger.com®, search for "thermistor probes."

DIGITAL PANEL METERS

Process and Temperature—Feature adjustable span/zero.
- Resolution: 1°

TEMPERATURE SWITCHES

On/Off, Compressor Defrost—Features include ½" digits, set point adjustments, static defrost timing, compressor mean time, hysteresis, and ambient probe adjustment. Each includes gasket and mounting clips.
- Resolution: 1°
- Contact rating: 16A at 250V resistive, 5A inductive

On/Off, Dual-Stage—Designed to accept 2 inputs with independent relay outputs for dual-stage temperature control. Equipped with 34 programmable parameters to customize control functions. Access to all but set point can be secured by password. Each includes 1 temperature probe, gasket, and mounting clips.
- Resolution: 0.1° (<100°); 1° (≥100°)
- Contact rating: 1 SPDT 16A at 250V resistive; 1 SPDT 8A at 250V resistive

Solar Power Panel Thermometers

- Accuracy: ±1.8°F from -4° to 86°F; out of/above range ±3.6°F
- Temp. range: -58° to 158°F
- 1.25" sensor
- Surface mount; gasket included
- 1" x 4" dial, 3-digit LCD, polycarbonate lens

Designed to monitor the temperature of refrigerators, freezers, and retail cases. Solar powered with AAA battery backup (batteries sold separately).

Single-Input Thermocouple Thermometers

Cooper-Atkins®—Durable mini-type probe instruments with IPX7 waterproof housing. Feature Hold and Auto-Off with disable. Resolution: 0.1° or 1°.

Nos. 3TPP5 and 3LZA2 accept a wide variety of probes.

Nos. 3LZA6 and 3LZC5 include MicroNeedle Wrap & Stow™ probe.

Extech®—Feature selectable °F/°C, Hold, Max./Min./Avg., Auto-Off, and offset key used for zero function to make relative measurements. Resolution: 0.1° or 1°.

Nos. 5GCD1 and 5GCD2 display readouts in °F, °C, or Kelvin. Readings capture a relative time stamp.

Nos. 1LYR5 and 1LYR6 store and recall up to 150 readings. Each includes built-in stand and holster.

Test Products International—Waterproof thermometer in an industrial case. Data logging capability. Features °F/°C selectable, Min./Max., Hold, and Auto-Off. Resolution: 0.1° or 1°. Probes sold separately on this page.

Traceable®—Water-resistant instrument is fast and easy to use. Recalls min. and max. temp. readings, updates display twice a second. Features Hold, Hi/Lo alarm, and count-up timer alarm. Resolution: 0.1° or 1°.

Westward®—Splash-resistant instrument features selectable °F/°C, 15-sec. Auto-Hold, and Auto-Off. Resolution: 0.1°F/C.

AMPROBE EXTECH INSTRUMENTS Milwaukee UEI TEST INSTRUMENTS

Dual-Input Thermocouple Thermometers

Instruments accept probes with miniconnectors.

Amprobe—No. 6NZG9 offers multilogging capabilities plus USB computer download feature. Includes built-in memory, easy data recall, and thermocouple offset adjustment. Resolution: 0.1° or 1°F/C.

Extech®—Nos. 3WU66 and 6RGL2 log up to 8800 data points. Resolution: 0.1°F.

Nos. 4PC60 and 6RGK5 feature elapsed time and programmable Hi/Lo audible alarms. °F/°C selectable. Resolution: 0.2°F.

Nos. 1ZKY2 and 1ZKY4 simultaneously show two parameters and elapsed time. °F/°C/Kelvin selectable. Resolution: 0.1° or 1°F.

Milwaukee®—Monitors Min./Max./Avg./Diff. of 2 temperatures on a high contrast display. Includes magnet strap. Resolution: 0.1°F.

UEI Test Instruments®—Waterproof instrument with 9999 memory position logging using USB software. Features Min./Max./Hold, plus dual-differential T1-T2, T3-T4. Resolution: 0.1°F/C.

ONSET

HOBO Bluetooth® (BLE) Temperature and Humidity Data Logger

Measures and transmits temperature and relative humidity data wirelessly to mobile devices via Bluetooth Smart technology. Allows you to access data anytime from mobile devices over a 100-ft. range. Suitable for use in a range of building monitoring applications, such as tracking storage temperatures in a food warehouse, keeping tabs on humidity levels in a museum, or investigating occupant comfort complaints in an office building.

AMPROBE BACHARACH EXTECH GENERAL fpi UEi YELLOW JACKET

Sling and Fixed-Probe Temperature/Humidity Meters

AMPROBE

Relative humidity and temperature meters. Nos. 2ATB1 and 4FKP5 measure wet bulb and dew point. Store Min./Max. readings for comparisons.

BACHARACH®

Built-in slide rule calculator correlates wet- and dry-bulb thermometer indications for direct reading of relative humidity. Built-in water reservoir.

EXTECH®

No. 40GR99—Plugs into smart device and includes free app. Plots humidity and temperature. 5 user-settable high/low alarms.

Nos. 1PKZ6 and 1ZPV2—Fast-responding, with high 2% RH accuracy. Features Min./Max. memory and data Hold. Include case and 9V battery. No. 1ZPV2 also measures GPP for quick assessment of air moisture content.

Nos. 4GE36 and 4GE38—Calculate T1-T2. Digital LCD. Feature Min./Max. memory, data Hold, and °F/°C.

No. 2HZB6—Noncontact measurement up to 932°F (500°C) with 30:1 distance-to-target ratio and laser pointer. Backlit LCD. USB port. Includes USB cable, software, Type K bead probe, and case.

No. 4ZG11—Dual-digital display shows simultaneous temperature and RH. Built-in self-calibration.

No. 13G532—Gathers readings at selectable 1- to 3600-sec. intervals and stores them on included 4G SD card. Retains up to 99 readings. K/J input. Features Min./Max., data Hold, Auto-Off disable, and RS-232 interface. Includes probe and case.

GENERAL

No. 20VC93—Measures temperature and RH for days, weeks, or months. Software calculates and logs dew point and wet bulb temperatures, and absolute humidity levels. Selectable °F/°C.

No. 20VC89—Measures temperature, RH, and dew point temperature. Displays RH above ambient or dew point temperature on dual-readout LCD. Selectable °F/°C with Auto-power Off.

TEST PRODUCTS INTL.®

Measures humidity, temperature, dew point, and wet bulb. 39" cable length with slender .45" tip dia. Heavy-duty aluminum case with rubber boot.

UEI TEST INSTRUMENTS®

Displays percentage of relative humidity, temperature, and calculates dew point or wet bulb. Features enthalpy, Min./Max., and data Hold.

YELLOW JACKET

Measures humidity, dry bulb, dew point, and wet bulb. Displays RH and temperature simultaneously. Features °F/°C switchable, data Hold, Auto-power Off.

Temperature, Humidity, and Dew Point Data Loggers

EXTECH Supco

EXTECH®

No. 4CWR7—Records up to 16,000 readings for each parameter. Sample rate from 1 sec. or 24 hr. Windows® 2000, XP, Vista and 7 compatible analysis software.

No. 5WYV9—Dual LCD for RH and temperature readings. Records data with data and time stamps on SD card in Excel® format for transfer to PC.

No. 5WYW0—Displays barometric pressure, temperature, and RH. Date/time stamps and stores readings on an SD card in Excel format for easy transfer.

SUPCO®

No. 1TMR4—Selectable PC-control, delayed start, and push-button start-stop recording options. Stop-when-full and continuous rollover memory settings. °F/°C temperature. Compatible with Windows 98 and higher.

No. 1MTR5—Instantly displays and continually graphs temperature and humidity in real time. Compatible with Windows 98SE, ME, XP, or above.

Item	Temp. Range (F)	Relative Humidity Range	Battery Life	Sample Point Storage	Digital Readout	Mfr. Model	Item No.
Extech

Remote Probe Temperature/Humidity Meters

No. 6T444 and 46F194—Calculate differential temperature between probes. Feature backlit display and sealed membrane touch pad. Continuous scan mode stores Min./Max. data for all three zones.

No. 4FKP4—Digital instrument has an extended probe for easy target access. Min./Max. memory, data Hold, dual display, and selectable °F/°C. With wet bulb and dew point.

No. 4FB61—Features infrared (IR) thermometer to provide noncontact surface temperature measurements from -58° to 932°F. Dual display, data Hold, and built-in stand. Includes humidity/temperature probe.

No. 3LYH7—Microprocessor-based design and do-it-yourself calibration to maintain accuracy. Displays temperature and relative humidity. Includes probe and 3-ft. cable that is ideal for hard-to-reach areas.

No. 3LYW2—Unit displays humidity or dew point and has a Hold key to freeze reading for later viewing. Data logger captures readings manually or automatically. Has computer output for data downloading.

No. 30ZY68—Compact design features large dual display of temperature, humidity, or dew point. Uses precision capacitance sensor and has Min./Max. function that will store and recall readings. Auto-power Off function has disable feature and data Hold can freeze readings. Includes probe, battery, and case.

Thermistor Thermometer/Probe Kits and Pipe Clamp Probe

No. 3T189

No. 4KY56

No. 2T618

POCKET THERMOMETERS

Compact probes sense air or surface temperature. Reading hold. Resolution: 0.1°. Display: 1¾" x ½".

LOW/HIGH ANNUNCIATOR

Backlit display, sealed membrane touch pad, and Min./Max. memory. Features indicators for over-range, under-range, and discharged battery. Resolution: 0.1°F or °C, selectable.

CORDLESS PIPE CLAMP PROBE

Versatile instrument measures pipe temperature and has stainless steel, 2.5" retractable probe to measure liquids and solids. For pipes up to 1⅜" dia.

3-ZONE TEMP. INSTRUMENTS

Measure up to three temperatures plus T1-T2-T3 differential. Backlit display, sealed membrane touch pad, and Min./Max./Avg. memory. Feature indicators for over-range, under-range, and discharged battery. Include 3 interchangeable probes (air, surface, and insertion).

Heat Stress Monitors

No. 2LVT5—Wet bulb globe temperature (WBGT) meter displays apparent ambient temperature (heat stress index) with or without the effects of direct sunlight. RS-232 interface.

No. 20LK14—Built-in multiparameter sensor measures heat index, WBGT, humidity, ambient temperature, dew point, and wet bulb. User programmable heat index/WBGT alarm.

No. 46AC37—Measures wet bulb globe temperature (WBGT), black globe temperature (TG), relative humidity, air temperature, wet bulb, and dew point.

Contact Thermometers, Dry Wells, and Calibrators

FLUKE

Broad line of contact temperature measurement products provide front-line troubleshooting plus trending and reporting for preventive maintenance in industrial, HVAC, and electrical applications. NIST Certified models include NIST in Mfr. Model or as noted in text.

CONTACT THERMOMETERS

Fluke 51-2B and 53-2B
- Single input
- Rugged industrial holster
- Batteries replaceable without recertification

Fluke 52-2B and 54-2B—Fluke 54-2B models include data logging/trending. FlukeView® Forms software sold separately.
- Dual input
- Real-time clock for time stamping

REFERENCE THERMOMETERS

Fluke 1551A/1552A—"Stik" thermometers are intrinsically safe.
- Replace mercury thermometers
- -50°C to 300°C (-58°F to 572°F)
- ±0.05 °C accuracy (±0.09°F)
- 300-hr. battery life (3 AAA batteries)

Fluke 1523/1524—NIST Certified, calibration certificate included. Also include I/O Tool Kit software, data cable, and power cord.
- -200° to 420°C
- ±0.011°C accuracy
- Measure PRT, thermistors, or thermocouples
- Graphs and data logs

HANDHELD DRY WELLS

Fluke 9100S/9102S Series
- ±0.25°C accuracy
- 2 models with a variety of well sizes
- Heat to 375°C in 9.5 min.
- NIST Certified, certificate included

INDUSTRIAL DUAL-BLOCK CALIBRATORS

Fluke 9009 Series—Rugged, lightweight, and watertight. No. 4LHA5 has a yellow case. No. 4LHA6 has a black case.
- -15° to 350°C
- ±0.2°C accuracy
- Hot block and cold block in 1 unit
- NIST Certified, certificate included

4" Chart, 3½"-Digital Display

8" Chart with Thermocouple

DICKSON

Temperature and Temperature/ Humidity Chart Recorders

- Temp. accuracy: ±1.8°F, except 3" chart models are ±2°F

Selectable chart rotation time and temperature range. Flip-up pen arm eases chart and pen changes. Temperature/humidity models have a 0% to 95% RH range; humidity accuracy is ±2% (10 to 60%), ±3% (60 to 95%).

3" Chart—Record temperature ranges in refrigerators, freezers, and incubators, and ambient conditions. Freestanding, wall-mounted, or suspended.
- Dim.: 3.7"L x 3.7"W x 2.3"D

4" Chart—Compact, portable instruments detect and record temperature changes in warehouses, commercial buildings, and critical storage areas.
- Dim.: 5.2"L x 5.2"W x 2.4"D

6" Chart—With probe for remote measurement, except Nos. 1NFH8 and 1NFJ2.
- Dim.: 7.56"L x 7.56"W x 3.25"D

8" Chart—Operate on 120VAC with AA battery backup.
- Dim.: 9.2"L x 9.2"W x 3.1"D

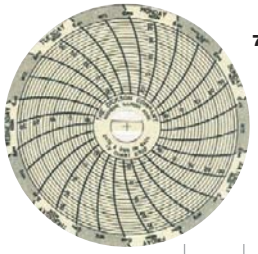
4" Chart Pressure Recorder

Specialty Recorders

DICKSON

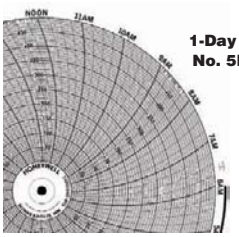
4" CHART PRESSURE RECORDERS
- Battery operated
- Dim.: 6.25"L x 6"W x 2.9"D
- ¼" NPT connection, nut not required

Instruments provide 7-day or 24-hr. pressure records for water, gas, and utility pipes. RH range: 0% to 95% noncondensing. Include pen and AA battery.



8" CHART UNIVERSAL INPUT RECORDER
- 120VAC
- Dim.: 9.2"L x 9.2"W x 3.1"D
- Input range: 0 to 20mA, 4 to 20mA 0 to 5VDC, 1 to 5VDC

Remote sensing capability for voltage or current transmitters. Features selectable output and recording times. High/Low alarms and Min./Max. readings. Charts sold separately. Includes pen and AC adapter.



DISPOSABLE TEMPERATURE RECORDERS
- Self-contained power source
- Operating range: 0% to 95% RH (noncondensing)
- Dim.: 5.5"L x 4.12"W x 2.5"D

Suitable for proving the integrity of shipments with temperature-critical storage parameters. Include Document of Shipping sheet and mounting tape.

NotifEye™ Temperature Monitoring Kits

- Temp. range: -25° to 180°F
- Wireless range: 2500 ft.
- Not compatible with Windows® XP or Macintosh® operating systems

The NotifEye cloud-based temperature monitoring and notification system is a low-cost wireless solution for monitoring and notification. System data is accessible online 24/7, while out-of-range notifications are sent in real-time as e-mail and text alerts. Sensors pass information wirelessly to the software database which collects and records data 24 hours a day, every day. Gateway Buffer, No. 52ET88, will store 65,000 readings if the gateway is not receiving power. Each Wireless Temperature Sensor is battery operated and monitors against preset conditions that are user-defined within the NotifEye application. Wireless Humidity Sensor, No. 52ET86, measures 0% to 90% relative humidity.

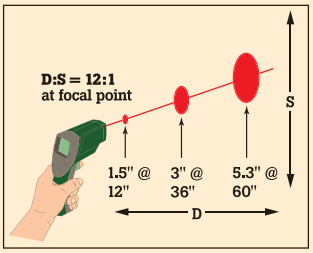
Water Damage Restoration Kit	MO280-KW	**2TKT8**

Infrared Thermometer Terminology



Noncontact IR thermometers determine temperature using thermal radiation from the object(s) being tested.

Focus Spot Size and Distance—Indicates the diameter measured at a given distance from the object. For example, 1" @ 12" indicates that a thermometer focuses on a 1"-dia. spot 12" from the thermometer.

Emissivity—A surface's ability to give off infrared radiation relative to a black body, which theoretically emits at 100% or 1.0. Material and surface texture affect emissivity. For example, a given polished metal may have an emissivity value of 0.20 and wood a value of 0.95. IR thermometer selection may consider whether a surface/immersion probe is required for adjustments to emissivity.

1-Dot Laser Sighting—A laser pointer identifies the target area.

2-Dot/Convergence/Dual Laser Sighting—2 lasers converge to a single point; a 1"-dia. around that point is the measurement area.

Focus Spot Size and Distance

FLUKE

Infrared Thermometer

- Infrared technology allows quick surface temperature readings
- Takes rapid and frequent noncontact temperature measurements without risk of cross contamination

A complete temperature measurement and monitoring solution for food service professionals. Helps guard against improper receiving, storage, and holding temperatures. Features HACCP check lights for instant recognition of safe/unsafe temperatures. Hand washable (IP54 sealed). Includes battery and quick-start guide.

Visual Infrared Thermometers

FLUKE

The visual image and infrared heat map are blended to help exactly identify the trouble spot, with Near and Far modes to align the visual and infrared lenses. A center measurement box lets you see the exact area of temperature measurement on screen. Temperature alarms and automated monitoring help predict problems over time; get alerts when a temperature is outside range. Markers help identify hot and cold spots within the field of view. SmartView® reporting software helps you optimize the image blending and create professional reports.

Infrared Thermometers

FLUKE

Bright laser provides precise targeting.

Fluke 59 Max
No. 20AZ68

Fluke 59 Max/59 Max+
- Temperature measurement to 662°F (No. 20AZ68) and 932°F (No. 20AZ69)
- Distance to spot ratio: 8:1 for No. 20AZ68, 10:1 for No. 20AZ69
- 1P40 rated

Small and lightweight design for easy portability.

Fluke 61
No. 3MU88

Fluke 61
- Temperature measurement to 525°F
- 1-button point-and-shoot

Infrared thermometer has an easy-to-use, remote control-shaped housing.

Fluke 64 Max
No. 54DD62

Fluke 62 Max/62 Max+/64 Max
- High-temperature measurement to 932°F (No. 16X949) and 1112°F (Nos. 16X950 and 54DD62)
- IP54 dust- and water-resistant
- 3m drop-tested
- Distance to spot ratio: 20:1

Lightweight mini IR thermometers are designed for a natural hand fit. Large backlit LCD shows Min./Max./Avg./Dif. No. 16X950 employs dual-rotating lasers to identify the target.

Fluke 561
- High-temperature measurement to 1022°F
- Noncontact and contact measurement
- 3 emissivity settings

Bright laser provides precise targeting. Easy scroll-through menu. No. 20Z193 displays thermocouple temperature readings.

Fluke 561
No. 1PEK8

Fluke 566/568
- High-temperature measurement to 1470°F
- Noncontact and contact measurement
- Continuous trending and data logging

Include a hard case for maximum protection.

Fluke 566/568
No. 2DPJ1

Fluke 572-2
- High-temperature measurement to 1652°F
- Distance to spot ratio: 60:1

Rugged, ergonomic design for tough environments. Dual laser sighting for fast, accurate targeting.

Fluke 572-2
No. 29TJ26

Wireless Temperature Module

FLUKE

FLUKE CONNECT

This versatile K-type thermocouple thermometer wirelessly relays measurements to other Fluke Connect®-enabled test tools. Designed to detect temperature differences between 3 phases in ⅓ the time of previous methods. Sends data to your laptop and goes from logging to analysis and diagnosis. Records over time to monitor circuit load changes for an hour, a shift, or a week.

Temp. Range	Accuracy	For Use With	Includes	Temp. Measuring Element	Wire Length	Mfr. Model	Item No.

Find more thermal imagers for troubleshooting, diagnostic, and reporting applications on Grainger.com®.

Why Use Infrared?

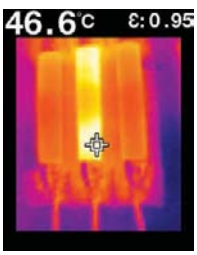
Infrared thermography is the only diagnostic technology that helps you instantly visualize and verify thermal performance, detect potential electrical faults, and find hidden sources of water or air leaks. Thermal imaging cameras let you find problems and quantify them with precise non-contact temperature measurements. Use thermal images to document issues and your repairs, and to create professional reports to help you verify your work.

Professional Infrared Cameras

Spot Infrared Camera

Personal Infrared Camera

Thermal Imaging Camera for Smartphones



FLIR

Imagers attach to your smartphone to transform it into a powerful infrared camera. Features such as spot measurement tools, adjustable temperature controls, and a range of color palettes help pinpoint surface temperature differentials so you can identify potential problems. FLIR® proprietary Multi Spectral Dynamic Imaging (MSX®) enhancement adds visible spectrum detail, while VividIR™ image processing offers a 4X boost in resolution and clarity. The FLIR OneFit™ adjustable connector extends up to 4mm to fit many popular protective cases.

Spot Infrared Cameras

FLIR

- Imaging enhances single-spot measurements
- IR detector resolution: 4800 pixels (60 x 80)
- 2" TFT color LCD (176 x 220 pixels)
- Laser pointer
- Adjustable emissivity
- Pistol grip style

Rugged, easy-to-use point-and-shoot cameras help reduce diagnostic time and simplify repair and maintenance operations. Quickly find hidden hot and cold spots for instant troubleshooting in commercial electrical, facility maintenance, HVAC, and similar applications. A spot temperature laser indicator instantly shows what's hot and where to aim; once you find a trouble spot, record images to show customers and include in reports.

MSX® Technology Makes Infrared Imaging Affordable for Everyday Use

Multispectral dynamic imaging (MSX) makes it easier to interpret an infrared image by adding visual-spectrum detail—eliminating the need to refer back to a visual image. Visible edges are detected and added to the infrared image for extraordinary infrared detail that instantly highlights and orients problem locations. Text becomes clearly visible to read labels or identifiers within the image.

Hot Water Transfer Without MSX

Hot Water Transfer Pipes With MSX

Image detail orients the problem location

Visible text labels are easy to read

The infrared images shown are for illustrative purposes only, and may not have been taken by the camera series depicted.

E4, E5, E6, and E8 Infrared Cameras with Wi-Fi® Connectivity

No. 22UL83

- With MSX® Enhancement
- IR detector resolution up to 76,800 pixels (320 x 240)
- On-board 640 x 480 digital camera
- 3" color LCD
- Easy to use; weigh only 1.27 lb.

Diagnostic instructions capture and store simultaneous infrared (IR), visual, and MSX-enhanced image data as radiometric JPEGs. Feature spot measurement mode and blending function (Fusion).

Each includes FLIR Tools reporting software, USB cable, power supply/charger with 4 plugs, hard carrying case, and swappable rechargeable battery. NIST Certified models include calibration certificate.

Enhanced features on E6 and E8 models include level/span picture-in-picture image and area box measurement mode. E8 models also include an extra battery and external battery charger.

Advanced Features for Commercial and Industrial Thermography

MPEG-4 and video streaming to Apple® and Android™ mobile devices; video recording to SD card

METERLiNK™-enabled to send data to Infrared Camera

High-resolution touch screen

E Series Wireless Professional Infrared Cameras with MSX®

FLIR

- METERLiNK™ enabled
- Up to 464 x 348 IR detector resolution (76,800 pixels)
- 5 MP digital camera with LED lamp
- 4" high-contrast touch-screen color LCD
- Simultaneous IR and visual image storage (MSX)
- GPS and compass

Higher performing point-and-shoot imagers have 30 Hz image frequency to capture moving targets. They feature radiometric IR video streaming (MPEG-4) and on-screen temperature difference (delta T). Professional analysis software package integrates seamlessly with the camera for easy downloads, quick reporting, and camera firmware updates in the field. Connect wirelessly to an Apple® or Android™ mobile device to instantly send infrared images or reports via email. Each includes SD card, USB cables, universal power adapter, 2 rechargeable batteries, battery charger with power supply, and hard carrying case.

Industrial/Predictive Maintenance— Cameras offer superior resolution and range performance needed to quickly identify hot spots and discover potential points of failure in electrical distribution and mechanical systems.

Building Diagnostic/Restoration— Cameras offer superior sensitivity to detect even subtle indications of building deficiencies and moisture intrusion.

MPEG-4 and video streaming to Apple® and Android™ mobile devices; video recording to SD card

FLIR

Infrared Guided Measurement™ (IGM) Technology

IGM-enhanced tools use thermal imaging to quickly pinpoint potential problems, to help you work faster and get on to the next job.

DM166 and DM285 Imaging DMMs—Feature-packed multimeters are ideal for troubleshooting and diagnosing complex issues in high- and low-voltage applications.

CM275 Imaging Clamp Meter—This 600A true RMS AC/DC clamp meter visually guides you to anomalies and helps you see the potential hazards. For details, see page 542.

MR160 Imaging Moisture Meter—The thermal imaging sensor helps you quickly see temperature patterns associated with possible hidden moisture, so you know the best place to put the meter probe to capture accurate readings. For details, see Grainger.com®.

MR176 Imaging Moisture Meter—As you seek hidden moisture, IGM and an integrated laser and crosshair mark the precise spot for further testing and investigation. For details, see Grainger.com®.

T Series High-Performance Infrared Cameras with MSX®

No. 423N27

No. 40ZJ89

Articulating thermal imagers have quick-capture mode and intuitive, easy-to-use touch screen controls. Rigorous inspection requirements are aided by high-performance features: voice, text, and drawn comments annotate images. FOV Match automatically adjusts the digital camera field of view to the IR image field. Compass adds the camera-pointing direction to every image.

Professional reporting software manages large amounts of images and data before generating reports. The imagers can stream video via Wi-Fi® direct to an Apple® or Android™ mobile device for field analysis, reporting, and collaboration via PDF or email.

Each includes 25° lens, lens cap, 2-bay charger, FLIR Tools analysis software, video and USB cables, SD memory card, Bluetooth® headset (T1K Series), hand strap, neck strap, hard carrying case, power supply, and 2 rechargeable batteries.

Building Diagnostic/Restoration models have built-in RH/dew point alarm that displays areas with risk of surface condensation where mold could occur, and an insulation alarm to identify areas that don't fulfill insulation requirements.

Industrial/Predictive Maintenance models provide wide temperature ranges that meet the needs of thermographers conducting electrical and mechanical inspections.

T500 Series—Lightweight cameras feature maximum flexibility and efficiency for both builidng and industrial applications.

- IR detector resolution: up to 161,472 pixels (464 x 348)
- UltraMax™ super resolution using FLIR Tools software
- 5 MP digital camera with built-in LED light
- 4" touch screen color LCD
- Built-in microphone and speaker
- Laser distance meter with area measurement
- Meterlink™ enabled

T1K Series—Provide the highest resolution to measure small targets from long distances. Feature manual and autofocus. Interchangeable and articulating lenses. Flexible ergonomics allow the lens to be pointed to the target and the display or viewfinder tilted to your eye.

- 1% accuracy within limited temperature range
- IR detector resolution: 786, 432 pixels (1024 x 768)
- UltraMax™ resolution™: 3,145,728 pixels (2048 x 1536)
- FLIR's Precision Point™ True HD lenses with ultrasonic motor
- FLIR's Precision Point™ HD optics together with 1K resolution provide unmatched temperature accuracy of small targets from a distance
- 4.3" touchscreen color LCD

T840 Infrared Camera with Viewfinder

- Detector resolution 640 x 480 Pixels
- Field of view 12.5° Horizontal x 12.5° Vertical
- Auto and manual Focus

T840 infrared camera is designed to help electric utility and other thermography professionals survey equipment both indoors or outdoors and seek out signs of failure. An integrated eyepiece viewfinder and a bright 4-inch color LCD display, the T840 makes it easy to conduct inspections outside in bright, challenging light conditions. The 180° rotating lens platform and ergonomic design helps diagnose failing components in hard-to-reach areas.

K Series Thermal Imaging Cameras

- Dropproof to 6.5 ft./2m
- Easy-to-use in a firefighter's gloved hand

Expanded lineup of thermal imaging cameras (TICs) features Flexible Scene Enhancement (FSX®) to give you sharp, detailed views of firefighting scenes, from inside, outside, and above the fire—even through thick smoke.

FLIR K1, K2, K33, and K53 Powerful TICs—Standard-issue TICs designed for every firehouse. Provide each crew member with an affordable camera so everyone has the essentials for working faster and safer.

FLIR K45, K55, and K65 High-Performance TICs—High-performance cameras with FSX enhancement offer detailed, rich imagery on a large, bright 4" LCD. Navigate the smokiest environments and instantly distinguish people, room features, and make critical decisions in the field.

IR windows support safe infrared image capture and NFPA compliance with FLIR or competitive cameras

Visible light is clearly transmitted to capture visual as well as infrared images (LED lamps recommended)

IR windows can be used indoors or outdoors and support Laser LocatIR targeting

FLIR

Infrared Inspection Windows

- Broadband crystal is compatible with all infrared cameras and UV, visual, and fusion inspections
- Can be mounted on steel and Lexan® panels
- Indoor and outdoor use

Constructed to make thermographic inspection of energized electrical systems as fast and safe as possible, without added expense. Arc-resistant to protect against arc flash incidents. Visible light is transmitted clearly for image capture, although LED lamps are recommended for optimal results. Laser LocatIR targeting is supported for precise data collection.

Each is complete with IR window in an aluminum or stainless steel frame with a hinged cover and calcium fluoride lens. PIRma-lock™ installation system secures the window assembly safely in place. Permanent identification can be marked on the integrated label area for reference. Limited lifetime warranty against manufacturer defects.

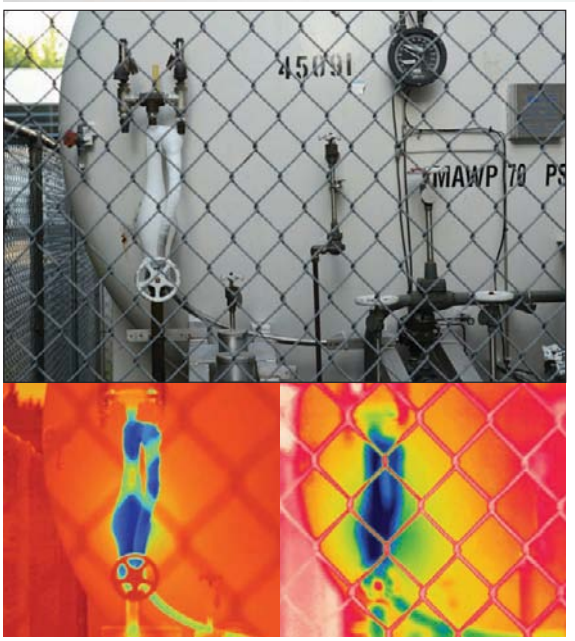
Fluke Connect®, the largest system of software and wireless test tools in the world.

The Fluke Connect® system of over 30 wireless tools helps you:

Increase the safety of your team. Reduce your team's exposure to safety hazards such as arc flashes and running motors by connecting tools to your equipment that allow you to transmit measurements wirelessly.

Save time and money and increase productivity by creating reports in the field and sending them to any team member's smartphone or computer for immediate diagnosis.

The growing system of Fluke Connect wireless tools includes:



- Infrared cameras
- Vibration meters
- Digital multimeters
- Current meters
- Voltage meters

IR-Fusion® vs. Picture-In-Picture

IR-Fusion® technology is the precise alignment of the infrared and digital images taken by a Fluke® IR camera to quickly and accurately troubleshoot a scene by fusing the infrared and digital images. This powerful functionality is the basis for Fluke's AutoBlend™ mode, which allows adjustable transparency of the infrared image, thereby facilitating easy documentation and communication of the problem spot.

Enhanced Image Quality and Temperature Measurement Accuracy

Enhanced image quality and temperature measurement accuracy turn your 320 x 240 images—4x the resolution and pixels— with **SuperResolution.**

Easily navigate over, under, and around objects with the only full **180° articulating lens** and see the image before you capture it.

Quick and easy in-field analysis with **IR-Fusion® technology** and advanced touchscreen functions.

FLUKE

Expert Series Infrared Cameras

- IR detector resolution up to 307,200 pixels (640 x 480)
- 640 x 480, 5.7" touch-screen color LCD

Cameras have a 240° rotating screen that minimizes glare and makes it easy to capture images when equipment is in awkward or hard-to-reach areas. Compatible with Fluke Connect®, so you can connect your cameras to the largest network of wireless test and measurement tools. No. 406D31 has on-camera SuperResolution feature that allows you to create a 1280 x 960 resolution image from your original 640 x 480 image, with 4x the pixel data.

Thermal Imager and Infrared Inspection Windows

CorDEX

Panel Mounted Thermal Imager—The panel mounted thermal imager incorporates dual vision; thermal and visual cameras which captures fully radiometric data every second. Don't spend time traveling from location to location, log into your MN4000 remotely and inspect your electrical assets from your office using it's on board web server or using the dedicated MONITIR software.

Infrared Inspection Windows—Intelligent inspection windows provide protected access to help comply with NFPA 70E safety standards. Embedded RFID tag and barcode communicate with CorDEX CONNECT™-enabled devices and smartphones to automatically correct for transmission loss. Unlimited voltage range. NEMA Type 3, 12, 4 and IP65 for indoor and outdoor use.

- **Broadband crystal operates with any visual, IR, or ultraviolet camera**
- **Spring-loaded cover; ¼ turn to open**
- **Supplied ready-to-install; no gasket fitting required**

Handheld Thermal Cameras

Seek thermal

State-of-the-art infrared cameras help find potential problems fast, and document findings for follow-up and reporting. High-resolution thermal imaging is ideal for electrical and industrial maintenance, process monitoring, tank levels, steam traps, utility inspections, and building maintenance. Each camera features a large color display and long-lasting rechargeable battery.

EXTECH INSTRUMENTS FLIR

High-Definition Videoscope Inspection Cameras with Advanced Capabilities

HDV600 Series video borescopes have a large, high-definition color TFT LCD monitor that delivers 640 x 480-pixel images and video. Meter is waterproof (IP67) and camera head with cable is waterproof (IP57). 1 GB SD memory card stores up to 14,600 images or up to 4 hr. of video with voice annotation. AV output for viewing images and video on a monitor. USB port allows data transfer to PC.

Select preconfigured system with camera and cable, or choose monitor-only No. 6RAX5 and pair with optional cameras (sold separately) for custom configuration. Each HDV600 Series unit includes AC adapter, USB and AV cables, case, and rechargeable lithium polymer battery.

Nos. 6DWX0 and 6DWU9—Articulating camera head adjusts up to 240° with easy knob control. Allows viewing in obstructed areas where standard camera cannot access. No. 6DWU9 camera control has built-in wireless to transmit inspection results up to 32 ft.

HD Articulating VideoScope Kit—Articulating 5.5mm camera tip facilitates viewing in obstructed areas where standard camera tips cannot access. Images and videos are viewed on the large high resolution color display and can be stored on the SD memory card (included).

Cameras with Cable and Camera Heads—5.5mm and 5.8mm borescope Cameras have flexible cables and QVGA resolution. 25mm borescope Camera Heads feature heavy-duty fiberglass cable for long distances; VGA resolution.

Videoscope Inspection Cameras with Advanced Capabilities

GENERAL

Video borescopes employ water-, oil-, and dustproof IP67 probes for inspection and maintenance in a broad range of industrial, government, military, security, infrastructure, construction, aircraft, automotive, diesel, HVAC/R, oil/power/petroleum, and metalworking applications.

Color TFT LCD delivers 640 x 480-pixel still images and video. Footage can be viewed live, or recorded in still or video format and output to a monitor or PC.

LED lamps in viewing tip adjust for precise illumination. Multilanguage onscreen menu adapts to location.

Each includes main monitor console, standard probe, SD card, tip accessories, USB and AV cables, carrying case, batteries, and charger (if applicable).

No. 8D202 comes with a flexible, obedient probe—camera is lit by 4 LEDs.

Nos. 6FAW2 are equipped with articulating probes whose tips can bend in a ±150º sweep with thumbwheel control: Great for precision inspection in confined spaces.

Nos. 8D202 and 6FAW2—Record video up to 3 hr. on included 4 GB SD card. 1.5X zoom. Each is powered by rechargeable Li-ion battery.

Accessories—Specialty probes make a video borescope more versatile. Flexible-obedient probes hold their configured shape. Soft metal probes slide through pipes more easily. The 72-ft. long pipe Inspection probe is tailored for underwater or underground inspection. VGA probes with antireflection and light boost are great for inspecting very dark areas or equipment with shiny surfaces.

EXTECH INSTRUMENTS | Milwaukee

Inspection Cameras

Milwaukee Nos. 40KJ35 and 40KJ38—Recordable inspection cameras can send high-quality 640 x 480 images and video to the 3.5" wireless LCD monitor from up to 30 ft. away, and save them on included 8GB SD card for later review. Use the 3-ft. cable option for complete control of the camera head and faster positioning; available 9-ft. cable option gives you extended reach in pipes without bulky extensions.

Extech® Instruments Nos. 38W994 and 21EN95—Lightweight video borescopes feature detachable color TFT LCD for clear imaging. IP67 waterproof. Complete with 3¼-ft. flexible gooseneck cable, extension tools, and batteries. No. 38W994 has 4 bright LED lamps. No. 21EN95 has 2 LED lamps, video output cable, and hard carrying case.

Extech® Instruments No. 5CVT1 and 4NUP9—Detachable, wireless color LCD monitor. Borescopes can also transmit date-stamped video and still images up to 32 ft. to any monitor with a video jack. 2 LED lamps. IP67 waterproof. Includes flexible cable, extension tools, micro SD card with adapter, USB and video interconnect cables, AC adapter, and case.

Air Quality Meters and Analyzers

AMPROBE EXTECH INSTRUMENTS TSI ALNOR

Help monitor indoor air quality (IAQ) in occupied spaces. Each instrument employs a nondispersive infrared (NDIR) carbon dioxide sensor.

Amprobe® Hand-Held CO_2 Meter—Portable meter provides instant feedback in offices, production floors, schools, and hospitals. Features easy-to-read large LCD with simultaneous CO_2, temperature, and relative humidity (RH) readings. Includes hard carrying case.

Extech IAQ Analyzer—Features continuous and manual datalogging including min./max. with time stamp. High/low audible and visual alarms. Stores 99 manual/20,000 continuous readings. Includes software and RS-232 cable.

Extech IAQ Carbon Dioxide Meter—Checks for CO_2 concentrations, measures temperature and relative humidity, and displays calculated dew point and wet bulb. Programmable CO_2 audible alarm. Transmits continuous readings to PC via USB cable. Includes data acquisitions software.

Extech Portable IAC CO_2 Meter—Measures carbon dioxide, temperature, humidity, dew point, and wet bulb. Calculates 8-hr. and 15-min. TWA. Programmable audible alarm and backlit triple LCD. Includes software, RS-232 cable, and carrying case.

TSI® Alnor® IAQ Tester—IAQ-Calc™ cost-effective meter features a low-drift NDIR sensor and a sampling function that records multiple-point measurements. Includes calibration certificate and carrying case.

Extech® IAQ CO/CO_2 Meter —Checks CO and CO_2 concentrations, measures temperature and relative humidity, and displays calculated dew point and wet bulb. Calculates 8- hr. and 15-min. time-weighted average (TWA). Datalogs up to 32,000 points. Includes USB cable, software, and case.

Air Particle Counters

GA GRAINGER APPROVED TSI ALNOR EXTECH INSTRUMENTS

- Flow rate: 0.1 cfm

Data sets can be stored and downloaded for analysis and reporting. Each includes zero filter, software, carrying case, AC power supply, and battery.

No. 23V750—6-channel instrument has easy-to-use graphical interface. Stores up to 5000 sample records on micro SD card (4 GB card included). Also includes tripod and USB cable.

No. 4WDT2—Intuitive keypad for easy setup: Up to 3 channels of simultaneous data with selectable middle channel. Internal memory stores up to 1500 sample records. Also includes probe, tubing, and NIST calibration certificate.

No. 30JZ52—Simultaneously measures and displays 6 channels of particle sizes. Measures air temperature, humidity, dew point, and wet bulb. Includes NIST traceable calibration certificate.

FLUKE

Indoor Air Quality Meters

Diagnostic tools help control indoor environments and manage energy use, providing automated measurements, data collection, and analysis.

FLUKE CO-220 CARBON MONOXIDE METER

Beeper triggers with increasing frequency as CO level rises. Bright backlight makes it easy to view the large LCD screen under dim lighting.

FLUKE 971 TEMPERATURE HUMIDITY METER

- Measures dew point, wet bulb temperatures, and humidity
- 99-record storage capacity
- 0.1°F/0.1°C resolution

Backlit dual-display.

FLUKE 922 AIRFLOW METER/MICROMANOMETER

- Measures differential and static pressure, air velocity, and flow readings
- Min./max./avg./hold

Duct shape and size are user-defined for maximum air flow accuracy. Colored hoses help with proper interpretation of pressure readings.

Pocket Anemometers

EXTECH INSTRUMENTS

Waterproof Foldup—Nos. 4XX70 and 1RK12 simultaneously display air velocity and temperature or wind chill, and feature selectable averaging mode.

Heat Index—Measure humidity and temperature (air and PT1000 thermistor), plus heat index and barometric pressure. No. 30ZP37 also measures visible light from 0 to 1860Fc (20,000Lux).

Mini Vane—No. 40GR97 has a built-in compass and provides wind direction and 360° readings. No. 453A48 4-in-1 anemometer measures air velocity, air flow, air temperature, and Type K temperature. Data Hold and Min./Max. function.

CFM/CMM Thermo-Anemometers

Extech®—No. 5GCD4 includes USB port plus software.

TSI Alnor®—Store up to 12,700 samples. No. 12A182 also measures humidity and stores 26,500 readings.

Amprobe®—Also measure humidity, dew point, wet bulb, and wind chill. Pocket-size.

Kestrel—No. 8UME8 measures 3 second average wind speed. No. 49KA91 has a compass, and measures crosswind and headwind/tailwind. No. 8D481 measures water, and snow temperature, as well as wind chill. No. 9U521 measures dew point, relative humidity, wind chill, and heat stress index.

Westward—Includes interchangeable probes.

UEI Test Instruments™—Also measure relative humidity, and wet and dry bulb.

Cone Kit—Quick, easy air flow measurements for common-size ducts.

AcuRite®—Also measures humidity, altitude, and wind chill, calculates heat index, and keeps records for high and low temperatures. Can be mounted on tripods with ¼" 20-thread fitting.

Hot Wire Thermo-Anemometers

Dual-purpose instruments measure temperature and air speeds in ducts and ventilating systems. Auto-Off.

DWYER®

Shows simultaneous air velocity or air flow and temperature on high-contrast backlit LCD. Stores up to 99 readings. 8" stainless steel probe is etched with insertion depth marks.

EXTECH®

Nos. 3MPE6 and 5GCD3 and 4KC29 & 5ZT04— Simultaneously display air temperature and air velocity down to 40 ft./min. Telescoping probe is designed to fit into small openings.

Nos. 3MPE6 and 5GCD3 also measure air flow in cfm/cmm and display instantaneous or 20-pt. average air flow down to 40 ft./min. Probe extends to 3 ft.

Nos. 4KC29 and 5ZT04 2-ft. probe extends up to 7 ft. with cable.

Optional Data Acquisition Software No. 1CLF1 is available on Grainger.com®.

Nos. 13G530 and 36FW25—Selectable sampling rate of 1 to 3600 sec. Display simultaneous air velocity and temperature. Telescoping probe. Accept Type J/K thermocouple for high-temperature measurement. Retain up to 99 readings, or use included SD card to data log up to 20 million readings in Excel® format.

TSI ALNOR®

All have LCD.

No. 1UCY4—40" telescoping straight probe.

Nos. 1UCY6 and 1UCY7—Both have 42" articulated probe. No. 1UCY7 also measures relative humidity to 95% (±3% accuracy) and calculates dew point and wet bulb temperature.

UEI TEST INSTRUMENTS™

Directly captures air temperature, relative humidity, and air velocity. Calculates wet bulb temperature, dew point temperature, and air volume. Air volume is displayed in real-time, or choose a timed average with start/stop capabilities to traverse ductwork. Also features 0.7" small diameter air vane on 39" long telescoping probe. Includes hard carrying case, 9V battery, and manual.

TESTO-C

Determines air velocity, temperature, and volume flows. Via Bluetooth®, readings are transmitted wirelessly to convenient app-based operation on smartphone or tablet.

Ultrasonic Leak Detectors

Diagnose problems before they result in major breakdowns. Units detect ultrasonic sound produced by pressurized leaks, vacuum leaks, arcing electrical power distribution equipment, and faulty seals and gaskets.

Amprobe®—Parabolic shield reduces background noise. Extension tube for difficult or dangerous areas.
- **35,000 to 45,000 Hz AC frequency response**

Spectroline®—Solid-state circuitry enhances sensitivity and simplifies operation. Touch-control pad with 5-LED signal-intensity indicator and audible alarm. Contact probe helps diagnose internal components without disassembly. Probe reaches into tight spaces.
- **36,000 to 44,000 Hz frequency response**

Bacharach®—No. 6JHN8 simultaneously detects vacuum and high-pressure leaks. Includes a foldable headset. Other instruments have an internal sensor and hard hat-compatible headphones. No. 6JHP2 employs 2 software-controlled sensors. No. 6JHP4 has multiple detection bands, including unique acoustic bands.
- **34,000 to 42,000 Hz frequency response**

Portable Combustion Analyzers

BACHARACH®

Units all utilize the B-Smart® carbon monoxide (CO) sensor. INSIGHT® Plus sensor measures 0 to 4000 ppm with integral NOx filter. InTech® has 0 to 2000 ppm CO sensor. Feature internal sampling pump and print capability.

Fyrite® INSIGHT® Plus Combustion Analyzers—5-in-1 residential/commercial testers analyze steady-state combustion and efficiency of 9 selectable fuels. Backlit LCD with zoom and full-color display with dynamic graphing enhance combustion process analysis. O_2 sensor life indication. Proprietary Tune-Rite™ troubleshooting software is included.

- Color graph screens show stack hot spots and trending
- Measure combustion/ambient and flue gas temperature, O_2, CO, and draft/differential pressure
- Draft pressure: 100" WC
- Calculate CO_2, CO air free, and excess air

Fyrite® InTech® Residential Analyzers—Basic electronic analyzers calculate the efficiency of residential furnaces and combustion appliances. Lightweight and easy to use for routine service calls. Turn it on, select 1 of 6 fuels, and see quick results on the digital display.

- Measure stack and ambient temperature, O_2, and CO
- Calculate carbon dioxide (CO_2), CO air free, and excess air

Series	Combustion Efficency	Primary/Ambient Air Temp.	Stack Temp.	Excess Air
InTech	0.1 to 100%	-4 to 212°F	-4 to 1202°F	0 to 250%

Combustion System Analyzer Kits

TESTO

Nos. 36H452 and 36H453

- Measure O_2, carbon monoxide (CO), temperature, and draft pressure
- Calculate CO_2, excess air (EXA), and efficiency

Testers are ready to use after a fast, 30-sec. warmup. Magnetic back for hands-free operation. Available with an IR printer. Nos. 36H452 and 36H453 have a 2-line backlit display.

TEST PRODUCTS INTL.

- Measure CO and CO_2
- Calculate O_2, efficiency, excess air, and ratio
- Analyze CO

Full-system diagnostic analyzers help reduce fuel costs.

UEI TEST INSTRUMENTS

No. 49KE07

- Measures O_2, CO, inlet and flue temperature, and differential pressure/draft
- Calculates efficiency, CO_2, net temperature differential, losses, excess air, CO/CO_2 ratio, and poison index

Monitors emissions to protect the environment. Services and tests combustion systems over 10,000 MBtuH with high-concentration gas levels for extended durations. Measures 5 gases simultaneously (6 with direct CO_2 measurement). Autolog and onboard printer.

No. 36H167

- Measures differential pressure
- Dual-input to measure pressure to ±60 InWC (inches water column)

Senses combustible, noncombustible, and toxic gases. Includes combustible gas leak detector and electronic manometer. Measures in 11 scales: inH_2O, psi, bar, mBar, kPa, inHG, mmHG, ozin, FtH_2O, cmH_2O, and kgcm.

MACURCO GAS DETECTION

Gas Detection Systems

Gas Detector/Controller/Transducers— Dual-relay electronic detection systems monitor gas concentrations. Automatic fan/louver/valve control helps maintain safe levels in parking garages, warehouses, and other commercial sites. 4-20mA current loop and alarm relay.

6-Series low-voltage units for boiler rooms, vehicle maintenance areas, kitchens, and battery rooms.

12-Series line-voltage systems with internal switching power supply mount to 4" x 4" electrical boxes.

Gas Detectors for Fire/Security Systems—Low-voltage electronic detectors connect to alarm controls.

Exhaust Fan Control Panels—Automatic controls provide up to 3 ventilation control zones, choice of sensor- or time of day-based control, and include drivers for external horn or strobe alarms. Lockable NEMA 1 enclosure with external keypad, externally visible status, system, and alarm indicators. Control up to 12 gas sensors (sold separately).

Digital Sound Level Meters and Data Loggers

AMPROBE EXTECH INSTRUMENTS GA GRAINGER APPROVED WESTWARD

Type 2 meters are suitable for workplace and environmental noise measurements. Dual-range meters take environmental and workplace noise measurements and can be used for product evaluation/certification and audio system installation.

AMPROBE®

Designed to be used by safety engineers, health, industrial and safety officers, and quality control professionals to perform acoustic analysis and check for compliance with safety regulations. Meters use two different audio weighting filters: A weighting for general noise sound level, and C weighting for measuring sound level of acoustic material control. Features Min./Max. recording and Data Hold. Comes with carrying case, user manual, and 9V battery (installed).

EXTECH

Digital Sound Level Meter Kit

Good for noise ordinance enforcement, workplace noise surveys, and installing fire alarms and speaker systems, the kits pair Digital Sound Level Meter No. 9WTE8 with a 94dB sound calibrator to verify and calibrate meter operation.

Sound Level Data Logger

No. 1TZP3 Features adjustable alarm with visual indicator and data Hold. No. 9M871 instrument captures time stamp at selectable sampling rate. Manual or programmed start.

Sound Level Meter

No. 8ZRU0 provides real-time sound exposure level (SEL) and time-averaged (Leq) measurements on 4-digit LCD with analog bar graph. 9- to 25-pin gender changer, male and female voice. No. 9TDL6 tripod-mountable 6-range instrument has a background noise absorber mode for machine noise measurements. Analog bar graph and Min./Mmax. values. Optional software/cable package No. 3LYE6 is available on Grainger.com®.

Sound Level Meter with Display

2-range meter has backlit LCD.

Sound Level Monitor and Alarm

Bright LEDs alert user when sound level is too high or too low. Reads LEDs from 30m (100-ft). Continuous monitoring of sound level. Wall, desk, or tripod. User settable high or low limit (30 to 130dB).

DIGITAL SOUND LEVEL METERS

Use for general noise measurements and basic assessments. Feature analog bar graph with 50dB range updates every 40 msec, Min./Max. values over time, and AC analog output.

Fluorescent Light Testers

No. 14L964—Tests lamps, ballasts, and lamp pin connectors for a complete 3-in-1 solution. A 2½-ft. fully retractable antenna provides extended reach. Audible and visual indicators provide easy feedback. Built-in LED work light.

No. 32ZN13—Performs all 5 essential lighting tests—lamp test, ballast test, noncontact voltage test, pin continuity test, and ballast-type test—with a single, easy-to-use tool. The bright indicator light and audible alert give you quick, easy-to-read results, so you know, in seconds, when your fluorescent lamps and ballasts need replacing. Saves you time and replacement costs.

Light Meters

No. 4FKR3—Portable, digital light meter measures visible light. Easy-to-use, one-handed operation. Silicon photodiode sensor and filter. Features include data Hold and Min./Max.

Nos. 13G531 and 15E590—Light meter data loggers record data (up to 20M records) in Excel® format for easy transfer to a PC for analysis. Selectable sample rate: 1 to 3600 sec.

Nos. 3MY54 and 2HZC2—EasyView™ light meters include large LCD with analog bar graph. Wide range ideal for use in bright daylight. Peak function captures short-duration flashes. Color- and cosine-corrected sensor. Features include Min./Max., data Hold, and zero for relative measurements.

Nos. 1AEV6 and 22DC07—Light meters with remote light sensor on 12" coiled cable. Feature backlit LCD with analog bar graph. Min./Max. feature stores highest and lowest readings; data Hold freezes reading in display.

Nos. 1M946 and 5ZT02—Heavy-duty light meter has four lighting type settings for enhanced accuracy. Precision photodiode and color correction filter. Features data Hold, Min./Max./Average, and percent reading of the differential from a reference point.

No. 1H153—Light meter measures light levels using a precision diode and color correction filter (cosine/color corrected). Features fast/slow response time and an analog output for capturing readings to a recorder.

No. 6NZG0—Digital meter is designed specifically for measuring light output from LED sources. Features include data Hold and Max. recording. With large, 3½-digit display and protective sensor cap.

Nos. 2ENE5 and 2ENE7—Light meters have all the same features as No. 2ENE4, with a built-in data logger that automatically stores up to 16,000 readings or manually stores/recalls up to 99 readings. Software helps transfer readings to a PC for analysis.

Nos. 30ZP39 and 30ZP40—UV-A/UV-C light meter data loggers designed to record and transfer data to PC for analysis. Sample rate: 1 to 3600 sec.; manually stores 99 readings. Suitable for blue light radiation hazards in welding, UV sterilization, phototherapy, graphic arts, photochemical matching, photo resist exposure, curing of inks, adhesives, and coatings.

No. 5URG1—Environmental light meter with data logging makes it easy to transfer and store data on PCs for future analysis. Additional features include Auto-Ranging, data Hold, and Min./Max.

No. 5URG0—Mini environmental light meter is a palm-sized, low-power consumption meter. Backlit LCD features Auto-Ranging and Max. Hold functions with low-battery alert.

Nos. 21YE34 and 21YE35—LED light meters both feature a 4000-count display. No. 21YE34 can be used to white LEDs and standard lighting. No. 21YE35 measures white and color LEDs (red, yellow, green, blue, purple), as well as standard lighting, and stores/recalls up to 99 records.

No. 4FKR4—Auto-ranging light meter measures visible light from a variety of light sources and illumination levels. Simple one-handed operation. Silicon photodiode sensor and filter. Features include data Hold, Min./Max., manual range, and zero function.

Conductivity, TDS, and Salinity Testers

- LCD display
- Auto temp. compensation, except No. 1ZKY6

Waterproof testers feature high-accuracy, multiranging sensors with auto power off, data hold, low-battery indication and replaceable electrode module. Adjustable Conductivity to TDS ratio factor from 0.4 to 1.0. Batteries included.

- Note: See page 628 for Conductivity Standards.

MULTIPARAMETER

No. 1ZKY6 stores up to 25 readings. Dual-display shows selected parameter and temp.

No. 5AY46 alerts user when electrode needs replacement and stores up to 25 readings. Electrode replacement alert. No. 3VXN7 includes pH buffers and conductivity standards.

Nos. 443Z79 to 443Z80, 443Z82, and 56AT42 are 3-in-1 testers that display readings simultaneously. Intuitive interface gives self-diagnostic error messages. No. 443Z79 immerses samples. No. 443Z80 draws or grabs samples.

ORP Testers—Feature auto-off, memory, hold function, low-battery indicator, flat surface electrode, and replaceable electrodes. Auto electronic 1-pt. self-calibration with digital display and bar graph. IP57 floating housing. No. 25JY94 has an easy-to-read graphic display with on-screen instructions.

Dissolved Oxygen Tester—Has LCD with analog bar graph, salinity compensation up to 50 ppt, 1-pt. calibration, and adjustable altitude compensation up to 20,000 ft.

Chlorine Tester—Pocket unit quickly measures total residual chlorine in drinking and cooling water, wastewater, spas, and pools. Dual-display simultaneously shows ppm and temp. 1-pt. calibration.

EXTECH INSTRUMENTS OAKTON INSTRUMENTS

All models have automatic temperature compensation.

EXTECH®

No. 4FB74—Flip-up case provides an adjustable viewing angle. Includes pH mini-electrode, temperature probe, neck strap, and low-battery indicator.

No. 4TXG4—Features automatic/selectable calibration, wide measuring range, and stores 200 sets of readings.

No. 11L566—Dual-display features min./max., data hold functions, and auto power off. Stores 20M readings on SD card with date and time stamp that transfers directly into Excel. Includes pH electrode, temp. probe, SD card, (6) AA batteries, and case.

OAKTON®

No. 45RK62—Waterproof meter provides pH or mV measurement simultaneously with temperature and calibration % slope. Memory of 150 data sets. Includes batteries.

No. 21E897—Gives high ±0.01 pH accuracy readings and has 3-pt. pH calibration with auto buffer recognition. Features push-button operation with hold function, and auto-off. Includes ATC probes, batteries, and protective rubber boot.

Nos. 55EP30, 55EP32 and 55EP34—Waterproof meters with dual line LCD.

No. 4WCJ5

No. 21E905

EXTECH INSTRUMENTS OAKTON INSTRUMENTS YSI a xylem brand

Handheld Conductivity Meters

- Automatic temperature compensation
- Auto power off
- Include conductivity cell and batteries

No. 21E905 has a protective rubber boot and comes with a conductivity probe K=1.0. No. 21E906 includes temperature probe K=1.0, calibration solutions, sample bottles, protective rubber boot, and carrying case.

Benchtop Water Quality Meters

Laboratory meters display selected parameter and temperature simultaneously. Automatic temperature compensation maintains reading accuracy.

PH METERS

Automatic buffer recognition for U.S. and NIST pH buffers.

Oakton®—Measure pH, temperature, and millivolts (mV). Memory for 100 data points. Accepts any pH or ORP electrodes with a BNC connector. Kit No. 6CAU6 includes meter, a single-junction all-in-1 temperature/pH electrode, and AC adapter. Kit No. 6CAU7 includes meter, double-junction pH electrode, temperature probe, electrode holder, and AC adapter. For more Oakton electrodes, see page 630.

Thermo SCIENTIFIC OAKTON INSTRUMENTS

Thermo—Orion Star™ meters have AUTO-READ™ that locks in readings. Each includes a Triode™ 3-in-1 pH/ATC probe.

PH/CONDUCTIVITY METER

No. 6CAV4—Measures pH, mV, EC, and total dissolved solids (TDS). Autoranging automatically sets the best resolution for conductivity and TDS measurements. Automatic buffer recognition for both U.S. and NIST pH buffers. Includes pH electrode, conductivity/temperature probe, and probe stand.

CONDUCTIVITY METER

Read across 5 measurement ranges. Water-resistant membrane keypad.

pH Process Electrodes

- Flat tip
- 0 to 14 pH measurement range

600 Series—High-quality electrodes provide compatibility for harsh applications. Configurable for general purpose applications, low ionic conditions, or samples containing HF (hydrofluoric acid).

Note: Additional cable lengths are available; see Grainger.com®

Sensorex®

8000 Series—Modular, flat surface, self-cleaning S8000 platform features high-temperature electrolyte and enhanced ERP (extended reference path) technology that protects the reference in the presence of heavy metals, proteins, silver, and sulfides. Double junction provides extra protection in dirty applications. Ryton® PPS body.

Hydrometers

DURAC® THERMCO PRODUCTS, INC VEE GEE

DURAC

Made of lead-free ballast and glass. No. 12M017 features a built-in, mercury-free thermometer for measuring API. No. 8AMV6 is a dual-scale hydrometer used in the chemistry, pharmacology, food and beverage, starch, and similar industries. This serialized, plain form hydrometer is packaged with a multilanguage Statement of Accuracy indicating accuracy traceable to NIST. Use No. 8AVZ6 to determine specific gravity in battery acid. Nos. 46Z362, 13K183, and 46Z366 measure sodium chloride saturation of salt brines in food, fishing, and transportation industries.

Note: Enclosed thermometers should be used as a general reference only. For temperature-critical applications, a calibrated standard thermometer is recommended.

THERMCO

Individually serialized instruments are tested and calibrated by the manufacturer, and each is supplied with a statement of accuracy. Use a separate thermometer for taking temperature measurements, and correct for any temperature variations. Shatterproof polycarbonate construction.

VEE GEE

No. 20KL66 provides battery acid testing. Includes thermometer, glass syphon tube, rubber bulb, nozzle, and clamp. No. 20KL54 gives the ratio of the mass of a solid or liquid to the mass of an equal volume of distilled water.

Electrodes

- Find more electrodes and probes on Grainger.com®

Oakton®—Nos. 8AD42 and 9NNX5 are for water with heavy metals, organics, and sulfites. Nos. 9EZ17 and 9GFM1 for dirty water, heavy metals, and organics. No. 8UN13 is for high and low sodium levels.

Thermo Scientific—AquaPro™ No. 8FP12 is a clog-resistant electrode and is good for environmental and field testing of water and wastewater samples. No. 8XGJ3 is environmentally friendly, meets RoHs requirements. Contains no lead, mercury, or other hazardous substances.

Sure-Flow™ Nos. 8DRL1, 9CT13, 9JFA8 and 8DRL0 are free-flowing. For use in dirty or viscous samples.

Triode Nos. 9TJM3 and 9ANU6 have built-in temperature sensors. Use with TRIS buffers and proteins.

Flouride No. 6AGG5 measures free flouride ions in aqueous solutions.

Sensorex—Double-junction models are recommended for dirty applications.

Extech—No. 1MN59 measures for any application that requires direct contact such as food, paper, cement, and wet surfaces. No. 1H143 fits virtually any pH meter that accepts a BNC connector.

No. 3VXH4 replacement refillable pH electrode module aids in eliminating the problem of limited electrode shelf life, contamination, and usage life.

YSI—Digital pH electrode for high accuracy laboratory measurements. Sensor can be moved from instrument to instrument while maintaining its calibration data. For use in surface water, groundwater, coastal, aquaculture, and wastewater.

Colorimeters

Include sample cells, reagents, and batteries. For cuvettes, go to Grainger.com®.

Note: Copper Colorimeter No. 15F844 and IR interface module No. 15F849 are available on Grainger.com®.

Lovibond Single Parameter—Improve resolution for a specified range, account for known interferences, and calibrate to any government standard such as NIST or ISO. Accuracy: ±2% full scale. Memory: 16 data sets.

LaMotte Multiparameter—Allows 25 users tests with over 75 preprogrammed tests, including absorbance and %T modes. Memory: 500 data sets.

Lovibond Multiparameter—Offers more than 90 preprogrammed methods from alkalinity through zinc, and an additional 20 methods can be user-defined. Memory: 1000 data sets.

Turbidity Meters

Testers determine cloudiness of water; for drinking water, wastewater, and environmental applications.

Note: Calibration solutions available on Grainger.com®.

Nos. 490W91 and 490W92—LCD display and 500-point memory. Lithium ion rechargeable battery.

No. 9TD12—Sealed optical system has infrared light source and 4-point push-button calibration. Includes 4 primary standards and 3 cuvettes with light-shield caps.

No. 9NXP3—Has signal averaging and simple calibration.

No. 25KC71—2-point calibration with LCD display. Auto power off.

No. 9TD12

MICRO ESSENTIAL LABORATORY

pH Test Paper, Pencil, and Strips

Standard Test Kit includes two 15'L rolls of 7/32"W tape; one 0.0–6.0 pH roll and one 6.5–13.0 pH roll, with two color charts.

pH Pencil gives 30-sec. color match of acid or alkali residue on paper, lumber, concrete, cement, plasterboard, painted and prepainted surfaces, textile, ceramics, and skin.

Strips give instant, easy-to-read results, with bright, long-lasting single-color matches across the entire pH range.

Description	Range	W	No. of Tests	Item No.	Pkg. Qty.

Global Water
a xylem brand

Systems take composite and discrete samples for wastewater, industrial, and environmental applications. Size and interval controls set the individual time-weighted composite samples or full-bottle discrete grab samples. An external-trigger mode controls sampling from a water level sensor, rain sensor, or other external source (not included). Automatic 15-sec. backflush cycle clears debris from the strainer and empties water from the hose to prevent contaminating the next sample.

Dual-bottle sampler has 2 pumps and allows user to set sampling mode for each pump and bottle individually.

No. 36K445

No. 9ACZ5

Biodegradable Dye Tracers

Fluorescent dyes make water flow patterns easy to see, track, and map in lakes, reservoirs, septic systems, piping, and other bodies of water. Bright, vivid colors are easily detected in clear, deionized water in the range of 100 ppb of active ingredient—or just 10 ppb under a handheld laboratory black light (UV).

Description	Size	Color	Concentration @ 1 PPM	Item No.	Pkg. Qty.
Dye Tracer Liquid	16 oz.	Red	1 pt. to 6250 gal.	**8NDU0**	1
	16 oz.	Yellow/Green	1 pt. to 12,500 gal.	**8ACL5**	1
	1 gal.	Red	1 pt. to 6250 gal.	**8RF22**	1
	1 gal.	Yellow/Green	1 pt. to 12,500 gal.	**8TNY0**	1
	1 gal.	Blue	1 pt. to 12,500 gal.	**9JY17**	1
Dye Tracer Powder	1 lb.	Fluorescent Yellow/Green	1 lb. to 120,000 gal.	**8CV78**	1
	1 lb.	Fluorescent Red	1 lb. to 60,400 gal.	**9DTY7**	1
	1 lb.	Fluorescent Blue	1 lb. to 120,000 gal.	**8ZE47**	1
Dye Tracer Tablet	200 Tablets	Blue	20 gal./Tablet	**9CH32**	200

Dippers

- Will not rust or corrode

Lightweight, durable dippers for collecting samples from streams, tanks, drums, and other hard-to-reach areas. HDPE dippers provide excellent chemical resistance—and float. Molded graduations and dual-pouring spouts to make it easier to take samples from large tanks.

No. 3KWF6

Disposable Bailers

- For nylon twine, see page 1097
- For sample vials, see page 657

EcoBailer—Clear PVC models allow visual inspection of well samples. They sink rapidly without requiring additional weighting material. Longer bottom spout helps prevent silt from interfering with check ball and causing potential leakage. A custom emptying device regulates discharge flow. High-density polyethylene models are designed with a thick tube wall that is less likely to bend when handled.

EcoBailer Pro—Hydrodynamic design with wide spout opening for fast sink rate while minimizing dissolved oxygen in the well sample. Easy-to-handle emptying device provides more accurate control of liquid flow into the sample bottle. Pour spout and ball retainer allow easy pouring from top of bailer.

Water Purification Systems

Produce purified water for laboratory, industrial, and commercial applications. All Type I water systems, start-up cartridges, and final filters are sold separately.

WATER PURIFICATION SYSTEMS

- Produce Type 1 laboratory grade water on demand

Aries Type I—Quiet recirculation pump assures constant water purity. Large capacity cartridges are spring loaded. VP Series filter cartridges sold separately.

- Bacteria removal: < 10 CFU/mL

Aries Type I
No. 44C701

Gemini Type I—Ultrahigh-purity systems are PLC controlled with a touch panel to easily program automatic dispensing of user-defined batches. The ultrapure water quality is maintained with 3-pass UV in the recirculation loop and a UV-sterilized dispense port.

- Bacteria removal: < 10 CFU/1000mL

Phoenix Type I—Ultrahigh-purity water systems deliver lab quality water on demand. The water goes through a staged purification process which includes high-purity ion exchange resins to remove dissolved minerals and internal recirculation to maintain purity. Intuitive touch screen and easy maintenance. Filter cartridges sold separately.

- Bacteria removal: < 1 CFU/mL

Phoenix Type I
No. 48GE17

DEIONIZERS

- Produce Type II purified water

Hydra DI—Preassembled high-purity systems provide deionized water from city and tap water supplies using a 3-stage process. Include cartridges and water quality light.

Hydra DI
No. 44C703

VP SERIES SINGLE CARTRIDGE HOLDER

Unix modular, wall-mounted system employs quick-connect VP Series cartridges (sold separately) to treat water and process fluids. Holders can be easily linked together for staged filtration in downflow and upflow applications.

Rotary Evaporators

No. 56DK96

- 1300W heating capacity

Offer a digital display for set and actual heating bath temperature.

HEI-VAP EXPERT

Large dial controls to adjust rotation speed and bath temperature. Adjust the required angle of the evaporating flask individually according to your needs. Patented flask clamp Easy-Clip cannot get lost due to a connection to the vapor tube coupling ring.

HEI-VAP CORE

3.5" LCD indicates rotation speed, heating bath, and vapor temperature. Preprogrammed timer turns off evaporator and removes evaporating flasks from bath on motor lift models. Motorized models feature lift that adjusts height with the press of a button.

Disposable Glove Chambers

Spilfyter® by NPS Corp.

Hands-in-Bag® atmospheric chambers are constructed of sturdy 0.003" gauge polyethylene and are polished for clarity. Seams are heat sealed for strength and inflation-tested to be leak-free. Ideal for laboratory, field sampling, and emergency isolation applications. Include sealing tape.

XPERT FILTERED BALANCE SYSTEM WITH GUARDIAN AIRFLOW MONITOR DUCTLESS FUME HOODS

Provide user protection by containing airborne powders and particulates. Help keep particles contained during weighing and power transfer. Include a built-in blower and exhaust HEPA filter. This system returns filtered air to the laboratory and requires no outside ducting.

CE (COMPACT) DUCTED FUME HOODS

Reduced hood size with vented enclosure duct, pulls contaminants out of the building for occupant safety. 1-pc., seamless liner ensures efficient airflow and has excellent chemical resistance and flame retardation.

BASIC™ DUCTED FUME HOODS

Designed for mobile labs, classrooms, or areas with low ceilings or narrow aisles. 16-ga., powder-coated steel liner and counterbalanced clear tempered safety glass sash. Built-in blowers are sized for up to 100-ft. duct run. Hoods include air foil, 2-pc. adjustable baffle, 100W incandescent light fixture, and 10.3" O.D. duct collar for connection to exhaust.

ISOLATOR³ HIGH-PERFORMANCE DUCTED LABORATORY FUME HOODS

Have precise baffle pressurization to help achieve superior capture and containment at standard or low volume applications. Hoods have 43½"H "full view" sash with tempered glass and a full-length handle. Slotted rear baffle helps provide even plenum balance with a 24"D interior. Hoods come prewired and include a white poly glass liner. Accessories sold separately on Grainger.com®.

TELESCOPING BASE STANDS

Provide sturdy support of up to 1000 lb.

Biosafety Cabinets

LABCONCO INSTOCK

Help provide personnel, product, and environmental protection from biological particulates. For use with agents that require Biosafety Level 1, 2, or 3 containment.

Purifier Logic+—Feature ADA-complaint touchpad control on right-hand side post for manual activation of blower, lights, timer, and electrical receptacles, audible arm mute, and menu selection. Built-in interval or elapsed timer for experiment monitoring, fluorescent light, or UV light control.

Labculture® RELIANT—Designed with shorter height and smaller footprint for optimal utilization of lab space. Allow preparation of low to moderate risk agents. Has energy-efficient DC ECM motor technology. Feature simple switches, pressure gauge, and manual UV timer. Esco Isocide™ antimicrobial coating on all painted surfaces minimizes contamination.

NORLAKE SCIENTIFIC ABS American BioTech Supply

Scientific Refrigerators and Freezers

- 60 Hz

Provide energy-efficient, convenient, safe, and reliable performance for demanding life science, pharmacy, biological, clinical, and industrial applications. ABS units feature microprocessor temperature controller with audible and visual alarms, digital temperature display, remote alarm contacts, keyed door locks, and leveling legs.

THERMCO PRODUCTS, INC

Liquid In Glass Thermometers

Use to measure critical temperatures in blood bank refrigerators, ultralow freezers, freezers, refrigerators, incubators, ambient/room, block heaters, and ovens. Thermometers are unbreakable bottles filled with a biosafe, glycol/water solution. Include space-saving magnets to adhere the thermometer to a steel wall or door. Nonmercury models are fluoropolymer-coated for protection.

Digital Refrigerated Laboratory Incubators

Revolutionary Science—Refrigerated incubators keep low temperatures for applications such as fermentation studies, or plant and insect studies. Include color touch screens, except No. 48VG33 has a digital display.

Lab Companion—Maintain desired temperature, humidity, etc., to grow and maintain cell cultures. Microprocessor PID control with 3-point temperature calibration and automatic tuning. Bright VFD display.

Shel Lab®—Ideal for testing sewage, wastewater, and other low and room temperature applications. Mechanical convection system for even air distribution. Microprocessor control system, PID temperature control, and LED display.

Stainless Steel Warming Cabinets

- 120VAC

Help maintain ideal clinical temperatures for solution bottles and bags, plus blankets for patient care. Feature a heating compartment fully insulated for efficient operation, illuminated digital power and temperature controls, double wall stainless steel construction with a #4 finish, adjustable perforated stainless shelves (except Nos. 52KC47 and 52KC46), and leveling feet.

Models have an adjustable setpoint temperature range with setpoints ± 5°F and an auto shut off for temperatures exceeding 180°F. Temperature lock-in capable and an audible and visual over-temperature indicator. Self-closing door is field reversible and has spring-loaded hinges. Front access eases servicing. The built-in temperature recording function can transmit to Building Management Systems (BMS).

Convection Ovens and Furnaces

Provide controlled heat for drying, baking, sterilizing, heat treating, evaporating, annealing, and testing.

Forced-Air Convection Ovens use blowers to circulate interior air for uniform temperature.

BASIC DIGITAL OVENS

Shel Lab ovens feature microprocessor temperature control and digital electronic timer. LSS ovens include PID controller and PT 100 sensor.

No. 13R399

No. 20H915

PROGRAMMABLE OVENS

Adaptive multifunctional digital PID-microprocessor controller with high-definition TFT-color display. Include adjustable overtemperature protection and 7-day programmable timer.

BOX FURNACES

Yield consistent temperatures throughout the working chamber zone.

VACUUM OVENS

Feature cross-flow ventilation, overtemperature protection, stainless steel chamber, and vacuum gauge.

BriskHeat® Chemglass Life Sciences

Heating Mantles and Beaker Heaters

- 120V, except No. 21TW61 is 240V
- Required Benchtop Temperature Controllers sold separately

Provide uniform heat across the surface of a flask or beaker.

Heating Mantle
No. 13N549

Beaker Heater
No. 13P744

HEATING MANTLES

- Max. temp: 850°F

Fiberglass liner is molded to fit snugly on round-bottom flasks. The heating element is topped by ceramic and wool insulation layers and a fiberglass cloth cover.

Lower Hemisphere—For use with basket ring stands. 3" lead wire with NEMA L1-15R connector and 4-ft. power adapter cord with NEMA 1-15 plug.

Spherical—Opening adjusts for 1-, 2-, or 3-neck flasks on these full-coverage zippered mantles for basket ring stand. 6-ft. cord with NEMA 1-15 plug, except Nos. 13N559 and 13N560 have 4-ft. cord.

BEAKER HEATERS

- Max. temp: 450°F

Heaters wrap around Griffin and standard beakers and are snugged in place with a hook-and-loop closure. The heating element is laminated between two layers of fiberglass-reinforced silicone rubber that is moisture- and chemical-resistant. 2-ft. power leads with 2-prong NEMA 1-15 plug.
